Imperfect Creatures Lucinda Cole, 2016-02-26 Lucinda Cole s Imperfect Creatures offers the first full length study of the shifting unstable but foundational status of vermin as creatures and category in the early modern literary scientific and political imagination In the space between theology and an emergent empiricism Cole s argument engages a wide historical swath of canonical early modern literary texts William Shakespeare s Macbeth Christopher Marlowe s The Jew of Malta Abraham Cowley s The Plagues of Egypt Thomas Shadwell s The Virtuoso the Earl of Rochester s A Ramble in St James s Park and Daniel Defoe s Robinson Crusoe and Journal of the Plague Year alongside other

nonliterary primary sources and under examined archival materials from the period including treatises on animal trials grain shortages rabies and comparative neuroanatomy As Cole illustrates human health and demographic problems notably those of feeding populations periodically stricken by hunger disease and famine were tied to larger questions about food supplies property laws national identity and the theological imperatives that underwrote humankind's claim to dominion over the animal kingdom In this context Cole's study indicates so called vermin occupied liminal spaces between subject and object nature and animal animal and the devil the devil and disease even reason and madness This verminous discourse formed a foundational category used to carve out humankind's relationship to an unpredictable irrational natural world but it evolved into a form for thinking about not merely animals but anything that threatened the health of the body politic humans animals and even thoughts The Spectator ,1887 America, History and Life ,2000 Article abstracts and citations of reviews and dissertations covering the United States and Canada *Phobia and American Literature, 1705-1937* Don James McLaughlin,2025-07-21 *Phobia and American Literature 1705 1937 A Therapeutic History* tells a neglected two century history of phobia's gradual emergence as a variable suffix in medicine politics and literature ready to be appended to an array of objects situations and ideas Across psychology's early American and nineteenth century varieties phobia prompted a remarkable genealogy of thought in the Americas Literary figures adapted conversations and debates happening among physicians to popular forms such as sermons essays satire novels short stories and creative ventures in the social sciences Through this fusion of medical and literary activity concentrated in the cities of Boston Philadelphia and New York phobia's analysis became a foundational locus for the development of a therapeutic imaginary at the heart of American liberalism More precisely phobia's analysis became central to a discourse that regarded public mental health as an indispensable factor in the recognition of inalienable rights and civil liberties By recovering the discursive contingencies that enabled this tradition McLaughlin illuminates new connections between towering thinkers among them Cotton Mather John Adams Benjamin Rush Frederick Douglass William Lloyd Garrison Harriet Beecher Stowe Oliver Wendell Holmes Sr William James and Zora Neale Hurston Following these lines of influence and debate emphasis is placed on the incisive care such figures brought to bear on phobia's etymological development as a locus of psychological inquiry Dog's Best Friend? John Sorenson,Atsuko Matsuoka,2019-11-14 In almost 40 per cent of households in North America dogs are kept as companion animals Dogs may be man's best friends but what are humans to dogs If these animals loyalty and unconditional love have won our hearts why do we so often view closely related wild canids such as foxes wolves and coyotes as pests predatory killers and demons Re examining the complexity and contradictions of human attitudes towards these animals *Dog's Best Friend* looks at how our relationships with canids have shaped and also been transformed by different political and economic contexts Journeying from ancient Greek and Roman societies to Japan's Edo period to eighteenth century England essays explore how dogs are welcomed as family consumed in Asian food markets and used in Western laboratories Contributors

provide glimpses of the lives of street dogs and humans in Bali India Taiwan and Turkey and illuminate historical and current interactions in Western societies The book delves into the fantasies and fears that play out in stereotypes of coyotes and wolves while also acknowledging that events such as the Wolf Howl in Canada s Algonquin Park indicate the emergence of new popular perspectives on canids Questioning where canids belong how they should be treated and what rights they should have Dog s Best Friend reconsiders the concept of justice and whether it can be extended beyond the limit of the human species
