*China's Economy* Arthur R. Kroeber, 2020-06-05 China s economic growth has been revolutionary and is the foundation of its increasingly prominent role in world affairs It is the world s second biggest economy the largest manufacturing and trading nation the consumer of half the world s steel and coal the biggest source of international tourists and one of the most influential investors in developing countries from southeast Asia to Africa to Latin America Multinational companies make billions of dollars in profits in China each year while traders around the world shudder at every gyration of the country s unruly stock markets Perhaps paradoxically its capitalist economy is governed by an authoritarian Communist Party that shows no sign of loosening its grip China is frequently in the news whether because of trade disputes the challenges of its Belt and Road initiative for global infrastructure or its increasing military strength China s political and technological challenges created by a country whose political system and values differ dramatically from most of the other major world economies creates uncertainty and even fear China s Economy What Everyone Needs to Know is a concise introduction to the most astonishing economic and political story of the last three decades Arthur Kroeber enhances our understanding of China s changes and their implications Among the essential questions he answers are How did China grow so fast for so long Can it keep growing and still solve its problems of environmental damage fast rising debt and

A provocative book that demystifies China s great democratic leap backward under Xi Jinping revealing why the country s embrace of capitalism has given rise to hard authoritarianism mass surveillance and one man rule instead of democracy as many in the West had hoped When China embarked on its transformative journey of modernization in 1979 many believed the country s turn toward capitalism would put its totalitarian past to rest and mark the birth of a democratic open society Instead China reverted to a neo totalitarian state one backed by one of the fastest growing most formidable economies on earth The Broken China Dream pulls back the curtain on the regime of strongman Xi Jinping revealing why the reforms of the post Mao era have been reversed on nearly every front and why the world failed to see it coming Exposing the truth behind China s economic ascendancy after the Cultural Revolution Minxin Pei shows how following Mao s death in 1976 Deng Xiaoping strategically deployed the tools of capitalism to preserve the Chinese Communist Party Deng kept intact the institutional foundations of totalitarianism even as he unleashed private entrepreneurship and courted foreign investment giving China s one party state control of a vast

repressive apparatus and the most critical sectors of the economy Only a fragile balance of power among dueling factions prevented the rise of a totalitarian leader in the two decades after the Tiananmen crackdown in 1989 but this temporary equilibrium collapsed Essential to understanding today's China this meticulously researched book is a sobering account of why the country's reformers and institutions could not stop a shrewd and ruthless politician like Xi from resurrecting dormant totalitarian practices that for the foreseeable future have spelled the end of the dream of a free and prosperous China

*India and China* Dipak Basu, Victoria W. Miroshnik, 2023-01-09 A regular feature in almost publication has been a comparison of India's slow economic growth and until recently China's rapid progress Yet in 1988 both countries had similar living standards As things stand it is undoubtedly a tale of two countries and two systems Supporters of India can point to the democratic nature of the country's development while ignoring the slow pace of change

China's supporters point to exceptional poverty reduction, urbanization and infrastructure developments while ignoring the social, religious and environmental costs these efforts have created. However, popular media has ignored the fact the individual starting points of the two nations are a gap which this book fills. This study examines how China's economic reforms were initiated with Deng Xiaoping's 'fang shou' (letting go and tightening up) efforts between 1978 and 1989. However, until 1989, China had nothing much to demonstrate compared with India. Both countries had similar per head national income, but India was technologically much superior to China. The reforms in China then accelerated in a sustained manner, be it the Family Responsibility System that transformed agriculture, the opening up of the industrial sector for the growth of local enterprises and foreign investments, or the substantial effort to make state-owned enterprises more efficient. **China's Industrial Development in the 21st Century** Mu Yang, Hong Yu, 2011. Annotation: This text provides a focused analysis of the main Chinese industrial sectors through case studies, data analysis and review of new state-initiated policies. In this in-depth study, author Gaoheng Zhang analyses the relationship between the Italian ready-to-wear fashion industry and the Chinese fast fashion industry, focussing on the 2000s and 2010s. Looking first at the communication of Italian fashion in China, before examining the impact of Chinese migrants and Chinese fashion on the Italian fashion industry, the author unpacks perceived tensions between made-in-China fast fashion and made-in-Italy ready-to-wear that is viewed as slow fashion. In doing so, Zhang exposes the nuances, controversies and ambivalences of Italy's and China's intertwined fashion systems, revealing not only the competition between these two countries but also their collaboration. Applying the lenses of communication, cultural and fashion studies to this analysis, *Fashion Communications Between Italy and China* reflects on global fashion industries more generally and related topics such as globalized fashion making, fashion facilitated transcultural identity construction and fashion-led negotiation of national economic issues. *The Commercial Dictionary of Trade Products, Manufacturing and Technical Terms ...* Peter Lund Simmonds, 1872. **China on the Rise** Efe Can Gürcan, Can Donduran, 2024-07-23. This book analyses China's multidimensional rise in the context of the international political economy, drawing on Susan Strange's concept of structural power. Examining the sources of Chinese power along with its geopolitical, economic and cultural reflections, the authors consider how China's rise is linked with the incremental process of multipolarization in world politics. Providing a systematic, analytical and empirically rich account of China's surge in the international political economy, this study will appeal to scholars, policy makers and students with interests in China studies, international political economy and international relations.
