Madness and Ruin Mel Watkins,1992 **Staples and Beyond** Mel Watkins,2006-10-06 This collection brings together Watkins most important scholarly articles In *Staples and Beyond* Watkins addresses the staple thesis of Canadian economic and political development and in particular the effort to extend Harold Innis work by giving more explicit consideration to class relations and the role of the state He considers the historical nature of Canada s economic dependency in relation to tariff barriers foreign investment the multi national corporation and wide ranging free trade and investment agreements He also examines the evolution of economics and political economy as academic disciplines and reflects on the relationship between intellectual scholarship and political activism *Understanding Canada* Wallace Clement,1997 The new Canadian political economy has emerged from its infancy and is now regarded as a respected and innovative field of scholarship *Understanding Canada* furthers this tradition by focusing on current issues in an accessible and informative way

Globalisation and its Discontents John Wiseman,2000-06-13 Most analyses of globalization convey the message that it is an unstoppable force sweeping away national sovereignty and inevitably creating a brave new world of borderless and boundless consumerism In such a context politics and democracy become irrelevant This collection of essays develops a more critical and grounded analysis of the nature and implications of globalization Many of the contributions to this book conclude that there are real political choices to be made Even though the economic context has changed politics still matters

Walter Gordon and the Rise of Canadian Nationalism Stephen Azzi,1999-05-25 *Walter Gordon and the Rise of Canadian Nationalism* is an examination of the origins of Walter Gordon s nationalist ideology and its impact on Canada It traces his ideas from his family influences and the intellectual currents present in his early years to his work as a chartered accountant public servant and head of a small conglomerate Drawing on extensive interviews and impressive research Azzi provides not only a biography of an important political figure but a significant study of the political and intellectual controversies that Gordon and his ideas created shedding light on the larger political and economic questions of the postwar era **Home**

Economics Nandita Rani Sharma,2006-01-01 *Home Economics* is an urgent and much needed reminder that society must pay careful attention to how nationalist ideologies construct homelands that essentially leave the vast majority of the world s migrant peoples homeless **Continentalizing Canada** Gregory J. Inwood,2005-01-01 Free trade has been a highly

contentious issue since the Conservative government of Brian Mulroney negotiated the first deal with the United States in the 1980s Tracing the roots of Canada s contemporary involvement in North American free trade back to the Royal Commission on the Economic Union and Development Prospects for Canada in 1985 also known as the Macdonald Commission Gregory J Inwood offers a critical examination of the commission and how its findings affected Canada s political and economic landscape including its present day reverberations Using original research including content analysis interviews archival information and surveys of relevant literature Inwood argues that the Macdonald Commission created an

atmosphere and political discourse that made the continentalization of Canada possible by way of free trade agreements with the U S and Mexico Through the use of a suspect research program and with the aid of a select oligarchy within the Commission and the government bureaucracy opposition to continentalism from both the majority of the Canadian population and even several commissioners was ignored Accessible to readers interested in Canadian politics policy or economy

Continentalizing Canada offers a thorough examination into the Macdonald Commission and the resulting discourse in the Canadian political economy

The Rise of the New West John F. Conway, 2014-05-30 This one volume history chronicles a 150 year history of dramatic changes in fortune and attitudes in western Canada From the Riel Rebellions and the Winnipeg General Strike to the founding of the CCF Social Credit and Reform parties Canada's West has always been a hotbed of political social and economic change In the early twentieth century those calls for change emanated from the left as farmers and workers fought for social and economic justice In the past two decades the protests and calls for change emanated from the right as the region gained a new role for itself in Canada This history chronicles the rise and fall of such figures as Grant Devine Bill Vander Zalm Glen Clark Roy Romanow Stockwell Day and Lorne Calvert and the emergence of Stephen Harper and the federal Conservatives It describes how the West the political wellspring of progressive changes over the years has been transformed into the bastion of the right culminating in the virtual annihilation of the NDP in Saskatchewan the cradle of social democracy in Canada This is the updated fourth edition of John Conway's classic book originally published under the title *The West*

Globalization Unplugged Peter Urmetzer, 2005-01-01 The debate over economic globalization has reached a fever pitch in the past decade and a half with Western governments and multinational corporations trumpeting its virtues and a multitude of activists and developing world citizens vociferously denouncing it Both sides would agree that globalization is a recent development that is changing the way people and nations do business but in *Globalization Unplugged* Peter Urmetzer questions whether national economies are losing their sovereignty and whether the topic of globalization merits as much discussion as it receives Urmetzer's focus is specifically on Canada and he demonstrates that current levels of trade are not unprecedented and further that as the economy becomes more service oriented it will also become less trade dependent He points out that only a relatively small percentage of Canada's wealth is owned by foreign investors and likewise only a small portion of the country's wealth is located outside of its borders Disputing claims that the nation state is weakening or disappearing altogether Urmetzer shows how the welfare state side of government spending conveniently ignored in the anti globalization literature yet arguably the most significant development in the political economy of the nation state in the twentieth century remains remarkable stable Written with precision and skill *Globalization Unplugged* will spark controversy on both sides of the globalization debate and help deflate the rhetoric of both advocates and detractors

A Marxist Critique of the Ruined University Krystian Szadkowski, Jakub Krzeski, 2025-04-21 This book revitalizes the Marxian concept of critique for research into the transformation of universities It consists of a set of comprehensive and interconnected theoretical tools starting from the reflection on the political ontology of higher education through the critique of political economy of the sector to the analysis of activist struggles within the universities and back to the ontological concept of the common a foundation for the university alternative design The tools offered and discussed in context throughout the book allow for a productive use in overcoming the current crisis of the university as well as to avoid the pitfalls present in contemporary debates around it Unlike the dominant discussions on the university in crisis the authors argue that to grasp its nature one has to reach more profound than the level of appearances such as marketization and commodification Szadkowski and Krzeski offer a compelling reappraisal of critique as a mechanism to liberate intellectual work By linking critique to how knowledge is structured and commodified they help us transcend reductionist narratives of a crisis ridden University Prioritising ontological renewal they embrace the political and the common enriching our collective ways of knowing the world as a movement Pivoting around academic and student protests in Poland the book enables us to imagine spaces and times of critical hope that resist the capitalist subjugation of intellectual activity to knowledge production Richard Hall Professor of Education and Technology De Montfort University Leicester UK In the century since Antonio Gramsci new works in the Marxist tradition have made only modest contributions to social thought the combined result of the savage repression in the West of the dangerous revolutionary ideas plus the collapse in the East into jacobin conspiracy and dogmatism If a living vibrant Marxism had been part of the twentieth century mainstream then much catastrophe would have been averted Now the drive for capital accumulation sovereign individualism and rampant nationalism have brought us to the brink of ecological disaster and World War III Into the void step two emerging scholars Krystian Szadkowski and Jakub Krzeski with an original Marxist critique of higher education and the common good There is hope in this development vital resources for reflection discussion and action Simon Marginson Professor of Higher Education at the Universities of Bristol and Oxford UK Honorary Professor at Tsinghua University in China and Joint Editor in Chief of the journal Higher Education

The Free Trade Advocate and Journal of Political Economy, 1829 *Canadian Books in Print. Author and Title Index*, 1975 *The Civil Sphere in Canada* Jeffrey C. Alexander, Mervyn Horgan, 2025-05-15 When activists advocates victims of injustice and ordinary citizens seek to advance or block social justice and cohesion they draw on morally charged ideals But the wellsprings of solidarity in a society as diverse

as Canada are complex and mutable The Civil Sphere in Canada analyzes the shifting meanings we attach to key social actors activities and institutions to reveal the dynamics of inclusion and exclusion that animate Canadian society Applying Jeffrey Alexander s groundbreaking civil sphere theory to Indigenous settler relations media scandals multiculturalism urban planning and personal relations contributors demonstrate that transformations in shared meaning must precede legislative and institutional change Profoundly harmful behaviours such as cultural appropriation sexual misconduct and even genocide may pass as routine for years before the public decides they are unacceptable breaches of civil order This superb collection ushers Canadian voices into a burgeoning international debate about the role of the civil sphere in effecting social justice

Encountering Material Culture Through Archaeological Fiction Kerry Dodd, 2024-12-12 Investigating the representation of artefacts objects and things in a range of predominantly Western archaeological fiction from the late Victorian period to the modern day this book examines the narratives through which humanity represents its own material heritage in relation to notions of enchantment exhibition estrangement adventure tourism and waste Kerry Dodd asserts that comprehending the structures through which material culture is presented within archaeological media reveals the structures that transform an object from rubbish to relic Calling upon such indicative literature films TV series and video games as Tomb Raider Indiana Jones Uncharted and Relic Hunter this book explores the depiction of material culture through three principal areas relics exhibition and adventure Outlining a critical framework of artefact representation Dodd argues that such iconic moments as Howard Carter s remark that he saw wonderful things when he broke into the antechamber of Tutankhamun s tomb remain recognisable through the evocation of a spectacular visual despite little concrete definition of the objects witnessed This book offers a unique exploration of how such figures as Indiana Jones Lara Croft and Carter have cemented a cultural recognition of what an artefact constitutes as being dependent on how an object is encountered It is through the very wonder of things that Dodd breaks down the boundaries between popular and professional archaeology by pushing forward critical considerations of material culture
