Heartland Serial Killers Richard Lindberg,2011-04-25 Lindberg an accomplished local historian and true crime writer presents a fascinating story of two contemporaneous serial killers both weaving marriage and murder in and around Chicago during the 1890s and 1900s Johann Hoch was a debonair bigamist and wife killer who boasted of having perfected a scientific technique to romance and seduction Belle Gunness was a nesting Black Widow whose sprawling farm in Northwest Indiana was a fatal lure for lonely bachelors seeking the comforts of middle age security by answering matrimonial advertisements placed by Gunness Notorious in his own day Hoch had faded into the dark background of Chicago crime history But in Heartland Serial Killers Lindberg brings back vividly the horrors of one of Chicago s first celebrity criminals and uncovers new evidence of a close connection between Hoch and H H Holmes the Devil in the White City Unlike Hoch Belle Gunness likely the most prolific and infamous female serial killer of the twentieth century has remained fascinating to the public Here Lindberg presents the most comprehensive and compelling study of the Gunness case to date including new information regarding ongoing DNA testing of remains found at the site of Gunness farm in LaPorte Indiana which may serve to resolve once and for all the mystery surrounding Gunness death Told in alternating chapters and rapidly paced this book is true crime at its best gripping pulpy and full of sharp historical tidbits True crime fans history buffs and those interested in local lore will delight in this chilling tale of two ruthless killers

Numerical Methods for Metamaterial Design Kenneth Diest,2013-08-13 This book describes a relatively new approach for the design of

electromagnetic metamaterials Numerical optimization routines are combined with electromagnetic simulations to tailor the broadband optical properties of a metamaterial to have predetermined responses at predetermined wavelengths After a review of both the major efforts within the field of metamaterials and the field of mathematical optimization chapters covering both gradient based and derivative free design methods are considered Selected topics including surrogate base optimization adaptive mesh search and genetic algorithms are shown to be effective gradient free optimization strategies Additionally new techniques for representing dielectric distributions in two dimensions including level sets are demonstrated as effective methods for gradient based optimization Each chapter begins with a rigorous review of the optimization strategy used and is followed by numerous examples that combine the strategy with either electromagnetic simulations or analytical solutions of the scattering problem Throughout the text we address the strengths and limitations of each method as well as which numerical methods are best suited for different types of metamaterial designs This book is intended to provide a detailed enough treatment of the mathematical methods used along with sufficient examples and additional references that senior level undergraduates or graduate students who are new to the fields of plasmonics metamaterials or optimization methods have an understanding of which approaches are best suited for their work and how to implement the methods themselves
