 sacred science and the science of a cosmos governed by quantum mechanics Since the dawn of the Age of Science
 humankind has been engaged in a methodical quest to understand the cosmos With the development of quantum mechanics
 the notion that everything is solid matter is being replaced with the idea that information or thought may be the true source
 of physical reality Such scientific inquiry has led to a growing interest in the brain s unique and mysterious ability to create
 perception possibly through quantum interactions Consciousness is now being considered as much a fundamental part of

 using critical faculties attuned to the quantum manifestation of the universe This understanding of reality as a product of
 human consciousness provided the inspiration for the sacred science of the ancients precisely the philosophy modern science
 is embracing today In the philosophical tradition of Schwaller de Lubicz The Spiritual Technology of Ancient Egypt
