The Shape of the Soul Paul Marshall, 2019-03-18 An essential read for any true seeker Eben Alexander MD Neurosurgeon author of Proof of Heaven and Living in a Mindful Universe When Paul Marshall began to pay attention to his dreams he could not have anticipated the transformative experience that would follow A tremendous expansion of consciousness exposed the insignificance of his everyday self but also revealed unsuspected depths of mind and hinted at a deeper self that holds the universe within In The Shape of the Soul Marshall now a mysticism scholar draws on personal experiences along with a wealth of religious philosophical and scientific ideas to explore this deeper self sometimes experienced in mystical and near death states as spherical in form Drawing inspiration from the philosophers Plotinus and Leibniz Marshall takes mind to be more fundamental than matter and views the basic units of nature as perceptual beings We ourselves are such beings striving for fulfilment in a long evolutionary journey of soul making Bringing together mysticism philosophy biology and even some physics The Shape of the Soul offers a deeply integrated vision of the self and the universe Addressing the mind body problem the origin of the world evolution reincarnation suffering and the nature of God Marshall delivers what will surely prove an intellectual classic *The Monad and Other Essays Upon the Higher Consciousness* C. CHAPTER II HIGHER CONSCIOUSNESS Students who have not yet experienced the buddhic consciousness consciousness in the intuitional world frequently ask us to describe it Efforts have been made in this direction and many references to this consciousness and its characteristics are to be found scattered through our literature yet the seeker after knowledge finds these unsatisfactory and we cannot wonder at it The truth is that all description is necessarily and essentially defective it is impossible in physical words to give more than the merest hint of what this higher consciousness is for the physical brain is incapable of grasping the reality Those who have read Mr Hinton s remarkable books on the fourth dimension will remember how he tries to explain to us our own limitations with regard to higher dimensions by picturing for us with much careful detail the position of an entity whose senses could work in two dimensions only He proves that to such a being the simplest actions of our world must be incomprehensible A creature who has no sense of what we call depth or thickness could never see any terrestrial object as it really is he could observe only a section of it and would therefore obtain absolutely wrong impressions about even the commonest objects of everyday life while our powers of motion and of action would be utterly incomprehensible to him The difficulties which we encounter in trying to understand the phenomena even of the astral world are precisely similar to those which Mr Hinton supposes to be experienced by his two dimensional entity but when we try to

raise our thoughts to the intuitional world we have to face a state of existence which is lived in no less than six dimensions if we are to continue at *The National Union Catalog, Pre-1956 Imprints* Library of Congress, American Library Association.
