Zimmermann, 2013-11-07

Monetary sovereignty is a crucial legal concept dictating that states have sovereignty over their own monetary financial and fiscal affairs However it does not feature as part of any key instruments of international law including the Articles of Agreement of the International Monetary Fund Rather it has remained a somewhat separate notion developed under contemporary international law from an assertion of the former Permanent Court of International Justice in 1929 As a consequence of globalization and increasing financial integration and a worldwide trend towards the creation of economic and monetary unions the principle of monetary sovereignty has undergone significant change This book examines this evolution in detail and provides a conceptual framework to demonstrate what this means for the legal and economic challenges faced by the international community The book examines the historic origins and evolution of the concept of monetary sovereignty putting it into the context of broader concepts of sovereignty It argues

that monetary sovereignty remains relevant as a dynamic legal concept with both positive and normative components It investigates the continuing hybridization of international monetary law resulting from changes to its formal and material sources It then examines the complex phenomenon of exchange rate misalignment under international monetary and trade law and the increasing regionalization of monetary sovereignty notably in light of the European sovereign debt crisis Finally it assesses the role the concept of monetary sovereignty can play in the reorganization of international finance following the recent global financial crisis

Monetary Concepts and Definitions International Monetary Fund,1989-11-01 This paper examines monetary concepts and definitions It notes that approaches to monetary analysis and the concept of money itself have been undergoing substantial change in many countries due in large part to recent innovation which has affected financial markets financial instruments and financial institutions As a result many countries increasingly tend to focus on multiple creators and instruments of money as opposed to just currency and transferable demand deposits This fact is borne out by the paper s survey of national practices in the selection and grouping of instruments in money measures The paper concludes that the emerging trend towards broader concepts of money implies the need for some rethinking of traditional notion of money measures

The Successes and Failures of Economic Transition H. Gabrisch,J. Hölscher,2006-08-25 This book takes a macroeconomic approach to the issue of transformation from communist economies into market economies At the centre of the analysis stands the role of the state and the definition within a dramatically changing environment Particular emphasis is given to the emerging role of money and the financial sector

The Psychology of Money Michael Argyle,Adrian Furnham,2013-10-23 This fascinating book examines such diverse and compelling subjects as money and power gender differences morality and tax the very rich the poor lottery and pools winners how possessions and wealth affect self image and esteem why some people become misers and others gamblers spendthrifts and tycoons and why some people gain more pleasure from giving away money than from retaining it Comprehensive and cross cultural The Psychology of Money integrates fascinating and scattered literature from many disciplines and includes the most recent material to date It will be of interest to psychologists sociologists anthropologists and to people interested in business and economics

Farm Planning with Linear Programming: Concept and Practice J B Dent,S R Harrison,K B Woodford,2013-10-22 Farm Planning with Linear Programming Concept and Practice focuses on concepts and methods in farm planning The book first discusses the principles of farm planning including elements of farm planning problems summary and review questions The text highlights farm planning models The nature of models commonly used farm planning models multiple constraint problems and program planning problems in applying models and comments are considered The book also focuses on the linear programming network opportunity cost and the simplex method and analysis of the linear programming solution The text also explains tableaux construction for short run planning Crop and pasture rotations feed budgeting buy sell and hire activities and livestock reconciliation are discussed The book also describes pastoral property applications Breed comparison

economics of off farm grazing and spatial diversification and optimal calving date and lactation length on dairy farms are discussed The text is a good source of information for agricultural researchers farmers and students wanting to study farm management *Journal of Economic Literature* ,1972 Financial Literacy in Greece: Relevance, Actors and Initiatives OECD,2024-01-23 This report discusses the background for improving financial literacy in Greece as part of a larger project to develop a Greek national financial literacy strategy It presents the stakeholders directly involved with or interested in financial literacy and analyses the financial literacy initiatives currently implemented in the country **Ideas and Economic Crises in Britain from Attlee to Blair (1945-2005)** Matthias Matthijs,2012-08-21 During the period from 1945 to 2005 Britain underwent two deep seated institutional transformations when political elites successfully challenged the prevailing wisdom on how to govern the economy Attlee and Thatcher were able to effectively implement most of their political platforms During this period there were also two opportunities to challenge existing institutional arrangements Heath s U turn in 1972 signalled his failure to implement the radical agenda promised upon election in 1970 whilst Tony Blair s New Labour similarly failed to instigate a major break with the Thatcherite settlement Rather than simply retell the story of British economic policymaking since World War II this book offers a theoretically informed version of events which draws upon the literatures on institutional path dependence economic constructivism and political economy to explain this puzzle It will be of great interest to both researchers and postgraduates with an interest in British economic history and the fields of political economy and economic crisis more widely *The Programming Approach and the Demise of Economics* Franco Archibugi,2019-11-20 In this book the first of three volumes Franco Archibugi sets out to create an epistemology of economics arguing for a radical overturning of the conventional analysis from a positive approach to a programming approach This overturning leads to a reappraisal of the foundations of Economics itself and to an improved integration of Economics as an autonomous discipline alongside Sociology Political Science Operational Research Social Engineering and Physical or Spatial Planning The author interrogates how scientific the social sciences really are before proposing a new scientific paradigm for the social sciences a political preference function and a general programming approach The chapters revisit hitherto neglected economists like Gunnar Myrdal Ragnar Frisch Vassili Leontief and Leif Johansen using their theory to overturn the epistemological approach of the entire science of economics Volume II explores oppositions to the traditional and conventional teaching of economics whilst Volume III presents a concrete and practical example of how to build a Planning Accounting Framework PAF as associated with Frisch s plan frame explored in Volume II to demonstrate the extent to which decisions and negotiations can be routed in the social sciences **Social, Economic and Cultural Aspects in the Dynamic Changing Process of Old Industrial Regions** Karl Eckart,2003 In the old industrial regions of the Ruhr District Germany Upper Silesia Poland and the Ostrava Region Czech Republic coal as well as iron and steel have been the economic basis for many decades In the Ruhr District important changes already started at the end of the 1950s In Upper

Silesia and in the Ostrava Region however these processes started at the end of the 1980s together with the transformation of the economic and social system in these countries Because of high unemployment steps are taken to modernize the economy and to retrain employees All three regions cannot develop out of their own strength but there are programmes in order to support this process *Business Environment Programme* Mr. Rohit Manglik,2024-04-07 EduGorilla Publication is a trusted name in the education sector committed to empowering learners with high quality study materials and resources Specializing in competitive exams and academic support EduGorilla provides comprehensive and well structured content tailored to meet the needs of students across various streams and levels **Linear Programming and Economic Analysis** Robert Dorfman,Paul A.
