Longstreth, 2000 The Buildings of Main Street is the primary resource for interpreting commercial architectural style Richard Longstreth a renowned and respected author in the field of historic preservation presents a useful survey of commercial architecture in urban America He has developed a typology of architectural classification for commercial application in American towns across the United States Likely to be enjoyed by both students and members of the general public seeking an introduction to commercial architecture The Buildings of Main Street makes a significant and lasting contribution to American architectural history Exporting American Architecture 1870-2000 Jeffrey W. Cody, 2005-06-27 The export of American architecture began in the nineteenth century as a disjointed set of personal adventures and commercial initiatives It continues today alongside the transfer of other aspects of American life and culture to most regions of the world Jeffrey Cody explains how why and where American architects planners building contractors and other actors have marketed American architecture overseas In so doing he provides a historical perspective on the diffusion of American building technologies architectural standards construction methods and planning paradigms Using previously undocumented examples and illustrations he shows how steel frame manufacturers shipped their products abroad enabling the erection of American style skyscrapers worldwide by 1900 and how this phase was followed by similar initiatives by companies manufacturing concrete components **Contemporary Issues in Branding** Pantea Foroudi, Maria Palazzo, 2019-12-06 This book provides students and academics with a comprehensive analysis of the theory and practice of branding The challenge to

explore new and effective ways of harnessing the power of communication to engage with company stakeholders in interactive immediate and innovative ways is ever present in the digital era Digital marketing and social media create opportunities for managers to communicate their brand's identity to their consumers and stakeholders Yet limited empirical research exists to elucidate these issues and less still that assists our understanding of branding issues at an international level Recognising the complexity and plurality at the heart of the branding discipline this text explores the relationship between brands identity and stakeholders Working through building designing and maintaining a brand the authors consider such aspects as strategic planning and campaign management research and measurement media relations employee communication leadership and change communication and crisis branding Critically differing methods and approaches applied to branding and communication research design are assessed including both qualitative and quantitative methods Proposing a mixture of theory and practice with international case studies this book is an invaluable companion for advanced undergraduate and postgraduate students academics of marketing and strategic brand management as well as managers and decision makers globally

Persuasive Imagery Linda M. Scott, Rajeev Batra, 2003-04-02 This volume synthesizes and advances existing knowledge of consumer response to visuals Representing an interdisciplinary perspective contributors include scholars from the disciplines of communication psychology and marketing The book begins with an overview section intended to situate the reader in the discourse The overview describes the state of knowledge in both academic research and actual practice and provides concrete sources for scholars to pursue Written in a non technical language this volume is divided into four sections Image and Response illustrates the difficulty encountered even in investigating the basic influences processes and effects of mere exposure to imagery Image and Word presents instances in which the line between words and pictures is blurred such as the corporate logo which is often pictorial in nature but communicates on an abstract level usually attributed to words Image and the Ad contributes to our appreciation for the exquisite variations among advertising texts and the resultant variability in response not only to different ads but among different viewers of the same ad Image and Object carries the inquiry of visual response over the bridge toward object interaction Having traveled a path that has gone from the precise working of the brain in processing visual stimuli all the way to the history of classical architecture readers of this volume will have a new respect for the complexity of human visual response and the research that is trying to explain it It will be of interest to those involved in consumer behavior consumer psychology advertising marketing and visual communication

Monuments to Money Charles Belfoure, 2005 With more than 200 photographs and illustrations this work studies the evolution of American bank architecture from 1781 to new banks of the present day It explores how and why the classically inspired structures built in late 18th century America embodying strength and trust evolved into the essentially anonymous bank buildings of today Provided by publisher

A History of Architecture and Urbanism in the Americas Clare Cardinal-Pett, 2015-11-19 A History of Architecture and Urbanism in the Americas is the first comprehensive survey to

narrate the urbanization of the Western Hemisphere from the Arctic Circle to Antarctica making it a vital resource to help you understand the built environment in this part of the world The book combines the latest scholarship about the indigenous past with an environmental history approach covering issues of climate geology and biology so that you ll see the relationship between urban and rural in a new more inclusive way Author Clare Cardinal Pett tells the story chronologically from the earliest known human migrations into the Americas to the 1930s to reveal information and insights that weave across time and place so that you can develop a complex and nuanced understanding of human made landscape forms patterns of urbanization and associated building typologies Each chapter addresses developments throughout the hemisphere and includes information from various disciplines original artwork and historical photographs of everyday life which along with numerous maps diagrams and traditional building photographs will train your eye to see the built environment as you read about it

Building in China Jeffrey W Cody, 2021-01-15 Building in China is about striking an architectural balance between the pull of monumental tradition and the push of technological novelty Centering on the dynamic period of post imperial and pre Communist China the book focuses on the building and city planning initiatives of Henry Murphy a little known American architect who initially ventured to China in 1914 to design a campus for the Yale in China programme but who then found himself captivated by a professional and cultural challenge that lasted two decades how to preserve China s rich architectural traditions while also designing new buildings using up to date Western technologies Murphy s buildings were compromises wine in old bottles as he once called them and the book uses those tles as lenses through which to understand not only Murphy s quest to find a middle ground for his architecture in China but also to gaze at a tumultuous society facing an uncertain future Murphy s buildings were more than vessels for either aesthetic visions or technical expertise inadvertently they became political emblems as Chinese rulers such as Chiang Kai shek and Sun Yat sen s son called on Murphy for city planning advice to complement their hopes for urban reconstruction There are few serious studies of Western architects in the twentieth century who practiced in non Western contexts and those scant studies that have been published concentrate largely on British French or Dutch examples in colonial settings Hence the book makes significant contributions to the fields of both American and Chinese architectural history

Architecture as Communication Ross A. Eaman, 2025-04-08 Media theory has long overlooked the built environment and its communicative capacity how built structures and spaces convey meaning through material embodiment and symbolization Architecture as Communication advances the idea that built environments function as media of communication Using practice theory in conjunction with the concept of style this book is anchored in three historical determinants the quest for perfect proportion in buildings the belief in architectural determinism and the ongoing efforts within other media to influence how those who experience built environments understand them Ross Eaman explores how houses schools places of worship factories office buildings stores malls opera houses plazas and parks have meaning for people as subjective life worlds Architecture as Communication

proposes media theory that articulates the social construction of meaning as a unique way of understanding the built environment one in which the users and observers of structures and spaces participate along with architects and designers Architecture according to Eaman encompasses the multiplicity of communication as human interaction preparing people for what they are about to encounter signalling how they should act and selectively enabling them to perform their expected role Using examples across many historical periods and cultures Architecture as Communication argues that we judge our built environments by the values they communicate

Money of the Mind James Grant, 1994-05 The 1980s witnessed a lemming like rush into the sea of debt on the part of the American industrial and financial communities with consequences we are only beginning to appreciate But the speculative frenzy of the eighties didn't just happen It was the culmination of a long cycle of slow relaxation of credit practices the subject of James Grant's brilliant clear eyed history of American finance Two long running trends converged in the 1980s to create one of our greatest speculative booms the democratization of credit and the socialization of risk At the turn of the century it was almost impossible for the average working person to get a loan In the 1980s it was almost impossible to refuse one As the pace of lending grew the government undertook to bear more and more of the creditors risk a pattern begun in the Progressive era which reached full flower in the conservative administration of Ronald Reagan Based on original scholarship as well as firsthand observation Grant's book puts our recent love affair with debt in an entirely fresh often chilling perspective The result is required and wickedly entertaining reading for everyone who wants or needs to understand how the world really works A brilliantly eccentric kaleidoscopic tour of our credit lunacy A splendid tooth gnashing saga that should be savored for its ghoulish humor and passionately debated for its iconoclastic analysis It is a fitting epitaph to the credit binge of the 80s Ron Chernow *The Wall Street Journal*

New Ways of Working Nathalie Mitev, Jeremy Aroles, Kathleen A. Stephenson, Julien Malaurent, 2021-02-22 This volume focuses on new ways of working and explores implications of these new practices with a particular emphasis on the place occupied by technology materiality and bodies within contemporary working configurations It draws together an international range of scholars to examine diverse subjects such as the gig economy social media as a work space the role of materiality in living labs managerial techniques and organizational legitimacy Drawing on global perspectives from France to Nigeria this book presents a fascinating examination of the many new ways people are working and relating to their work Part of the esteemed Technology Work and Globalization series this

book is valuable reading for scholars working on organizational studies ethnography technology management and management more generally *Trust in Troubled Times* Brett Sheehan, 2003 This timely book traces the development of banking and paper money in republican Tianjin in order to explore the creation of social trust in financial institutions Framing the study around Bian Baimei a conscientious branch manager of the Bank of China Brett Sheehan analyzes the actions of bankers officials and local elites as they tried to overcome political and financial crises and instill trust in the banking system After early failures in promoting trust government authority as a regulator of the financial system gradually increased peaking in 1935 when the state unified the money supply for the first time in several hundred years Concurrently when local elites proved unable to develop successful strategies to make people trust the system their influence declined The need for trust in increasingly complex financial arrangements redefined state society relations simultaneously enhancing state power and creating new constraints on the actions of both elites and governments *Trust in Troubled Times* is a valuable new perspective on the economic social and political history of modern China
