The Emperor's Embrace Jeffrey Masson, 2001-02-28 Jeffrey Moussaieff Masson's marvelous Jane Goodall New York Times bestseller When Elephants Weep made us re-evaluate the emotional lives of animals. And in his follow-up New York Times bestseller Dogs Never Lie About Love Masson reflected with intelligence and originality. Los Angeles Times Sunday Book Review on the emotional world of dogs. Now in The Emperor's Embrace Masson offers a remarkable look at one of the most fulfilling roles in the animal world: fatherhood. With fascinating insight, impeccable research and captivating writing, controversial psychoanalyst Jeffrey Masson, a new father himself, introduces us to the world's best dads. He takes us to such places as Antarctica as he explores how emperor penguin fathers incubate the eggs of their young by carrying them around on their feet for two months, nestled beneath a special brood pouch. And he tells us how, once the babies hatch, the fathers snuggle the babies on their feet until the mother returns from her time at sea feeding them a special milk-like substance until her arrival. Masson, a superb storyteller, showcases the extraordinary behavior of outstanding fathers/heroes among animals, including the wolf and why wolves make good fathers and dogs don't. The beaver who encourages his young to cling to his tail as he navigates through ponds; the sea horse, the only male animal that gives birth to its young; the marmoset, the South American monkey who carries his babies for the first two years of their lives wherever he goes. Masson also examines nature's worst fathers: lions, langurs, bears, and humans. He shows that when a father does care for his young, as with the beaver, we immediately look for a biological and not an emotional explanation. But Masson demonstrates that for these animals, as with humans, fatherhood is a profound, all-encompassing experience. Groundbreaking, compelling, inspirational. Masson's unique look at one of nature's most venerable institutions takes us to animal habitats around the world yet always returns to the heart. For animal lovers, fathers, mothers, sons, and daughters everywhere. The Emperor's Embrace is a book that will forever change our perceptions of parenthood and family love.

When Elephants Weep Jeffrey Moussaieff Masson, 2009-10-21 This national bestseller exploring the complex emotional lives of animals was hailed as

a masterpiece by Elizabeth Marshall Thomas and as marvelous by Jane Goodall The popularity of When Elephants Weep has swept the nation as author Jeffrey Masson appeared on Dateline NBC Good Morning America and was profiled in People for his ground breaking and fascinating study Not since Darwin s The Expression of Emotions in Man and Animals has a book so thoroughly and effectively explored the full range of emotions that exist throughout the animal kingdom From dancing squirrels to bashful gorillas to spiteful killer whales Masson and coauthor Susan McCarthy bring forth fascinating anecdotes and illuminating insights that offer powerful proof of the existence of animal emotion Chapters on love joy anger fear shame compassion and loneliness are framed by a provocative re evaluation of how we treat animals from hunting and eating them to scientific experimentation Forming a complete and compelling picture of the inner lives of animals When Elephants Weep assures that we will never look at animals in the same way again Animal Traditions Eytan Avital,Eva Jablonka,2000-11-23

Animal Traditions maintains that the assumption that the selection of genes supplies both a sufficient explanation of the evolution and a true description of its course is despite its almost universal acclaim wrong Eytan Avital and Eva Jablonka contend that evolutionary explanations must take into account the well established fact that in mammals and birds the transfer of learnt information is both ubiquitous and indispensable The introduction of the behavioural inheritance system into the Darwinian explanatory scheme enables the authors to offer new interpretations for common behaviours such as maternal behaviours behavioural conflicts within families adoption and helping This approach offers a richer view of heredity and evolution integrates developmental and evolutionary processes suggests new lines for research and provides a constructive alternative to both the selfish gene and meme views of the world It will make stimulating reading for all those interested in evolutionary biology sociobiology behavioural ecology and psychology **Environmentalism and Cultural Theory** Kay Milton,2002-09-11 The last decade has seen a dramatic increase in the attention paid by social scientists to environmental issues and a gradual acknowledgement in the wider community of the role of social science in the public debate on sustainability At the same time the concept of culture once the property of anthropologists has gained wide currency among social scientist These trends have taken place against a growing perception among specialist and public of the global nature of contemporary issues This book shows how an understanding of culture can throw light on the way environmental issues are perceived and interpreted both by local communities and within the contemporary global arena Taking an anthropological approach the book examines the relationship between human culture and human ecology and considers how a cultural approach to the study of environmental issues differs from other established approaches in social science This book adds significantly to our understanding of environmentalism as a contemporary phenomenon by demonstrating the distinctive contribution of social and cultural anthropology to the environmental debate It will be of particular interest to students and researchers in the fields of social science and the environment Environmental Science Theory W.T. de Groot,1992-10-22 Having no competitive works this unique publication presents a single structure for the

analysis explanation and solution of environmental problems regardless of their location nature or scale In this problem oriented approach a coherent framework interconnects the study of facts and values environmental systems social causes and ethical premises Counterbalancing current biases the author emphasizes the fundamental normative economic and social scientific aspects of truly interdisciplinary environmental science For instance the normative side of environmental problems are often neglected resulting in policy designs and evaluations containing inefficient mixtures of sophisticated models and poorly grounded normative premises this is the first major study to enrich the field with more normative consistency and groundedness It is also the first text to consistently identify the social causes of environmental problems rather than focusing on the physical scientific aspects and thus design deeper and more effective policies Furthermore a tinge of post modern thinking runs throughout the book with special care being taken however to constantly keep in view the practical relevance of theory for problem oriented work The book will be of interest to environmental scientists and managers wishing to improve the consistency and depth of their work to social scientists and geographers wishing to connect their discipline to the environmental problems field and to general scientists interested in the connections between philosophy and practice

In Quest of the Sacred Baboon Hans Kummer, 2017-03-14 In a tale that begins at a zoo in Zurich and takes us across the deserts of Ethiopia to the Asir Mountains in Saudi Arabia Hans Kummer recreates the adventure and intellectual thrill of the early days of field research on primates Just as Jane Goodall and Dian Fossey introduced readers to the fascinating lives of chimpanzees and gorillas Kummer brings us face to face with the Hamadryas baboon With their furry white mantles and gleaming red hindquarters the Hamadryas appear frequently in the art of the ancient Egyptians who may have interpreted the baboons early morning grooming rituals as sun worshiping rites Back then Hamadryas were thought to be incarnates of Thoth the god of wisdom today they are considered to have one of the most highly structured social systems among primates very close in some respects to that of humans In the 1960s Kummer after conflicts with nomadic warriors managed to track down these elusive baboons near the Danakil Desert and then followed them from dawn to dusk on their treks from one feeding place to another His scientific account of this period reads like a travel memoir as he describes his encounters with the Hamadryas and the people with whom they share the desert Winding his way through cliffs and stubble Kummer records the baboons social life from the development of pair relationships to the way an entire group decides where to march each day Much like the human nomads who cope with the harsh demands of the desert environment the Hamadryas maintain a society that is strict and patriarchal in its details but multilayered and flexible in its largest units We learn for example of the Hamadryas respect for possession that protects family structure and of the cohesion among family leaders that lessens the threat of battle At the same time clear cut personalities emerge from Kummer's account drawing us into the life stories and power struggles of individual baboons Whereas this rich detail holds many implications for natural scientists the colorful way it comes to life makes for a compelling book bound to entertain and educate all readers Originally published in 1995 The

Weir of West Point, New York, ran away to sea, where he spent the next ten years of his life. Assuming the pseudonym Robert Wallace Weir, he sailed aboard the bark *Clara Bell* out of New Bedford, Massachusetts, in 1855 for a voyage to the whaling grounds of the Atlantic and Indian Oceans. Upon the death of one of the *Clara Bell*'s boatsteerers/harpooners, Weir was promoted to this position of great responsibility. Recording daily events aboard the *Clara Bell* over the course of nearly three years, from 1855 to 1858, Weir's journal vividly relates the whaleman's life, both in prose and in detailed hand-drawn illustrations. This is a timeless account of life on a nineteenth-century whaler, from the misery of seasickness and the rigors of sea voyages to the thrill and violence of whale hunts, to the sights, sounds, and foods of foreign cultures. The Weir journal is a staff favorite at Mystic Seaport Museum for its compelling story, beautiful illustrations, and immaculate penmanship.

forces us to consider its lessons Like a fairy tale Hannibal plays with time and reality and teaches its audience about their world and how to survive in it From the show the audience learns both the importance and the danger of family and friends the complicated nature of humanity containing the capability for good and evil and the arbitrariness of society's definitions and taboos As a fairy tale it draws its viewers in and encourages them not only to come back time and again but to retell and even add to the story
