*Handbook of Africa's International Relations* Tim Murithi, 2013-09-05 Africa s international relations have often been defined and oriented by the dominant international and geopolitical agendas of the day In the aftermath of colonialism the Cold War became a dominant paradigm that defined the nature of the continent s relationship with the rest of the world The contemporary forces of globalization are now exerting an undue influence and impact upon Africa s international relations Increasingly the African continent is emerging as a vocal and in some respects an influential actor in international relations There is a paucity of analysis and research on this emerging trend This timely book proposes to fill this analytical gap by engaging with a wide range of issues with chapters written by experts on a variety of themes The emerging political prominence of the African continent on the world stage is predicated on an evolving internal process of continental integration In particular there are normative and policy efforts to revive the spirit of Pan Africanism the 21st century is witnessing the evolution of Pan Africanism notably through the constitution and establishment of the African Union AU Given the fact that there is a dearth of analysis on this phenomemon this volume will also interrogate the notion of Pan Africanism through various lenses notably peace and security development the environment and trade The volume will also engage with the emerging role of the AU as an international actor e g with regard to its role in the reform of the United Nations Security Council climate change the International Criminal Court ICC the treaty establishing Africa as a nuclear free zone Internally Displaced Persons the Millennium Development Goals MDGs international trade the environment public health issues security and development issues This book will assess how the AU s role as an international actor is complicated by the difficulty of promoting consensus among African states and then maintaining that consensus in the face of often divergent national interests This book will in part assess the role of the AU in articulating collective and joint policies and in making interventions in international decision and policy making circles The Handbook will also assess the role of African social movements and their relationship with global actors The role of African citizens in ameliorating their own conditions is often underplayed in the international relations discourse and this volume will seek to redress this oversight Throughout the book the various chapters will also assess the role that these citizen linkages have contributed towards continental integration and in confronting the challenges of globalization

**Human Rights** Albert A. Zinnos,2007 Human rights refers to the concept of human beings as having universal rights or status regardless of legal jurisdiction and likewise other localising factors such as ethnicity and nationality For many the concept of human rights is based in religious principles However because a formal concept of human rights has not been universally accepted the term has some degree of variance between its use in different local jurisdictions difference in both meaningful substance as well as in protocols for and styles of application Ultimately the most general meaning of the term is one which can only apply universally and hence the term human rights is often itself an appeal to such transcended principles without basing such on existing legal concepts The term humanism refers to the developing doctrine of such universally applicable values and it is on the basic concept that human beings have innate rights that more specific local legal concepts are often based Within particular societies human rights refers to standards of behaviour as accepted within their respective legal systems regarding 1 the well being of individuals 2 the freedom and autonomy of individuals and 3 the representation of the human interest in government These rights commonly include the right to life the right to an adequate standard of living the prohibition of genocide freedom from torture and other mistreatment freedom of expression freedom of movement the right to self determination the right to education and the right to participation in cultural and political life These norms are based on the legal and political traditions of United Nations member states and are incorporated into international human rights instruments This new book brings together the latest book literature centred on this crucial topic
