*International Human Rights Monitoring Mechanisms* Gudmundur Alfredsson, Jonas Grimheden, Bertrand G. Ramcharan, 2009 This revised and updated collection is intended to serve as a thematic textbook on the institutions and procedures devoted to the national implementation of human rights and to the international monitoring of State performance. Although not exhaustive, the coverage extends to most of the monitoring instances available at intergovernmental and non-governmental organizations: complaints, fact-finding and investigative procedures, State reporting obligations, good offices actions, dialogue functions, human rights education, dissemination of human rights information, letter campaigns and technical co-operation. The target audience of the book is students of international human rights law, but the book can also serve as a guide for both officials and activists involved in the realization of human rights. The success of the first edition has allowed for this second edition. It demonstrates that there is an important demand for literature with a focus on human rights monitoring and follow-up activities.

Human Rights: International Protection, Monitoring, Enforcement Janusz Symonides, 2017-09-29 The series of volumes prepared by UNESCO for teaching human rights at higher education level comes to a successful conclusion with the publication of this volume. Human Rights International Protection Monitoring Enforcement takes an institutional approach to the international protection of human rights, examining first the United Nations system which may be seen as universal and then analysing regional systems of protection. An indispensable source of information on the protection of human rights, the volume can also be employed as a practical guide to the use of existing procedures in the defence of human rights.

**International Monitoring of Plebiscites, Referenda and National Elections** Yves Beigbeder, 2021-10-18 International monitoring of plebiscites referenda and national elections has given a guarantee to the populations and the countries directly involved and to the international community that the people themselves have been able to exercise freely their right to self determination through these processes By focusing international attention on an internal electoral process international monitoring may deter fraud by government armed forces or electoral authorities It shows international support for democracy and elections as well as for human rights While the international monitoring of elections does not guarantee that a dictatorship will evolve peacefully into a pluralist democracy free and periodic elections are an essential prerequisite to the creation and maintenance of democracy which is itself a prerequisite for the protection and promotion of human rights The United Nations and other international organizations and groups are openly supporting the world s evolution towards democracy This book will be of great use for those who are actively involved in international monitoring as well as for researchers in the field of democracy and human rights

*Economic and Social Rights and the Maintenance of International Peace and Security* Claire Breen, 2017-06-14 This text comprises cutting edge research on one of the greatest global challenges the failure to address systematic economic and social exclusion and attendant violations of economic and social rights ESR as a driver of conflict The text explores what the UN s obligation to maintain international peace and security can mean when it is informed by the requirement to protect and promote ESR rights that play a crucial role in maintaining international peace and security but which are often overlooked The book considers the extent to which Security Council mandated peace operations have been informed by human rights and efforts to promote economic and social development The approach is to analyse the extent to which the Security Council has interacted with the General Assembly the Economic and Social Council as well as other Charter based mechanisms such as the Human Rights Council and its predecessor with particular reference to the role of the Special Procedure Mechanisms The role of the UN High Commissioner for Human Rights is also considered In this way the text shows that the connection between peace and security and human rights is well recognised by these organs In addition the text considers States ESR obligations stemming from the extraterritorial application of such rights in the context of peace operations Given that States obligations stemming from ESR have often been neglected the book examines how such provision could be improved using ESR grounded plans reflecting the rights to health food water education work and life The text concludes with a call to reimagine what international peace and security can look like when it is informed by the need to recognise the emergence of post conflict legal obligations based on broader concepts of international peace and security that

draw from ESR This text will appeal to legal scholars policy advisors members of the military those working in the area of development NGOs and final year undergraduate and or postgraduate students working in the areas of international law political science and international relations and associated fields of research
