Travel and Home in Homer's Odyssey and Contemporary Literature Carol Dougherty, 2019-06-20 Travel and Home in Homer s Odyssey and Contemporary Literature brings Homer s Odyssey together with contemporary literary texts ranging from Rebecca West s The Return of the Soldier to Marilynne Robinson s Housekeeping and Cormac McCarthy s The Road to produce new readings that reframe reorient and ultimately revise aspects of Homer s iconic story of travel and home While some novels share with the Odyssey a celebration of the creative process of improvisation to rethink the relationship between home and travel others draw upon nostalgia our complicated longing for home to unsettle the inevitability of return Rather than offering an explicit retelling of Homer s poem each of these novels prompts us to revisit the relationship between travel and home that Odysseus and Penelope embody to ask new questions of that well read text Does travel reinforce or destabilize our notion of home Are mobility and domesticity irrevocably gendered or can we imagine a world in which Penelope travels and Odysseus stays home Just as Odysseus continually reinvents his own identity with each new encounter both abroad and at home so too we as readers participate in an improvisatory interpretive experiment of our own This volume sets out a new model for reading ancient and contemporary texts together one that challenges the conventional chronological assumptions inherent in many works of classical reception No longer a stable text to which we as readers return time and again to find it the same the Odyssey together with the novels with which it engages changes and adapts with each new literary encounter

Deceitful Media Simone Natale,2021-03-03 Artificial intelligence AI is often discussed as something extraordinary a dream or a nightmare that awakens metaphysical questions on human life Yet far from a distant technology of the future the true power of AI lies in its subtle revolution of ordinary life From voice assistants like Siri to natural language processors AI technologies use cultural biases and modern psychology to fit specific characteristics of how users perceive and navigate the external world thereby projecting the illusion of intelligence Integrating media studies science and technology studies and social psychology Deceitful Media examines the rise of artificial intelligence throughout history and exposes the very human fallacies behind this technology Focusing specifically on communicative AIs Natale argues that what we call AI is not a form of intelligence but rather a reflection of the human user Using the term banal deception he reveals that deception forms the basis of all human computer interactions rooted in AI technologies as technologies like voice assistants utilize the dynamics of projection and stereotyping as a means for aligning with our existing habits and social conventions By exploiting the human instinct to connect AI reveals our collective vulnerabilities to deception showing that what machines are primarily changing is not other technology but ourselves as humans Deceitful Media illustrates how AI has continued a tradition of technologies that mobilize our liability to deception and shows that only by better understanding our vulnerabilities to deception can we become more sophisticated consumers of interactive media
