## **Monkeys In The Dark:**

**Monkeys in the Dark** Blanche D'Alpuget, 1982      New World Monkeys Melissa Stewart, 2007-01-01 Introduces several varieties of New World monkeys the monkeys of Central and South America discussing their physical and social characteristics their habitats their diets and the fact that the destruction of the rain forests is putting many varieties on the endangered species list      **Everything's Coming Up Sock Monkeys!** Bonnie Kraus Connelly, 2007-03 Fascinated with the sock monkey since childhood Bonnie Kraus Connelly a 30 year professional graphic artist illustrator and business owner has spent the last decade developing a catalog of childrens stories illustrations graphics and products built around this time worn folk art toy Motivated to find artists with like interest and to discover all the sock monkey products available for a dream store art gallery she wants to build the idea for book **Everything's Coming Up Sock Monkeys** was born **Everything's Coming Up Sock Monkeys** is a new publication from the art studio of In My Own Dream Publishing It is a coffee table art book cataloging the Art History and Business of the American Sock Monkey Volume 1 As a true celebration of creativity it features over 80 contributors artists photographers collectors museum and gallery exhibits vintage and non typical monkey makers published books comics craft magazines businesses and more of the humbly famed sock monkey Enhancing the sock monkeys creative collective life this is a Good for All book if ever there was      **This and That** Emily Carr, 2011-02-01 Once available and appreciated only by researchers these stories remained buried in the British Columbia Archives until 2007 Finally readers are given a new glimpse into Emily Carr s life with this collection Carr began to write these stories in the last two years of her life She wrote of the project they are too small each to be taken singly but each complete in itself serves to ornament life which would be a drab affair without the little things we do not even notice or think of at the time but which old age memory magnifies This collection illuminates her life and is available to all in **This and That The Lost Stories of Emily Carr** Enter Emily s world with stories like **Father s Temper** **The First Snow** and **Smoking with the Cow** stories in which she reveals details of her family life school days her fascination with nature animals she loved and how she learned to smoke      Handbook of Squirrel Monkey Research C.L. Coe, Leonard A. Rosenblum, 2012-12-06 As the editors of the first book on the squirrel monkey prophesied in 1968 there has been an incredible expansion in primate research during the past 16 years Their projection that the squirrel monkey would play an increasingly important role in this research effort has also come to be true during the ensuing years One inadvertent result of the rapid growth however is that it has become more and more difficult for investigators to keep track of new information both in their own disciplines and in related fields For scientists who study and use the squirrel monkey in research this problem is particularly pronounced because articles are often published in specialized and disparate journals We felt that a new synthesis of the vast amount of information on Saimiri would resolve this problem and would provide an extremely valuable companion volume to the first book The idea grew out of a small symposium held at the IX Congress of the International Primatological Society in Atlanta Georgia during August

1982 Following the format of The Squirrel Monkey additional authors were invited to discuss advances in areas which had experienced exceptional growth or to review basic information that would be of practical value to future researchers Even with focused topics and synthetic reviews the wealth of new data resulted in many long manuscripts In response to the continuing problems with Saimiri nomenclature Richard Thorington has provided us with a definitive statement on squirrel monkey taxonomy

**Aotus: The Owl Monkey** Janet F. Baer, Richard E. Weller, Ibulaimu Kakoma, 2012-12-02 This book is the first comprehensive treatment of Aotus the nocturnal New World owl monkeys often used in behavioral and biomedical studies Found in tropical forests from Nicaragua to Argentina owl monkeys have been used in laboratories as model organisms for studies of diseases like malaria and various forms of cancer as well as studies of reproductive physiology and neuroanatomical structure and function These and other recent studies of this fascinating primate are included in this new volume As the only book devoted exclusively to owl monkeys this volume is an invaluable addition to the library of anyone interested in primate biology evolution ecology and behavior Only book devoted entirely to owl monkeys Surveys issues that pertain to wild and captive populations Represents the breadth of studies that model organisms can engender

**The Parietal Cortex of Monkey and Man** J. Hyvärinen, 2012-12-06 An invitation from the Editors to contribute to Studies of Brain Functions with a monograph on the parietal lobe of fers me an opportunity to present in a concentrated form my studies on this part of the brain from a period of some what over a decade The parietal lobe notably its posterior part is a very complex neural system whose functions I have been able to study only superficially and without extensive coverage of all its parts Therefore I did not want to limit myself entirely to my own work but found the task of writing more interesting by including sections reviewing relevant literature Thus Chapter III dealing with the primary somatosensory cortex and Chapters IX X and XI concerning area 7 describe work done in my laboratory Chapter VIII describes microelectrode work on area 7 and covers both the work of my group and that of others working on this area Chapters II and IV to VII are based on closely related anatomical physiological and clinical studies performed by others and Chapter XII is a personal attempt at a synthesis of the functions of the parietal lobe Thus this monograph is neither a strict review of all important works on the parietal lobe nor is it limited only to my own studies and those of my collaborators Instead it attempts to be a balanced exposition of both aspects promoting hopefully a synthetic view of the primate parietal lobe

**Basic and Applied Aspects of Vestibular Function** J.C. Hwang, N.G. Daunton, V.J. Wilson, 1988-10-01 This volume is the compilation of the series of original articles presented at the International Symposium on Basic and Applied Aspects of Vestibular Function held in Hong Kong September 13 16 1987 in conjunction with the centenary celebration of the Faculty of Medicine University of Hong Kong The Symposium was jointly sponsored by the University of Hong Kong and the National Aeronautics and Space Administration U S A

**The Squirrel Monkey** Leonard A. Rosenblum, Robert W. Cooper, 2013-11-06 The Squirrel Monkey is devoted to the common South American squirrel monkey Saimiri sciureus In light of the growing number of squirrel

monkeys being established each year in many laboratories there appeared the need to pool existing knowledge in concise form The present volume the first of its kind on any single primate attempts to meet this need The topics that have been selected cover thoroughly areas of research in which Saimiri has been utilized This material ranges widely from taxonomy and behavioral studies through husbandry and clinical management of the species to investigations in aerospace medicine and in a number of basic biological sciences Since the problems encountered in the squirrel monkey though sometimes taking a particular form are not unique in principle the authors have attempted to provide an appropriate phylogenetic context for their material It is hoped as a result that this compendium may serve as a valuable source of information during various phases of work on other subjects of primatological and comparative biological investigation as well

**Post-Lesion Neural Plasticity** Hans Flohr, 2012-12-06 Neural networks are not rigidly wired but rather highly plastic structures the functional architecture of which can be actively reorganized in response to external or internal events Lesions of such networks induce plastic processes which in time may lead to a recovery of the initially disrupted function This type of neural plasticity is the main focus of the book which presents a broad spectrum of experimental paradigms for lesion induced plasticity as in the spinal cord the vestibular oculomotor visual and olfactory system the cerebellum and the cerebral cortex including recent methodological developments Concepts and perspectives in understanding neural plasticity are reported in reviews and original research reports and are thoroughly discussed

**Perceiving in Depth, Volume 1: Basic Mechanisms** Ian P. Howard, 2012-01-27 The three volume work Perceiving in Depth is a sequel to Binocular Vision and Stereopsis and to Seeing in Depth both by Ian P Howard and Brian J Rogers This work is much broader in scope than the previous books and includes mechanisms of depth perception by all senses including aural electrosensory organs and the somatosensory system Volume 1 reviews sensory coding psychophysical and analytic procedures and basic visual mechanisms Volume 2 reviews stereoscopic vision Volume 3 reviews all mechanisms of depth perception other than stereoscopic vision The three volumes are extensively illustrated and referenced and provide the most detailed review of all aspects of perceiving the three dimensional world Volume 1 starts with a review of the history of visual science from the ancient Greeks to the early 20th century with special attention devoted to the discovery of the principles of perspective and stereoscopic vision The first chapter also contains an account of early visual display systems such as panoramas and peepshows and the development of stereoscopes and stereophotography A chapter on the psychophysical and analytic procedures used in investigations of depth perception is followed by a chapter on sensory coding and the geometry of visual space An account of the structure and physiology of the primate visual system proceeds from the eye through the LGN to the visual cortex and higher visual centers This is followed by a review of the evolution of visual systems and of the development of the mammalian visual system in the embryonic and post natal periods with an emphasis on experience dependent neural plasticity An account of the development of perceptual functions especially depth perception is followed by a review of the

effects of early visual deprivation during the critical period of neural plasticity on amblyopia and other defects in depth perception Volume 1 ends with accounts of the accommodation mechanism of the human eye and vergence eye movements
