Hitler's Secret Weapons of Mass Destruction Michael FitzGerald, 2018-09-10 As the Nazi advance across Europe stalled Adolf Hitler repeatedly told his military advisers and inner circle that Germany possessed Wunderwaffen miracle weapons that would turn the tide and bring the Germans ultimate victory But was he simply boasting out of desperation or were the miracle weapons real Ideas that other governments considered too outrageous were funded by the Third Reich At this time German scientists and engineers led the world in the fields of aviation research rocketry and the quest for alternative sources of energy They even came perilously close to beating the British and Americans in the search to build the first atomic bomb This book describes the Nazis secret plans to produce weapons of mass destruction and shows how they almost succeeded in defeating the Allies in World War II [American Aircraft Development of the Second World War](#) William Norton, 2019-07-06 This book presents a little known aspect of America's aircraft development of World War II in emphasizing unique and non production aircraft or modifications for the purpose of research and experimentation in support of aircraft development advancing technology or meeting narrow combat needs It describes some important areas of American aviation weapons maturation under the pressure of war with emphasis on advanced technology and experimental aircraft configurations The great value of the work is illumination of little known or minimally documented projects that significantly advanced the science of aeronautics propulsion aircraft systems and ordnance but did not go into production Each chapter introduces another topic by examining the state of the art at the beginning of the war advantages pursued and results achieved during the conflict This last is the vehicle to examine the secret modifications or experiments that are little known Consequently this is an important single source for a fascinating and diverse collection of wartime efforts never before brought together under a single cover The war stories are those of military staffs engineering teams and test pilots struggling against short schedules and tight resource constraints to push the bounds of technology These epic and sometimes life threatening endeavors were as vital as actual combat operations **Hitler's Miracle Weapons: the Secret History of the Rockets and Flying Crafts of the Third Reich** Friedrich Georg, 2003 Following on from the success of volume 1 Friedrich Georg's second book in the series covers unconventional short and medium range weapons In particular this volume includes a wealth of information about the V rocket programme not just the more familiar V 1 and V 2 but special variants of these two rockets as well as later experimental craft and weaponry Following a fascinating examination of pre war efforts to build flying bombs the author examines the V 1 and V 2 projects in great detail Particular attention is paid to special variants that have previously received little coverage These include the V 2 A 4 America Rocket and V 2s designed to carry nuclear and radiological warheads The capability of the Germans to deploy such weapons is also discussed A large number of weird and wonderful projects that never left the drawing board are examined including the FR 35 V 6 V 101 Waterfall and Naval EMW A 7 rockets The fascinating final section examines German plans to utilise such rocketry against
