Turbellarian Biology Seth Tyler, 2012-12-06 Turbellarian platyhelminths or as they are known now among cladistic systematists free living Platyhelminthes comprise a widely distributed assemblage of lower worms found in marine freshwater and even occasionally in terrestrial habitats The phylum Platyhelminthes may be more widely known for its parasitic members since the major parasitic groups of the tapeworms flukes and their relatives are more speciose and have greater impact on everyday human life but the turbellarians are more diverse and as inhabitants of virtually any aquatic habitat are more widespread as well Many of the lower turbellarians are rather simple in morphology and have served as models for ancestors of the Bilateria i e the bulk of the animal phyla Others are quite complex organisms especially in the morphology of their reproductive systems which are highly specialized The majority are free living in aquatic habitats but a number of interesting parasitic and commensal species are found scattered among the higher turbellarian taxa But turbellarians are more than just taxonomic curiosities They have served as illustrative models in research on a variety of basic life processes For example their high capacity for regeneration has made them the subject of a large literature in developmental biology the occurrence of mixoploidy and other karyological oddities among turbellarians has been important in understanding evolution of the genome and the fine structure and biochemistry of the nervous system in turbellarians is revealing important principles of the organization of so called primitive neural systems

Biology of Turbellaria and some Related Flatworms Lester R.G. Cannon, 2012-12-06 Turbellaria the mainly free living flatworms and some of their parasitic relatives are among the simplest of the metazoa and as such provide ideal models for a wide range of fundamental

studies The 60 contributions to Biology of Turbellaria and some Related Flatworms cover taxonomy and phylogeny biogeography and genetics ecology and behaviour Anatomy and ultrastructure development and regeneration genes and sequences and neurophysiology Biology of Turbellaria and some Related Flatworms is the most recent compilation in the series published in Hydrobiologia since 1981 covering research on these flatworms assembled by the world's leading authorities on the group Audience These papers present the advanced student and serious researcher with up to date information on an important but often neglected group whose place in the animal kingdom demands greater attention

CBM, 2011 Overview of the Conservation of Australian Marine Invertebrates W. F. Ponder, P. A. Hutchings, Rebecca Chapman, 2002 This volume is intended to be a companion to Yen and Butcher's 1997 overview of the conservation of non marine invertebrates As with that work we see one of our major roles as addressing the perceptual and practical imbalance in the current approach to conservation and facilitating the conservation of marine invertebrates in Australia and its Exclusive Economic Zone EEZ Introduction *Thorp and Covich's Freshwater Invertebrates* Cristina Damborenea, D. Christopher Rogers, James H. Thorp, 2020-06-26 Thorp and Covich's Freshwater Invertebrates Volume 5 Keys to Neotropical and Antarctic Fauna Fourth Edition covers inland water invertebrates of the world It began with Ecology and General Biology Volume One Thorp and Rogers editors 2015 and was followed by three volumes emphasizing taxonomic keys to general invertebrates of the Nearctic 2016 neotropical hexapods 2018 and general invertebrates of the Palearctic 2019 All volumes are designed for multiple uses and levels of expertise by professionals in universities government agencies private companies and graduate and undergraduate students Includes zoogeographic coverage of the entire Neotropics from central Mexico and the Caribbean Islands to the tip of South America Provides identification keys for aquatic invertebrates to genus or species level for many groups with keys progressing from higher to lower taxonomic levels Contains terminology and morphology materials preparation and preservation and references **Interrelationships of the Platyhelminthes** D T J Littlewood, R. A. Bray, 2014-04-21 Interrelationships of the Platyhelminthes elucidates the role of the flatworms in the animal kingdom It brings together results from an international group of experts spanning many disciplines who give evidence for the phylogeny of flatworms and constituent major taxa A combined approach using traditional comparative techniques along with the modern techniques of molecular phylogeny is utilized to show that the monophyly of the phylum is not fully established and that the phylum may in fact consist of two groups the acoels and their relatives which are basal metazoans and the Rhabditophora which is a more derived group **A New Marine Triclad from the Coast of Central California (Platyhelminthes; Turbellaria)** John Joseph Holleman, 1958 *Invertebrate Reproduction & Development*, 1999 **Invertebrate Reproduction and Development**, 1998 *Invertebrate Taxonomy*, 1994 *Queensland Naturalist*, 1998 **Freshwater Triclad (Turbellaria) of North America, IX, the Genus Sphalloplana** Roman Kenk, 1977
