Lessing** Natalya Baldyga, 2018-10-26 While eighteenth-century playwright and critic Gotthold Ephraim Lessing made numerous contributions in his lifetime to the theater, the text that best documents his dynamic and shifting views on dramatic theory is also that which continues to resonate with later generations: the *Hamburg Dramaturgy* (*Hamburgische Dramaturgie* 1767/69). This collection of 104 short essays represents one of the eighteenth century's most important critical engagements with the theater and its potential to promote humanistic discourse. Lessing's essays are an immensely erudite, deeply engaged, witty, ironic, and occasionally scathing investigation of European theatrical culture, bolstered by deep analysis of Aristotelian dramatic theory and utopian visions of theater as a vehicle for human connection. This is the first complete English translation of Lessing's text with extensive annotations that place the work in its historical context. For the first time, English language readers can trace primary source references and link Lessing's observations on drama theory and performance not only to the plays he discusses but also to dramatic criticism and acting theory. This volume also includes three introductory essays that situate Lessing's work both within his historical time period and in terms of his influence on Enlightenment and post-Enlightenment theater and criticism. The newly translated *Hamburg Dramaturgy* will speak to dramatists, directors, and humanities scholars who see theater not only for entertainment but also for philosophical and political debate.      **Emilie du Châtelet between Leibniz and Newton** Ruth Hagengruber, 2011-10-29 Emilie du Châtelet was one of the most influential women philosophers of the Enlightenment. Her writings on natural philosophy, physics, and mechanics had a decisive impact on important scientific debates of the 18th century. Particularly, she took an innovative and outstanding position in the controversy between Newton and Leibniz, one of the fundamental scientific discourses of that time. The contributions in this volume focus on this Leibnizian turn. They analyze the nature and motivation of Emilie du Châtelet's synthesis of Newtonian

and Leibnizian philosophy Apart from the *Institutions Physiques* they deal with Emilie du Châtelet's annotated translation of Isaac Newton's *Principia* The chapters presented here collectively demonstrate that her work was an essential contribution to the mediation between empiricist and rationalist positions in the history of science

H. Iltner and John A. McCarthy take stock of the discipline It focuses on recurrent questions in the field of Comparative Literature What is literature What is meant by comparative Or by world What constitute transgressions or refractions What ultimately does being at home in the world imply When we combine the answers to these individual questions we might ultimately reach an intriguing proposition Comparative Literature contributes to a sense of being at home in a world that is heterogeneous and fractured rather than affirming a monolithic canon marked by territory and homogeneity The volume unites essays on world literature literature in the context of the history of ideas comparative women and gender studies aesthetics and textual analysis and literary translation and tradition

**Optimism and the Best Possible World** Justin J. Daeley, 2025-03-07 This volume presents original essays on the ideas of philosophical optimism and the best possible world It highlights the historical and philosophical nuances of an idea that remains under treated within the literature despite its long and influential history Optimism broadly the thesis that God does the best or that this is the best possible world is often associated with the philosophy of Gottfried Wilhelm Leibniz However there exists a rich tradition of philosophical optimism not only after Leibniz but before him as well The chapters in this volume address the philosophical nuances of optimism within the ancient medieval enlightenment modern and contemporary eras They cover a variety of thinkers ranging from Plato Aquinas Rousseau Voltaire Jonathan Edwards the new optimists of 19th century France and the non theistic optimists of the 20th century Optimism and the Best Possible World will be of interest to scholars and advanced students working in philosophy of religion history of philosophy religious history and intellectual history
