**Ahmes' Legacy** Marcel Danesi, 2018-08-11 This book looks at classic puzzles from the perspective of their structures and what they tell us about the brain It uses the work on the neuroscience of mathematics from Dehaene Butterworth Lakoff Neitz and many others as a lens to understand the ways in which puzzles reflect imaginative processes blended with rational ones The book is not about recreational or puzzle based mathematics in and of itself but rather about what the classic puzzles tell us about the mathematical imagination and its impact on the discipline It delves into the history of classic math puzzles deconstructing their rationale and describing their psychological features so that their nature can be fleshed out in order to help understand the mathematical mind This volume is the first monographic treatment of the

psychological nature of puzzles in mathematics With its user friendly technical level of discussion it is of interest to both general readers and those who engage in the disciplines of mathematics psychology neuroscience and or anthropology It is also ideal as a textbook source for courses in recreational mathematics or as reference material in introductory college math courses

**Hosting the Monster** Holly Lynn Baumgartner, Roger Davis, 2008 Hosting the Monster responds to the call of the monstrous with not rejection but invitation Positing the monster as that which defies classification the essays in this collection are an ongoing engagement with that which lies outside of established boundaries With chapters ranging from the monstrous mother or the deformed child to subjectivity in transition this volume is not only of interest to film and gender scholars and literary and cultural theorists but also students of popular culture or horror Its wide appeal stems from its invitation both to entertain the monster and to widen the call to and the listening for the monsters that have not yet and perhaps must not yet come calling back This sense of hospitality and non hostility is one guiding principle of this collection suggesting that the ability to survey and research the otherwise may reveal more about the subjectivity of the self through the wisdom of the other however monstrous the manifestation Holly Lynn Baumgartner is an associate professor of Humanities and English at Mercy College of Northwest Ohio Her articles have appeared in Reflections Rhizomes American Book Review and other journals Roger Davis is an instructor of English at MacEwan College in Edmonton Canada He is co author of Essay Writing for Canadian Students and his literary interests include poetry poetics and popular culture
