*Children* Frances Tustin, 2021-03-28 Frances Tustin 1913 1994 was one of the first professionally trained child  
 psychotherapists in Britain Although internationally recognised for her pioneering therapeutic work with autistic children her  
 approach is considered by some to be controversial as her psychogenic view of childhood autism challenged the belief that it  
 is biological and genetic *Autistic States in Children* is widely regarded as a vitally important work for understanding the  
 causes of autism in young children Vividly describing her clinical encounters with autistic children Tustin argued that autistic  
 states were above all self protective ones In her observational studies she noted how autistic children s interaction with  
 physical objects such as keys toy cars or other play items had a rigid and ritualistic quality far removed from the typical kind  
 of fantasy play seen in other children Such objects are not used by autistic children for their intended purpose Tustin argued  
 but rather in sensation dominated ways that interfere with mental development She also drew a fundamental distinction  
 between two autistic groups an encapsulated group which is withdrawn and non verbal and an entangled group who are  
 hyperactive and chaotic but have some language *Autistic States in Children* influenced not only those in psychotherapy and

psychoanalysis but countless others who have contact with autistic children especially families and remains essential reading for anyone seeking a creative and compelling understanding of autism This Routledge Classics edition includes a new Foreword by Maria Rhode
