provides a compelling history documentation and analysis of hate crimes committed against Navajos and Native Americans in the Four Corners **The Metamorphosis of Criminal Justice** Jacqueline S. Hodgson,2020-03-16 In The Metamorphosis of

Criminal Justice Jacqueline S Hodgson focuses on the potentially radical and fundamental changes taking place within criminal justice in Britain and in France and the ways that these are driven by wider domestic European or international concerns This metamorphosis away from established values and practices is eroding what were once regarded as core rights and freedoms in the name of efficiency security and justice to victims Beginning with a comparative analysis of adversarial and inquisitorial procedural values and traditions and an examination of broad trends in domestic and European criminal justice Hodgson then discusses how the roles of prosecution and defense have been re shaped in different ways in both jurisdictions both in the text of the law and in their practices The final section considers how systems within different

procedural traditions adapt to address or provide a remedy for systemic flaws that produce wrongful convictions and in particular the role of the defense in these procedures By adopting an empirical and comparative approach this book explores the nature and reach of these trends and the ways that they challenge and disrupt criminal processes and values **The Lower Criminal Courts** Alisa Smith, Sean Maddan, 2019-05-22 This book explores misdemeanor courts in the United States by focusing on the processing of misdemeanor crimes and the resultant consequences of conviction such as loss of employment and housing the imposition of significant fines and loss of liberty all amounting to the criminalization of poverty that happens in many U S misdemeanor courts A major concern is the lack of due process employed in lower courts Although the seminal case of Gideon v Wainwright required the appointment of counsel to individuals too poor to hire counsel in felony cases it was not until 1967 when the President's Commission on Law Enforcement and Administration of Justice found a crisis in the lower courts that the Supreme Court extended the right to counsel to some though not all prosecutions of misdemeanor offenses The first step to improving our understanding of the lower courts is a concerted effort by scholars to focus on the processing and outcomes of misdemeanor cases This collection begins to fill the void by providing a comprehensive review of the scholarly work on the lower courts in the United States Collecting analysis from key academics engaged in work in this area today the book reviews the varying specialized lower criminal courts including specialty courts that have emerged in just the last couple of decades along with discussions of the history legal challenges operation primary actors judges prosecutors defense counsel and defendants and current research on these courts The book explores the profound consequences misdemeanor processing has for defendants and discusses the future of the lower criminal courts and offers best practices to improve them The Lower Criminal Courts is essential for scholars and undergraduate and graduate students in criminology sociology justice studies pre law legal studies political science and social work and it is also useful as a resource providing legal practitioners with important information highlighting the significance of consequences of misdemeanor arrests detentions and adjudications Reforming Juvenile Justice National Research Council, Division of Behavioral and Social Sciences and Education, Committee on Law and Justice, Committee on Assessing Juvenile Justice Reform, 2013-06-22 Adolescence is a distinct yet transient period of development between childhood and adulthood characterized by increased experimentation and risk taking a tendency to discount long term consequences and heightened sensitivity to peers and other social influences A key function of adolescence is developing an integrated sense of self including individualization separation from parents and personal identity Experimentation and novelty seeking behavior such as alcohol and drug use unsafe sex and reckless driving are thought to serve a number of adaptive functions despite their risks Research indicates that for most youth the period of risky experimentation does not extend beyond adolescence ceasing as identity becomes settled with maturity Much adolescent involvement in criminal activity is part of the normal developmental process of identity formation and most adolescents will mature out of these tendencies Evidence of significant

changes in brain structure and function during adolescence strongly suggests that these cognitive tendencies characteristic of adolescents are associated with biological immaturity of the brain and with an imbalance among developing brain systems. This imbalance model implies dual systems: one involved in cognitive and behavioral control and one involved in socio-emotional processes. Accordingly, adolescents lack mature capacity for self-regulations because the brain system that influences pleasure seeking and emotional reactivity develops more rapidly than the brain system that supports self control. This knowledge of adolescent development has underscored important differences between adults and adolescents with direct bearing on the design and operation of the justice system, raising doubts about the core assumptions driving the criminalization of juvenile justice policy in the late decades of the 20th century. It was in this context that the Office of Juvenile Justice and Delinquency Prevention (OJJDP) asked the National Research Council to convene a committee to conduct a study of juvenile justice reform. The goal of Reforming Juvenile Justice: A Developmental Approach was to review recent advances in behavioral and neuroscience research and draw out the implications of this knowledge for juvenile justice reform, to assess the new generation of reform activities occurring in the United States and to assess the performance of OJJDP in carrying out its statutory mission as well as its potential role in supporting scientifically based reform efforts.

*Archaeological Perspectives on Warfare on the Great Plains* Andrew Clark, Douglas Bamforth, 2018-05-15. The Great Plains has been central to academic and popular visions of Native American warfare largely because the region's well-documented violence was so central to the expansion of Euroamerican settlement. However, social violence has deep roots on the Plains beyond this post-Contact perception, and these roots have not been systematically examined through archaeology before. War was part and perhaps an important part of the process of ethnogenesis that helped to define tribal societies in the region and it affected many other aspects of human lives there. In *Archaeological Perspectives on Warfare on the Great Plains*, anthropologists who study sites across the Plains critically examine regional themes of warfare from pre-Contact and post-Contact periods and assess how war shaped human societies of the region. Contributors to this volume offer a bird's-eye view of warfare on the Great Plains, consider artistic evidence of the role of war in the lives of indigenous hunter-gatherers on the Plains prior to and during the period of Euroamerican expansion, provide archaeological discussions of fortification design and its implications, and offer archaeological and other information on the larger implications of war in human history. Bringing together research from across the region, this volume provides unprecedented evidence of the effects of war on tribal societies. *Archaeological Perspectives on Warfare on the Great Plains* is a valuable primer for regional warfare studies and the archaeology of the Great Plains as a whole. Critical Perspectives on the Western Lee Broughton, 2016-09-19. For decades

the Western film has been considered a dying breed of cinema yet filmmakers from Quentin Tarantino to Ethan and Joel Coen find new ways to reinvigorate the genre As Westerns continue to be produced for contemporary audiences scholars have taken a renewed interest in the relevance of this enduring genre In *Critical Perspectives on the Western From A Fistful of Dollars to Django Unchained* Lee Broughton has compiled a wide ranging collection of essays that look at various forms of the genre on both the large and small screen Contributors to this volume consider themes and subgenres celebrities and authors recent idiosyncratic engagements with the genre and the international Western These essays also explore issues of race and gender in the various films discussed as well as within the film genre as a whole Among the films and television programs discussed in this volume are *The Assassination of Jesse James by the Coward Robert Ford* *Django Kill Justified* *Meek's Cutoff* *Tears of the Black Tiger* *Appaloosa* *The Frozen Limits* and *Red Harvest* Featuring a diverse selection of chapters that represent current thinking on the Western *Critical Perspectives on the Western* will appeal to fans of the genre film students and scholars alike
