**Neighborhood Poverty** Jeanne Brooks-Gunn, Greg Duncan, J. Lawrence Aber, 1997-11-13 Perhaps the most alarming phenomenon in American cities has been the transformation of many neighborhoods into isolated ghettos where poverty is the norm and violent crime drug use out of wedlock births and soaring school dropout rates are rampant Public concern over these destitute areas has focused on their most vulnerable inhabitants children and adolescents How profoundly does neighborhood poverty endanger their well being and development Is the influence of neighborhood more powerful than that of the family *Neighborhood Poverty* approaches these questions with an insightful and wide ranging investigation into the effect of community poverty on children's physical health cognitive and verbal abilities educational attainment and social

adjustment This two volume set offers the most current research and analysis from experts in the fields of child development social psychology sociology and economics Drawing from national and city based sources Volume I reports the empirical evidence concerning the relationship between children and community As the essays demonstrate poverty entails a host of problems that affects the quality of educational recreational and child care services Poor neighborhoods usually share other negative features particularly racial segregation and a preponderance of single mother families that may adversely affect children Yet children are not equally susceptible to the pitfalls of deprived communities Neighborhood has different effects depending on a child s age race and gender while parenting techniques and a family s degree of community involvement also serve as mitigating factors Volume II incorporates empirical data on neighborhood poverty into discussions of policy and program development The contributors point to promising community initiatives and suggest methods to strengthen neighborhood based service programs for children Several essays analyze the conceptual and methodological issues surrounding the measurement of neighborhood characteristics These essays focus on the need to expand scientific insight into urban poverty by drawing on broader pools of ethnographic epidemiological and quantitative data Volume II explores the possibilities for a richer and more well rounded understanding of neighborhood and poverty issues To grasp the human cost of poverty we must clearly understand how living in distressed neighborhoods impairs children s ability to function at every level Neighborhood Poverty explores the multiple and complex paths between community family and childhood development These two volumes provide an indispensable guide for social policy and demonstrate the power of interdisciplinary social science to probe complex social issues

Victor Turner's symbolic anthropology serves as cultural mediators combining geometric symbology with a unique narrative perspective to offer metaphors of personal and cultural boundaries. Freidman presents the literary text as the point of intersection among such disciplines as cultural anthropology, history, mathematics, and American literature. **Masters of Animals** Anne Chapman, 1992. Anthropologist and filmmaker Chapman Centre National de la Recherche Scientifique Paris describes the distinctive tales and beliefs of a native people who have maintained their traditional life in the tropical forests of central Honduras as related by one member. Accessible to general readers. Translated from *Enfants de la Mort* 1978. Paper edition, unseen. 17. Annotation copyright by Book News Inc. Portland, OR. *Ritual, Myth and the Modernist Text* Martha Carpentier, 2013-12-19. First Published in 1998. Volume 12 in the Library of Anthropology series. This text traces the influence of Jane Ellen Harrison, a brilliant classicist and one of the Cambridge Anthropologists on James Joyce, T. S. Eliot, and Virginia Woolf. Decade of critical overemphasis on Sir James Frazer's influence on modernism have obscured the more important contributions of Harrison who explored the chthonic Greek matriarchal cults prior to patriarchal Olympianism and originated the ritual theory finding the origins of Greek drama and ultimately of all art in religious ritual. Harrison's images of matriarchal divinity and the feminist principles they embodied inspired these modernist writers to envision the young artist reborn as creator through symbolic union with the semiotic body. **Someone To Lend a Helping Hand** D. Shenk, 2014-04-08. By providing descriptions of the experiences of thirty rural Minnesota women often in their own words, this timely and topical book examines the expectations, beliefs, and values of the women as they grow old in rural America. A lifecourse perspective fosters a better understanding of the aging process in terms of an individual's life experiences within the context of a cultural environment. To show how various elements shaped the women's lives in later years and to give the fullest possible descriptions, the study combines both qualitative and quantitative research of the rural elderly in Minnesota. Through their stories, the women stress the cultural, familial, and personal issues that continue to be important to them as they age. They explore the elements of continuity as well as those of change as a part of the lifecourse. Also detailed are their insights and experiences concerning interactions with different formal and informal support networks as well as the more general topics. *Religion, Diaspora and Cultural Identity* J.W. Pulis, 2014-01-02. Although the religions of the Caribbean have been a subject of popular media, there have been few ethnographic publications. This text is a much needed and long overdue addition to Caribbean studies and the exploration of ideas, beliefs, and religious practices of Caribbean folk in diaspora and at home. Drawing upon ethnographic and historical research in a variety of contexts and settings, the contributors to this volume explore the relationship between religious and social life. Whether practiced at home or abroad, the contributors contend that the religions of Caribbean folk are dynamic and creative endeavors that have mediated the ongoing and open-ended relation between local and global historical and contemporary change. *The Multilingual Apple* Ofelia García, Joshua A. **America** Hasia R. Diner,2003-04-30 This book tells the stories of three groups and their unique culinary dramas Italian immigrants transformed the food of their upper classes and of sacred days into a generic Italian food Irish immigrants diminished food as a marker of ethnicity And East European Jews found that dietary restrictions jarred with America s boundless choices     **Incorporating Diversity** Peter Kivisto,2015-12-03 As the best single source collection of classic and

contemporary readings on the subject this anthology will be a valuable reference to scholars of immigration race and ethnicity national identity and the history of ideas and indispensable for courses in history and the social sciences dealing with these topics Ruben G Rumbaut co author of Immigrant America A Portrait and Legacies The Story of the Immigrant Second Generation Societies today are increasingly characterized by their ethnic racial and religious diversity One key question raised by the global migration of people is how they do or do not come to be incorporated into their new social environments For over a century assimilation has been the concept used in explaining the processes of immigrant incorporation into a new society It has also been applied to indigenous peoples to refugees and to involuntary migrants caught up in the slave trade Assimilation has confronted many scholarly challenges which were often intermeshed with particular political agendas This book allows readers to obtain a clearer sense of the canonical formulation of assimilation theory and an understanding of the key themes and issues contained in current efforts to rethink and revise the classical perspective for today s changing world     **All the Nations Under Heaven** Frederick Binder,David Reimers,1995-07-06 In

certain neighborhoods of New York City an immigrant may live out his or her entire life without even becoming fluent in English From the Russians of Brooklyn s Brighton Beach to the Dominicans of Manhattan s Washington Heights New York is arguably the most ethnically diverse city in the world Yet no wide ranging ethnic history of the city has ever been attempted In All the Nations Under Heaven Frederick Binder and David Reimers trace the shifting tides of New York s ethnic past from its beginnings as a Dutch trading outpost to the present age where Third World immigration has given the population a truly

global character All the Nations Under Heaven explores the processes of cultural adaptation to life in New York giving a lively account of immigrants new and old and of the streets and neighborhoods they claimed and transformed All the Nations Under Heaven provides a comprehensive look at the unique cultural identities that have wrought changes on the city over nearly four centuries since Europeans first landed on the Atlantic shore While detailing the various efforts to retain a cultural heritage the book also looks at how ethnic and racial groups have interacted and clashed over the years From the influx of Irish and Germans in the nineteenth century to the recent arrival of Caribbean and Asian ethnic groups in large numbers All the Nations Under Heaven explores the social cultural political and economic lives of immigrants as they sought to form their own communities and struggled to define their identities within the grwonig heterogeneity of New York In this timely provocative book Binder and Reimers offer insight into the cultural mosaic of New York at the turn of the millennium where despite a civic pride that emphasizes the goals of diversity and tolerance racial and ethnic conflict continue to shatter visions of peaceful coexistence

Exposing Prejudice Bonnie Urciuoli, 2013-06-13 Urciuolis award winning book explores how language and the social construction of race class and ethnicity shape the lives of working class Puerto Ricans living in New York City Her reflexive ethnographic study is a combination of two absorbing features her analyses of language and power relations based on key principles in semiotic and linguistic anthropology paired with the authentic voices of individuals who share their lived experiences of speaking Spanish and English The subjects conversations interview responses and anecdotes are saturated with ideas about what correct English means to them Through these extended transcripts readers gain insight about languages role in cultural dynamics that tangle minority populations in challenges such as limiting where individuals and families live and work Urciuolis provocative research and fieldwork give readers a rich understanding of language as the domain in which racial ethnic and class hierarchies are experienced
