Pilauco: A Late Pleistocene Archaeo-paleontological Site Mario Pino, Giselle A. Astorga, 2019-07-26 This volume combines 10 years of accomplished research at the Pilauco site. The studies are focused on a variety of scientific areas including geological, sedimentological, geomorphological, and paleobotanical topics as well as paleontology of vertebrates and invertebrates, micropaleontology, archaeology, biochemistry, taxonomy, taphonomy, astrophysics, and the development of some particular touristic aspects. In 18 chapters, a variety of authors describe the excavation and investigation of this unique location. The book presents Pilauco as an example for the natural laboratory which can be found in South America, a testing ground for many of the hypotheses regarding migrations of animals and humans. In this context, the study of topics such as the paleozoogeography, the role of megafauna species for the architecture of the forests, the animal extinctions, or the early human settlements is extremely important on a global scale. The Pilauco site features paleontological and archaeological evidences and is contemporaneous with the Monte Verde site 15 000 cal yr AP. It is located 100 km north from Monte Verde and lies within the Intermediate Depression in northwestern Chilean Patagonia. It was discovered by chance in 1986 and has been excavated and investigated since 2007. Monte Verde: The archaeological context and interpretation Tom D. Dillehay, 1989

Geography of Time, Place, Movement and Networks, Volume 1 Stanley D. Brunn, 2024-05-23 This book describes the journey concept relating to cultural and social history of Western and non Western worlds. By including time journeys negotiated by women, racial minorities, artists, and scholars from the humanities and social, natural, and physical scientists, the book explores time-space journeys in personal, professional, and cultural life and place experiences. The sixteen chapters in this book offer new insights into time-place worlds in different contexts including history, culture, astronomy, and science fiction. The concept is one where science and art worlds intersect in the emerging worlds of the unknown. With contributors from different disciplines and countries expanding our understanding of this concept, this volume provides a valuable source for disciplinary and interdisciplinary classes and seminars exploring these scholarly frontiers.

Paleoindian Societies of the Coastal Southeast James S. Dunbar, 2019-10-01 Dunbar's exhaustive paleofaunal environmental data traces all the known paleo sites in Florida, analyzes the materials recovered, and outlines the conditions under which the remains may have been deposited. In doing so, he provides a new look into the distant past and a new way of thinking about life on the land mass we call Florida. Provided by publisher.

Monte Verde, a Late Pleistocene Settlement in Chile: Paleo-environment and site context Tom D. Dillehay, 1989 Detailed descriptions of fieldwork, environment, stratigraphy, radiocarbon chronology, research design, organic preservation, wood assemblage, cordage, microtopography, modern plant use, archaeobotanical identifications, lithics, faunal remains, and activity patterning provide the most comprehensive.

Ancient People of the Andes Michael A. Malpass, 2016-05-27 In *Ancient People of the Andes*, Michael A. Malpass describes the prehistory of western South America from initial colonization to the Spanish Conquest. All the major cultures of this region from the Moche to the

Inkas receive thoughtful treatment from their emergence to their demise or evolution No South American culture that lived prior to the arrival of Europeans developed a writing system making archaeology the only way we know about most of the prehispanic societies of the Andes The earliest Spaniards on the continent provided first person accounts of the latest of those societies and as descendants of the Inkas became literate they too became a source of information Both ethnohistory and archaeology have limitations in what they can tell us but when we are able to use them together they are complementary ways to access knowledge of these fascinating cultures Malpass focuses on large anthropological themes why people settled down into agricultural communities the origins of social inequalities and the evolution of sociopolitical complexity Ample illustrations including eight color plates visually document sites societies and cultural features Introductory chapters cover archaeological concepts dating issues and the region's climate The subsequent chapters divided by time period allow the reader to track changes in specific cultures over time

Radiocarbon Dating R.E. Taylor, Ofer Bar-Yosef, 2016-06-03 This volume is a major revision and expansion of Taylor's seminal book Radiocarbon Dating An Archaeological Perspective It covers the major advances and accomplishments of the ^{14}C method in archaeology and analyzes factors that affect the accuracy and precision of ^{14}C based age estimates In addition to reviewing the basic principles of the method it examines ^{14}C dating anomalies and means to resolve them and considers the critical application of ^{14}C data as a dating isotope with special emphasis on issues in Old and New World archaeology and late Quaternary paleoanthropology This volume again a benchmark for ^{14}C dating critically reflects on the method and data that underpins in so many cases the validity of the chronologies used to understand the prehistoric archaeological record

Archaeology of the Appalachian Highlands Lynne P. Sullivan, Susan C. Prezzano, 2001 This volume is a major synthesis of the archaeology of the Appalachian region and includes much material that was previously unpublished or underpublished The information and interpretations presented will be very useful for archaeologists working in eastern North America who are interested in this diverse region C Clifford Boyd Jr Radford University Archaeology of the Appalachian Highlands reveals that every part of Appalachia yields archaeological evidence significant to understanding the broad prehistoric sweep of the American Indians In this most welcome volume editors Lynn Sullivan and Susan Prezzano have assembled the most current interpretations of archaeological theory technology and cultural history as these occur in the highlands of eastern North America This volume to shatter myths about Appalachian and its past David S Brose Director Schiele Museum of Natural History

Ancient Cuzco Brian S. Bauer, 2010-06-28 The Cuzco Valley of Peru was both the sacred and the political center of the largest state in the prehistoric Americas the Inca Empire From the city of Cuzco the Incas ruled at least eight million people in a realm that stretched from modern day Colombia to Chile Yet despite its great importance in the cultural development of the Americas the Cuzco Valley has only recently received the same kind of systematic archaeological survey long since conducted at other New World centers of civilization Drawing on the results of the Cuzco Valley Archaeological Project that Brian Bauer directed

from 1994 to 2000 this landmark book undertakes the first general overview of the prehistory of the Cuzco region from the arrival of the first hunter gatherers ca 7000 B C to the fall of the Inca Empire in A D 1532 Combining archaeological survey and excavation data with historical records the book addresses both the specific patterns of settlement in the Cuzco Valley and the larger processes of cultural development With its wealth of new information this book will become the baseline for research on the Inca and the Cuzco Valley for years to come

From Hiroshima to the Iceman Harry E Gove,2022-02-14
 From Hiroshima to the Iceman The Development and Applications of Accelerator Mass Spectrometry presents a fascinating account of a breakthrough in science and the insights it has brought that would not have been possible without it Involved since its invention Harry Gove recounts the story of the development of accelerator mass spectrometry and its use as an ultrasensitive detection technique in many fields of science and the arts A key advantage of the technique is that it requires only very small samples of material The book explores the areas where the technique has increased understanding and provided solutions to problems including the clean up and storage of nuclear waste the effects of the atomic bombing of Hiroshima biomedical research the settling of the Americas and carbon dating of many precious artifacts Objects dated include the Turin Shroud the Iceman the elephant bird egg and the Dead Sea scrolls *High-altitude Archeological Investigations at Cedar Breaks National Monument, Utah* Timothy W. Canaday,2001 *Pendejo Cave* Richard S. MacNeish,Jane G. Libby,Jane G. Liddy,2003 This account of the archaeology of a cave in southern New Mexico makes a dramatic contribution to the ongoing debate over how long human beings have lived in the Americas The findings presented here show that human settlement may go back as far as 75 000 years before the present whereas the long accepted Clovis dates showed humans only about 12 000 years ago MacNeish and his colleagues subjected the cave its environs and its contents to rigorous interdisciplinary investigation The first section of this volume comprises their reports on the changing environment of the area The second section concentrates on the excavation of the cave s layers presenting the results of radiocarbon dating and describing the evidence of human occupation including friction skin prints and human hair The third section discusses the cultural implications of the materials recovered and suggests how the ancient peoples may have exploited the changing environment and developed different ways of life throughout the Americas before the time of Clovis man No serious discussion of early inhabitants in the New World can disregard the findings presented in this monumental work of scholarship

Archaeology of Louisiana Mark A. Rees, 2010-11-30 Archaeology of Louisiana provides a groundbreaking and up to date overview of archaeology in the Bayou State including a thorough analysis of the cultures, communities and people of Louisiana from the Native Americans of 13 000 years ago to the modern historical archaeology of New Orleans. With eighteen chapters and twenty seven distinguished contributors, Archaeology of Louisiana brings together the studies of some of the most respected archaeologists currently working in the state, collecting in a single volume a range of methods and theories to offer a comprehensive understanding of the latest archaeological findings. In the past two decades alone, much new data has transformed our knowledge of Louisiana's history. This collection accordingly presents fresh perspectives based on current information such as the discovery that Native Americans in Louisiana constructed some of the earliest known monumental architecture in the world: extensive earthen mounds during the Middle Archaic period (6000-2000 B.C.). Other contributors consider a variety of subjects such as the development of complex societies without agriculture, underwater archaeology, the partnering of archaeologists with the Caddo Nation and descendant communities, and recent research in historical archaeology and cultural resource management that promises to transform our current appreciation of colonial Spanish, French, Creole and African American experiences in the Lower Mississippi Valley. Accessible and engaging, Archaeology of Louisiana provides a complete and current archaeological reference to the state's unique heritage and history.
