Resources in Education, 1997 **For the Love of Learning** Kristin Phillips, 2022-08-16 INSTANT BESTSELLER For parents, teachers, and everyone who remembers being a student, an unforgettable glimpse into the inner workings of school from a life-long educator. Children spend most of their waking hours in school, exploring boundaries, forming important relationships, and, of course, learning. But as you step into the unique vantage of the principal's office, you experience first-hand the wide range of characters, efforts, and decisions that ensure all students thrive. Kristin Phillips takes us through a school year from the excitement of fall through the long days of winter and into the renewed energy that comes with spring. Through her eyes, we experience the increasingly complex education system, students with unique learning needs, teachers bringing their practice into the 21st century, and the parent partners who have entrusted their children to the school system. Myles, a precocious five-year-old, introduces himself by swearing a blue streak on the first day of school. He finds solace in a paper box rocket ship in Phillips's office. Rafi, a grade 8 boy oozing with attitude, makes a very uncool choice to lunch with the principal. And Harriet, a struggling teacher, is oblivious to the fact her students are bored to tears. Throughout the story, Phillips develops caring relationships with the people who need her the most, as she works with colleagues to create an environment where everyone succeeds. But principals are people, too, and Phillips also recounts the demands on her as a single mother with three teenagers, one of whom suffers from significant mental health issues. As an educator, she tries to help students coping with similar problems and reveals a heartfelt story of dealing with the system from both sides. With honesty and compassion, Phillips gives a human face to the joys of school and the very real difficulties educators work to overcome, one year and one student at a time.

Quality Learning Kathy Smith, John Loughran, 2017-04-13 When teachers are supported to work together in ways that allow them to deepen knowledge of their professional practice, the understandings that emerge from their conversations about quality learning and teaching demonstrate a high level of expertise. Yet such professional knowledge is often deeply embedded within each teacher's everyday teaching, the tacit knowledge that determines how and why they attend to student learning in certain ways. This book captures the professional knowledge of teachers that

developed as the result of an ongoing process of school based change where teachers began to work differently because they began to think differently about the learning that mattered for their students in their school The explication of their knowledge of practice became possible due to the ongoing support they received from their school leadership in most part because leadership trusted them as professionals to responsibly lead student learning Within this culture of trust and valued collaboration working alongside external critical friends who supported their professional learning the teachers engaged in regular thought provoking and interactive professional dialogue Together they exposed and challenged each other s thinking and beliefs about learning and teaching captured and examined each other s practice and ultimately articulated and extended their professional knowledge The insights about this collaborative learning process and the emergent knowledge and understandings teachers develop about the interactive relationship between learning and teaching has much to contribute to educational discourse beyond the school setting Some of that knowledge and the way it looks in practice is shared in this book
