It covers the most important theoretical developments and clinical advances with special emphasis on contemporary topics such as transference trauma and primitive states of mind where Italian work has been particularly influential. In this volume Franco Borgogno, Alberto Luchetti and Luisa Marino Coe of the Italian Psychoanalytical Society provide an overview of how Italian psychoanalysis has developed from the 1920s to the present day, tracing its early influences and highlighting contemporary developments. Forty-six seminal and representative papers of psychoanalysts belonging to the two Italian psychoanalytical societies, the Italian Psychoanalytical Society and the Italian Association of Psychoanalysis, have been chosen to illuminate what is special about Italian theoretical and clinical thinking and what is demonstrative of the specificity of its psychoanalytic discourse. The selected papers are preceded by a first introductory section about the history of psychoanalysis in Italy and followed by a swift glance at Italian psychoanalysis from abroad. They are grouped into sections which represent the areas particularly explored by Italian psychoanalysis. Each section is accompanied by introductory comments which summarize the main ideas and concepts and also their historical and cultural background so as to offer to the reader either an orientation and stimulus for the debate and to indicate their connections to other papers included in the present volume and to the international psychoanalytic world. The book is divided into six parts including: History of psychoanalysis in Italy; Metapsychology; Clinical practice; theory of technique; therapeutic factors; The person of the analyst; countertransference and the analytic relationship; field; Trauma; psychic pain; mourning and working through; Preverbal; precocious; fusional; primitive states of the mind. This volume offers an excellent and detailed fresco of Italian psychoanalytic debate, shining a light on thinking that has evolved differently in France, England, North and Latin America. It is an ideal book for beginners and advanced students of clinical theory as well as experienced psychoanalysts wanting to know more about Italian psychoanalytic theory and technique and how they have developed.

Annual Review of Gerontology and Geriatrics, Volume 27, 2007 Leonard W. Poon, Thomas T. Perls, 2007-12-12 Though exceptional human longevity has captured the imagination for millennia, it has been only in the past fifteen years or so that some of the secrets to very long lives are finally giving way to scientific inquiry. Written by an international group of experts, this year's review first considers the methodological and design dilemmas faced in conducting centenarian research. It then offers guidance in locating literature and data sources for primary and secondary information on centenarians and the oldest old. This section includes a list of the world's oldest persons and discusses the difficulties in compiling such a list. The remainder of the review is divided in three sections: the biology and genetics of longevity; the behavioral and social predictors of longevity; and methodological issues in qualitative and anthropologic approaches and the study of the very oldest old, supercentenarians or those who live to 110 years or more. Data is drawn from studies undertaken among populations in diverse parts of the world.
