Homelessness in America Robert Hartmann McNamara,2008-08-30 Homelessness is one of the most compelling social problems in the United States Dating from the early years in Colonial America to the current problems relating to homeless women and children homelessness has been the topic of discussion of scholars social activists and policy makers Many types of social problems are linked to homelessness including poverty substance abuse foster care and crime As a result unpacking the issues has proven to be a challenge for anyone interested in this topic Homelessness in America offers an assessment of

what is known about each segment of the homeless population which contrary to conventional belief is comprised of a wide variety of faces from many backgrounds It explains linkages to other social issues and provides a balanced overview of homelessness in light of the varying perspectives on the topic While much of what has been written about homelessness has come from the academic perspective agendas often interfere with an accurate understanding of the problem Clearly there is a place for other types of perspectives including those that view homelessness through political and legal lenses These groups have provided us with a robust body of information within which we may better understand the questions relating to homelessness McNamara has brought together the voices of these groups in order to reveal the numerous political economic and social constraints that beset current attempts to solve homelessness In addition the commonly held belief that homelessness is a result of laziness or a poor work ethic is turned on its head to reveal that homelessness is truly a multifaceted and complex issue

Transitioning to Reduced Inequalities Sabin Bieri, Christoph Bader, 2023-02-09 The world has never been richer than today The distribution of our global wealth however is hugely biased Since 1980 the gains were mainly captured by the rich The top 1% obtained twice as much of the income growth as compared to the bottom 50% Nevertheless within economics debates about inequality have remained rather marginal despite long term research by renowned scholars such as Tony Atkinson Within the public arena concerns about inequality emerged as a result of a number of developments First the global financial crisis in 2008 exposed the risks of the financing of the economy secondly 2013 Thomas Picketty's book *Capital in the 21st century* demonstrated that against the trend of the overall 20th century capital returns outstrip the gains through economic growth in recent decades thus threatening social coherence and democratic institutions and thirdly the Millennium Campaign presented impressive achievements regarding poverty but stirred doubts whether the most deprived were left even further behind Since 2015 then the stated aim of SDG 10 is to reduce inequality within and among countries There is growing consensus that economic growth is not sufficient to reduce poverty and that our efforts to make it more inclusive so far were insufficient The very first step reduce inequality is to adopt a systemic perspective allowing an integrative analysis covering both ends of the ladder Policies should be universal in principle and pay attention to the needs of disadvantaged and marginalized populations Predicated on comparison inequality reminds us that it's not enough to study lower earners and the poor Instead the term demands that we expand our perspective scrutinizing how economic value is generated accumulated at whose cost and not least how the overall system could be made fairer *Transitioning to Reduced Inequalities* therefore explores inequality trends worldwide offers a debate on different measures and comparative perspectives highlights key actors who either benefited or suffered from recent economic trends and explores policy options to reduce inequality and thus contribute to SDG 10 The volume considers particularly conceptual frameworks with regards to the inequality debate the relationship between poverty reduction economic growth and inequality measures of inequality overlooked bypassed groups in developing countries analysis on income wealth growth for different groups in the global north discussion about policies to reduce inequality and further research in the realm of inequality *Transitioning to Reduced Inequalities* is part of MDPI's new Open Access book series *Transitioning to Sustainability* With this series MDPI pursues environmentally and socially relevant research which contributes to efforts toward a sustainable world
