### **Paths To Marriage Family Studies Text Series:**

Paths to Marriage Bernard I. Murstein, 1986-04 A concise research oriented textbook which traces individuals from the time they meet to the point when they decide to marry. It starts with a brief history of theories of marital choice noting how these have changed since the 19th century. Next the social cultural determinants of marital choice are considered including age, birth order, education, ethnicity, physical attractiveness, socioeconomic class, sex drive, propinquity, race, and religion. Dating and courtship are considered first from a historical framework, then from a developmental one, and finally from a tactical one: what tactics are most successful in wooing, flattery, playing hard to get, etc. Going steady, engagement, cohabitation, and breakup are covered as well as a comprehensive review of love. Also extra dyadic factors pushing the individuals toward marriage are analyzed including readiness to marry, parental and friend network influences, job, and critical incidents. Following are the theories of marital choice focusing on the interactions between the members of couples. These include Freud's psychoanalytic theory, Winch's complementary needs theory, Center's instrumental theory, Kerckhoff and Davis' filter theory, and Murstein's stimulus-value-role theory which combines exchanges and filter approaches. The strength and weakness of each theory are carefully spelled out. Finally the data on marital choice are summarized and future trends are predicted.

*Family Research Methods* Brent C. Miller, 1986-04 Marketing research students starting with this book or one written on the same model would be better able to master the more detailed and comprehensive material in the basic marketing research text. *Journal of Marketing Research* A long history of research on the family has led to ever more sophisticated methods for studying this unique social institution. Yet few family researchers have attempted to synthesize the methodological techniques used for students of family science. Brent Miller's concise book *Family Research Methods* does just that. Miller describes the entire research process from research design through data collection, sampling, and data analysis to explain to graduates and undergraduates alike just how family research is done. While many of the methods are shared with the other social sciences, Miller's work highlights specific family techniques and demonstrates family-related applications. This brief volume can be used to introduce students in family fields to the research process or to supplement more traditional methods textbooks by providing a family focus.
