

## Patient and Family Education, Counseling, and Therapy

- Patient education is one of the most important responsibilities that medical social workers have in health care settings.
- Grappling with a disease, injury or other medical condition can be confusing and deeply stressful for patients and their loved ones.
- Medical social workers explain to patients the causes, effects and progression of their illness. After receiving information about patients' treatment options from the medical team, medical social workers also communicate and discuss these options with patients and their families.
- They also provide updates to patients and their families regarding any changes in their treatment plan.

**Family Psychoeducation for Serious Mental Illness** Harriet P. Lefley,2009-07-17 Research shows that many adults with serious mental illness live with or maintain contact with their families But families are rarely given information about their relative s illness and their own needs for support are ignored To be optimally beneficial family members and other caregivers need education about the disorder some knowledge of illness management techniques and personal support Family psychoeducation FPE is a powerful evidence based psychosocial intervention that serves consumers and their families FPE has proven efficacious in reducing relapse and hospitalization reducing symptoms increasing employability of persons with severe and persistent mental illness and in many cases enhancing their families well being Its success rests with a state of the art education model for improving caregivers understanding of their loved one s illness through learning what is known and not known about it and how to assess and cope with its manifestations Here in the first book of its kind Harriet P Lefley traces the history of FPE including the developments in mental health services and systems and theoretical approaches that inform it and the robust empirical evidence it now claims after a quarter century of development and evaluation at major research centers around the world Presenting first the approach s generic components training models and required competencies Lefley then discusses the available variations such as Family Education FE a brief manualized form of FPE offered by professionally trained family members that has some empirical support for knowledge gains and easing family distress The result is a comprehensive practical introduction to family psychoeducation that critically appraises the evidence and examines the model s place in contemporary mental health systems This groundbreaking volume is an ideal
