Patient Betrayal:

Betrayal Salman Akhtar, 2018-05-01 Betrayal underlies all psychic trauma whether sexual abuse or profound neglect violence or treachery extramarital affair or embezzlement When we betray others we violate their confidence in us When others betray us they pierce the veil of our innocent reliance Betraying and feeling betrayed are ubiquitous to the scenarios of trauma and yet surprisingly neglected as a topic of specific attention by psychoanalysis This book fills this gap The first part deals with developmental aspects and notes that while the experience of betrayal might be ubiquitous in childhood its lack of recognition by the parents is what leads to fixation upon it Attention is also given to Oedipally indulged and seduced children who feel betrayed later in the course of their development Feelings of betrayal during early adolescence are also discussed This section of the book closes with an account of situations where our bodies betray us The realms of body image betrayal body self betrayal and the body's ultimate betrayal via physical death are addressed

Language for Those Who Have Nothing Peter Good, 2006-04-11 The aim of Language for those who have Nothing is to think psychiatry through the writings of Mikhail Bakhtin Using the concepts of Dialogism and Polyphony the Carnival and the Chronotope a novel means of navigating the clinical landscape is developed Bakhtin offers language as a social phenomenon and one that is fully embodied Utterances are shown to be alive and enfolded and their meanings realised in the context of given social dimensions The organisation of this book corresponds with carnival practices of taking the high down to the low before replenishing its meaning anew Thus early discussions of official language and the chronotope become exposed to descending levels of analysis and emphasis Patients and practitioners are shown to occupy an entirely different spatio temporal topography These chronotopes have powerful borders and it is necessary to use the

Carnival powers of cunning and deception in order to enter and to leave them The book provides an overview of practitioners who have attempted such transgression and the author records his own unnerving experience as a pseudopatient By exploring the context of psychiatry's unofficial voices its terminology jokes parodies and everyday narratives the clinical landscape is shown to rely heavily on unofficial dialogues in order to safeguard an official identity **Transformation** Alessandra Cavalli, Lucinda Hawkins, Martha Stevns, 2018-04-17 This book offers a challenging reading of the legacy of C G Jung who offered fascinating insights into the psyche It is intended for clinicians of different schools who are interested in a deeper understanding of the relationship between patient and analyst **If I Betray These Words** Wendy Dean, Simon Talbot, 2024-09-10 FEATURES A NEW AFTERWORD BY THE AUTHOR An incredibly important and captivating book for patients families and clinicians detailing how we're all hurt by corporate medicine Wendy Dean diagnoses the dangerous state of our healthcare system illustrating the thumbscrews applied to medical professionals by their corporate overlords Required reading for all stakeholders in healthcare Danielle Ofri MD PhD author of When We Do Harm A Doctor Confronts Medical Error Offering examples of how to make medicine better for the healers and those they serve If I Betray These Words profiles clinicians across the country who are tough resourceful and resilient but feel trapped between the patient first values of their Hippocratic oath and the business imperatives of a broken healthcare system Doctors face real risks when they stand up for their patients and their oath they may lose their license their livelihood and for some even their lives There's a growing sense referred to as moral injury that doctors have their hands tied they know what patients need but can't get it for them because of constraints imposed by healthcare systems run like big businesses Workforce distress in healthcare moral injury was a crisis long before the COVID 19 pandemic but COVID highlighted the vulnerabilities in our healthcare systems and made it impossible to ignore the distress with 1 in 5 American healthcare workers leaving the profession since 2020 and up to 47% of U S healthcare workers now planning to leave their positions by 2025 If I Betray These Words confronts the threat and broken promises of moral injury what it is where it comes from how it manifests and who's fighting back against it We need better healthcare for patients and for the workforce It's time to act Awaiting the therapist's Baby April E. Fallon, Virginia Brabender, 2003-01-30 The passage into and through pregnancy and new parenthood is one that affects all aspects of a therapist's life including work with patients It presents special therapeutic challenges as well as special therapeutic opportunities Drawing on the scattered literature interviews with people who have been in the roles of therapists and expectant parents simultaneously and their own rich experiences the authors consider therapists' psychological lives prior to birth or adoption and examine both therapist and patient reactions to the reality of a coming child Whatever the therapist's theoretical orientation the patient therapist relationship undergoes changes and therapists are faced with a number of important decisions not typically addressed in the psychotherapy literature such as whether and when to inform the patient of what is anticipated The authors offer practical advice that enables therapists to proceed

through a sound clinical decision making process and discuss the ways in which the changes can be harnessed in the service of treatment goals Multiple modalities are covered including individual group family and couples therapy which can be understood from a variety of theoretical perspectives The needs of patients in different diagnostic categories at different developmental stages are addressed and the relationship between therapist and practice setting is examined Throughout the authors illuminate their points with vivid real life case vignettes The issue of impending parenthood arises for male and female practitioners adopters and biological parents and their supervisors All those facing it will find this book essential reading as they seek to identify and quell their anxieties and improve their clinical acumen and effectiveness **The**

States alone 16 000 people die each year as a result of prescription opioid overdose But perhaps the most frightening aspect of the prescription drug epidemic is that it s built on well meaning doctors treating patients with real problems In *Drug Dealer* MD Dr Anna Lembke uncovers the unseen forces driving opioid addiction nationwide Combining case studies from her own practice with vital statistics drawn from public policy cultural anthropology and neuroscience she explores the complex relationship between doctors and patients the science of addiction and the barriers to successfully addressing drug dependence and addiction Even when addiction is recognized by doctors and their patients she argues many doctors don t know how to treat it connections to treatment are lacking and insurance companies won t pay for rehab Full of extensive interviews with health care providers pharmacists social workers hospital administrators insurance company executives journalists economists advocates and patients and their families *Drug Dealer* MD is for anyone whose life has been touched in some way by addiction to prescription drugs Dr Lembke gives voice to the millions of Americans struggling with prescription drugs while singling out the real culprits behind the rise in opioid addiction cultural narratives that promote pills as quick fixes pharmaceutical corporations in cahoots with organized medicine and a new medical bureaucracy focused on the bottom line that favors pills procedures and patient satisfaction over wellness Dr Lembke concludes that the prescription drug epidemic is a symptom of a faltering health care system the solution for which lies in rethinking how health care is delivered
