Sklar, Arnold van der Valk, 2012-12-06 PREFACE Within the Florida Everglades tree islands which cover only a small percentofthis ecosystem historically have provided essential habitat for a wide variety ofterrestrial and amphibious plants birds and animals These tree islands however have been one ofits least studied features Because of their less flood tolerant vegetation tree islands are one of the most sensitive components of the Everglades to changes in hydrology and many tree islands have been lost during periods when water levels have been abnormally high or low Their sensitivity to water level changes makes tree islands potentially one ofthe best and surest measures ofthe overall hydrologic health of the Everglades Consequently the maintenance of healthy functioning tree islands and the restoration ofthose that have been lost will be an important performance measures that will be used tojudge the success of the Comprehensive Everglades Restoration Plan CERP A symposium Tree Islands of the Everglades was held on July 14 and 15 1998 at Florida Atlantic University Boca Raton Florida It was sponsored by Florida Center for Environmental Studies and the South Florida WaterManagement District This was the first scientific meeting ever devoted to tree islands The organizers of this symposium were Drs Arnold van der Valk Florida Center for Environmental Studies and Iowa State University Fred Sklar South Florida Water Management District and Wiley Kitchens United States Geological Survey **Ecological Silvicultural Systems** Brian J. Palik, Anthony W. D'Amato, 2023-10-16 ECOLOGICAL SILVICULTURAL SYSTEMS Unleash the natural power and adaptability of forests with this cutting edge guide For generations silvicultural systems have focused largely on models whose primary objective is the production of timber leading to drastically simplified forests with reduced ecological richness diversity and complexity Ecological silviculture by contrast focuses on producing and maintaining forests with all their parts that is with the diversity and flexibility to respond and adapt to global changes Ecological silviculture seeks to emulate natural development models

and sustain healthy forests serving multiple values and goals Ecological Silvicultural Systems provides a comprehensive introduction to these approaches and their benefits tailored to diverse types of forests designed for forest management professionals It provides a series of exemplary models for ecological silviculture and surveys the resulting forest ecosystems The result is a text that meets the needs of professionals in forestry and natural resource management with an eye towards sustaining healthy forest ecosystems adapting them to climate change protecting them from invasive species and responding to changing market forces Ecological Silvicultural Systems readers will also find Detailed treatment of forest ecosystems in North America Europe South America and Australia A broad field of contributors with decades of combined expertise on multiple continents Discussion of pine woodlands temperate hardwood forests boreal forests temperate rainforests and more Ecological Silvicultural Systems is a useful reference for professional foresters wildlife habitat managers restoration ecologists and undergraduate and graduate students in any of these fields America's Natural Places: The Midwest Jason Ney, Terri Nichols, 2009-11-25 From Iowa's Decorah Ice Cave to the Kitty Todd Nature Preserve in Ohio this volume provides a snapshot of the most spectacular and important natural places in the Midwestern United States America's Natural Places The Midwest examines over 50 of the most spectacular and important areas of this region with each entry describing the importance of the area the flora and fauna that it supports threats to the survival of the region and what is being done to protect it Organized by state within the volume this work informs readers about the wide variety of natural areas across the Midwest and identifies places near them that demonstrate the importance of preserving such regions Northern Forested Wetlands Ecology and Management Carl C. Trettin, 2018-12-19 Forested wetlands are a major component of northern landscapes important both for their ecological functions and their socioeconomic values Historically these lands have been used for timber and fiber products hunting fishing trapping food gathering and recreation There are many questions about the use and management of these lands in the future particularly with respect to forest products hydrology and water quality plant and wildlife ecology landscape dynamics and wetland restoration Northern Forested Wetlands Ecology and Management provides a synthesis of current research and literature It examines the status distribution and use of these wetland resources The book focuses on understanding the role of wetlands in the landscape and on how to manage these wetlands and sustain their important functions This is a primary reference text for the study and management of northern forested wetlands providing a forum for information discovered by researchers and managers from many nations
