London, 1991 Over the past decade Japanese corporations have made a series of large news generating gifts to a variety of United States universities museums and research institutions Many of these gifts have differed in both nature and magnitude from the contributions made by Japanese companies domestically The stir generated by such corporate grants is evidenced on the one hand by the influx into Japan of American European and Asian fundraisers seeking grants for their organizations and on the other hand by the intensifying debate within Japan about the appropriate role for Japanese institutions as international corporate philanthropists and citizens As with every facet of the complex United States Japan relationship cultural disparities make the American and Japanese approaches to philanthropy quite different creating the potential for friction and disappointment in this realm as surely as in the realm of trade and international business This book examines major legal and functional aspects of Japanese corporate philanthropy and attempts to place them in their cultural setting Drawing on her experience as an attorney and five years in Japan Ms London aims to make Japanese corporate grantmaking more comprehensible not only to Americans but also to Japanese as they begin to focus more attention on the role and meaning of corporate philanthropy **Economic Factors in the Growth of Corporate Giving** Ralph Lowell Nelson, 1970-12-31 Examines the dramatic changes in the philanthropic behavior of business corporations in their support of education health welfare and the arts This analysis shows how traditional patterns of corporate philanthropy have undergone changes across the years and how presently a favorable attitude exists toward giving The author traces these shifts through periods of depression war and peace He examines economic and non economic reasons for the growth of corporate giving and treats the innovative role of company sponsored foundations **Corporate Philanthropy at the Crossroads** Dwight F. Burlingame, Dennis R. Young, 1996-11-22 A guide for

fund raisers to the current thinking in the boardrooms about getting the biggest bang for the company's charity and to the research corporations are doing to that end. The eight perspectives include why research is crucial to the new corporate philanthropy, corporate volunteerism, business performance, the ethical framework, and firm size. Looking Good and Doing Good Jerome L. Himmelstein, 1997-05-22. Political controversy is a lens through which the author examines corporate philanthropy. He explains why corporate philanthropy has become politicized, how corporations respond to controversy about their donations, and what the conflicts tell us about corporate philanthropy and corporate politics. Himmelstein argues that corporate giving sometimes becomes politicized because it is inherently a complex social and political act. Drawing on in depth interviews with managers at fifty five of the largest corporate giving programs in the U.S. Himmelstein shows that corporate giving often finds itself as one manager put it, locked in a struggle between looking good and doing good.
