Bitel, 2002-10-24 This is a history of the early European middle ages through the eyes of women combining the rich literature of women's history with original research in the context of mainstream history and traditional chronology The book begins at the end of the Roman empire and ends with the start of the long eleventh century when women and men set out to test the old frontiers of Europe The book recreates the lives of ordinary women but also tells personal stories of individuals Each chapter also questions an assumption of medieval historiography and uses the few documents produced by women themselves along with archaeological evidence art and the written records of medieval men to tell of women their experiences and ideas and their relations with men It covers the continent and its exotic edges such as Iceland Ireland and Iberia looking at women Christian and non Christian alike      The Stranger in Medieval Society F. **Women's Monasticism and Medieval Society** Bruce L. Venarde, 2018-05-31 In this engaging work Bruce L Venarde uncovers a largely unknown story of women's religious lives and puts female monasticism back in the mainstream of medieval ecclesiastical history To chart the expansion of nunneries in France and England during the central Middle Ages he presents statistics and narratives to describe growth in broad historical contexts with special attention to social and economic change Venarde explains that in the years 1000 1300 the number of nunneries within Europe grew tenfold In the eleventh and twelfth centuries religious institutions for women developed in a variety of ways mostly outside the self

conscious reform movements that have been the traditional focus of monastic history Not reforming monks but wandering preachers bishops and the women and men of local petty aristocracies made possible the foundation of new nunneries In times of increased agrarian wealth decentralization of power and a shortage of potential spouses many women decided to become nuns and proved especially adept at combining spiritual search with practical acumen This era of expansion came to an end in the thirteenth century when forces of regulation and new economic realities reduced radically the number of new nunneries Venarde argues that the factors encouraging and inhibiting monastic foundations for men and women were much more similar than scholars have previously assumed

*Visions of Kinship in Medieval Europe* Hans Hummer, 2018-04-26 What meaning did human kinship possess in a world regulated by Biblical time committed to the primacy of spiritual relationships and bound by the sinews of divine love In the process of exploring this question Hans Hummer offers a searching re examination of kinship in Europe between late Roman times and the high middle ages the period bridging Europe s primitive past and its modern future *Visions of Kinship in Medieval Europe* critiques the modernist and Western bio genealogical and functionalist assumptions that have shaped kinship studies since their inception in the nineteenth century when Biblical time collapsed and kinship became a signifier of the essential secularity of history and a method for conceptualizing a deep prehistory guided by autogenous human impulses Hummer argues that this understanding of kinship is fundamentally antagonistic to medieval sentiments and is responsible for the frustrations researchers have encountered as they have tried to identify the famously elusive kin groups of medieval Europe He delineates an alternative ethnographic approach inspired by recent anthropological work that privileges indigenous expressions of kinship and the interpretive potential of native ontologies This study reveals that kinship in the middle ages was not biological primitive or a regulator of social mechanisms nor was it traceable by bio genealogical connections In the Middle Ages kinship signified a sociality that flowed from convictions about the divine source of all things and which wove together families institutions and divinities into an expansive eschatological vision animated by the most righteous principle of love

*Medieval East Central Europe in a Comparative Perspective* Gerhard Jaritz, Katalin Szende, 2016-05-12 *Medieval East Central Europe in a Comparative Perspective* draws together the new perspectives concerning the relevance of East Central Europe for current historiography by placing the region in various comparative contexts The chapters compare conditions within East Central Europe as well as between East Central Europe the rest of the continent and beyond Including 15 original chapters from an interdisciplinary team of contributors this collection begins by posing the question What is East Central Europe with three specialists offering different interpretations and presenting new conclusions The book is then grouped into five parts which examine political practice religion urban experience and art and literature The contributors question and explain the reasons for similarities and differences in governance and strategies for handling allies enemies or subjects in particular ways They point out themes and structures from town planning to religious orders that did not function according to political boundaries and for which the inclusion of East Central European territories was systemic The volume offers a new interpretation of medieval East Central Europe beyond its traditional limits in space and time and beyond the

established conceptual schemes It will be essential reading for students and scholars of medieval East Central Europe
