*Everyday Lives in the Global City* Jörg Dürrschmidt, 2013-04-15 Rejecting simplifying notions of globalisation as a macro economic force this book provides a grounded picture of the various ways in which people's biographies are tied up with the global cultural economy The main argument of the book is that the globalisation of lives is experienced by people as the extension of their milieux both spatially and symbolically

**African Philosophy** Guttorm Fløistad, 2012-12-06 This publication is a continuation of two earlier series of chronicles Philosophy of the Mid Century Firenze 1958-59 and Contemporary Philosophy Firenze 1968 edited by Raymond Klibansky Like the other series these chronicles provide a survey of significant trends in contemporary philosophical discussion from 1970 to 1985 The need for such surveys has I believe increased rather than decreased over the last years The philosophical scene appears for various reasons more complex than ever before The continuing process of specialization in most branches the emergence of new schools of thought the convergence of interest thought not necessarily of opinion of different traditions upon certain problems the increasing attention being paid to the history of philosophy in discussions of contemporary problems and the growing significance for philosophical discourse of the social political and cultural situation in various regions of the world are the most important contributory factors Surveys of the present kind are a valuable source of knowledge of this complexity and may as such be an assistance in renewing the understanding of one's own philosophical problems The surveys it is to be hoped may also help to strengthen a world wide Socratic element of modern philosophy the dialogue or

Kommunikationsgemeinschaft So far five volumes have been prepared for the new series

**Dennett** Tadeusz Zawidzki, 2014-10-01 A systematic and thorough interpretation of the philosophy of Daniel Dennett this book is a tantalizing entrance into the philosophy of mind Manifestly we human beings are conscious thinking free and responsible agents However science has revealed that we are also natural products of evolution composed of simple biochemical components which are arranged in complex self maintaining configurations How do these two aspects of humanity coincide Tadeusz Zawidzki outlines Dennett's reconciliation of three major components thought consciousness and freedom of the will with what science tells us about human nature In the course of this exposition the book highlights the important role that Darwinian thinking plays in Dennett's proposed reconciliation as well as his innovative proposals regarding the reality of our consciousness and

its attributes An insightful introduction to Dennett's thought this work will prove invaluable to interested readers students and scholars alike

Dennett,1989-03-06 How are we able to understand and anticipate each other in everyday life in our daily interactions Through the use of such folk concepts as belief desire intention and expectation asserts Daniel Dennett in this first full scale presentation of a theory of intentionality that he has been developing for almost twenty years We adopt a stance he argues a predictive strategy of interpretation that presupposes the rationality of the people or other entities we are hoping to understand and predict These principles of radical interpretation have far reaching implications for the metaphysical and scientific status of the processes referred to by the everyday terms of folk psychology and their corresponding terms in cognitive science While Dennett's philosophical stance has been steadfast over the years his views have undergone successive enrichments refinements and extensions The Intentional Stance brings together both previously published and original material four of the book's ten chapters its first and the final three appear here for the first time and push the theory into surprising new territory The remaining six were published earlier in the 1980s but were not easily accessible each is followed by a reflection an essay reconsidering and

extending the claims of the earlier work These reflections and the new chapters represent the vanguard of Dennett's thought They reveal fresh lines of inquiry into fundamental issues in psychology artificial intelligence and evolutionary theory as well as traditional issues in the philosophy of mind A Bradford Book      **Sociology, Ethnomethodology and Experience** Mary F. **Normativity, Lifeworld, and Science in Sellars' Synoptic Vision** Dionysis Christias, 2023-04-12 This book brings together the work of Wilfrid Sellars with work in 20th century phenomenology and 21st century speculative realism in order to think through one of the most important predicaments of contemporary philosophy As a result of the disenchantment of nature in late modernity philosophy has struggled to account for the place of persons construed as loci of normative authority and responsibility within a scientifically naturalistically described world bereft of values and norms The book argues that Sellars takes both the framework of persons and science seriously and thinks that this implies the need not just for reconciling the manifest and scientific images but for fusing them into one stereoscopic vision of reality and our place in it One of the main aims of this book is to address the issue of the form which a non alienated experience of ourselves in the world would take in the Sellarsian cryptic stereoscopic fusion of the manifest and the scientific image Through an extended discussion of Sellars relevance for contemporary continental philosophy and phenomenology in which his views on perception the commonsense lifeworld science normativity personhood morality and process metaphysics are presented and extended the book sketches a novel view about what a stereoscopic fusion of the manifest and the scientific image would amount to at the level of our lifeworld experience
