Patterns Of Change In The Nepal Himalaya:

Patterns Of Change In The Nepal Himalaya Mark Poffenberger, 1981-09-07

Himalayan Perceptions:

Environmental Change and the Well-being of Mountain Peoples [ENHANCED] (Hardcover) Jack D. Ives, 2006

Himalayan Households Thomas Earl Fricke, 1994 Available for the first time in English this is the definitive account of the practice of sexual slavery the Japanese military perpetrated during World War II by the researcher principally responsible for exposing the Japanese government's responsibility for these atrocities The large scale imprisonment and rape of thousands of women who were euphemistically called comfort women by the Japanese military first seized public attention in 1991 when three Korean women filed suit in a Tokyo District Court stating that they had been forced into sexual servitude and demanding compensation Since then the comfort stations and their significance have been the subject of ongoing debate and intense activism in Japan much if it inspired by Yoshimi's investigations How large a role did the military and by extension the government play in setting up and administering these camps What type of compensation if any are the victimized women due These issues figure prominently in the current Japanese focus on public memory and arguments about the teaching and writing of history and are central to efforts to transform Japanese ways of remembering the war Yoshimi Yoshiaki provides a wealth of documentation and testimony to prove the existence of some 2 000 centers where as many as 200 000 Korean Filipina Taiwanese Indonesian Burmese Dutch Australian and some Japanese women were restrained for months and forced to engage in sexual activity with Japanese military personnel Many of the women were teenagers some as young as fourteen To date the Japanese government has neither admitted responsibility for creating the comfort station system nor given compensation directly to former comfort women This English edition updates the Japanese edition originally published in 1995 and includes introductions by both the author and the translator placing the story in context for American readers

Patterns, functions, and processes of alpine grassland ecosystems under global change Jian Sun, Gao-Lin Wu, Junran Jimmy Li, Shiliang Liu, Nigussie Haregeweyn, Huakun Zhou, 2023-08-01

Nepali Diaspora in a Globalised Era Tanka B. Subba, A. C. Sinha, 2015-10-05 This is one of the first books to explore Nepali diaspora in a global context across India and other parts of South Asia Southeast Asia Europe and Australia It discusses the social political and economic status and aspirations of the Nepali community worldwide The essays in the volume cover a range of themes including belonging and identity politics among Nepalese migrants representation of Indian Nepalis in literature diasporic consciousness forceful eviction and displacement social movements and ritual practices among migrant communities Drawing attention to the lives of Nepali emigrants the volume presents a sensitive and balanced understanding of their options and constraints and their ambivalences about who they are This work will be invaluable to scholars and students of Nepal studies area studies diaspora and migration studies social anthropology cultural studies and literature

Climate Change, Glacier Response, and Vegetation Dynamics in the Himalaya RB Singh, Udo Schickhoff, Suraj Mal, 2016-06-06 This book provides information

essential for anyone interested in climate and environmental change of the Himalayan region including land and resource managers environmental planners conservationists environmentalists geographers climatologists ecologists and students The book is unique in its coverage of the current understanding of the science of climate change in the Himalayan mountain system and of the major impacts on physical systems and ecosystems The book gives an overview of the physical science basis of climate change and explains drivers and processes of glacier and vegetation dynamics The book covers relevant aspects of accelerated climate change observed in the Himalayan mountain system and highlights the regional differentiation of climatic changes and associated environmental modifications The focus is on climate variability and change and how physical systems and ecosystems respond to climate change impacts Consequences include impacts on physical systems such as glacier shrinkage glacial lake outburst floods altered hydrological characteristics permafrost warming and thawing and mass movements on slopes Climate change is also a powerful stressor on ecosystems and induces range shifts of plant and animal species and alterations in terms of phenology biomass plant cover plant group dominance and species composition Thus ecosystem structure and functioning will be strongly affected The book has an introductory chapter followed by a section on climate change a section on impacts on glaciers and hydrology and a section on vegetation dynamics Each section has several chapters presenting key concepts major drivers and key processes of environmental change in the Himalayan region from different perspectives Climate change impacts in the Himalaya have not been studied in much detail and respective findings were not presented so far in a comprehensive overview This book summarizes the current knowledge of interactions between climate change and the dynamics of glaciers hydrology and vegetation

The Nature of Geomorphological Hazards in the Nepal Himalaya Jan Kalvoda, Eva Novotná, 2024-07-03 The book offers a wide range of research topics that are addressed with the aim of contributing to the knowledge of geomorphological hazards in the Himalaya It is emphasized the integration of climate driven morphogenetic and tectonic processes in the Nepal Himalaya as a substantial phenomenon of active collisional orogeny The extreme dynamics of landform evolution in the Himalayan terranes triggers severe natural hazards and risks Interdisciplinary research of geomorphological processes and events related to natural hazards in the Nepal Himalaya follows general efforts to reduce geoenvironmental disasters Visual documentation is of particular importance in the conception of the book which is intended for specialized researchers as well as students

Environmental Change in the Himalayan Region Anup Saikia, Pankaj Thapa, 2019-02-19 The book focuses on environment and conservation issues pertaining to the Himalayas spanning Pakistan Nepal India Bhutan and Myanmar Environmental degradation changes in snow cover and glaciers in India Bhutan threats to protected areas and biodiversity in this ecologically fragile region are assessed in twelve distinct regional case studies

Ethnobotany of the Himalayas Ripu M. Kunwar, Hassan Sher, Rainer W. Bussmann, 2021-07-29 Research in recent years has increasingly shifted away from purely academic research and into applied aspects of the discipline including climate change research conservation and sustainable

development It has by now widely been recognized that traditional knowledge is always in flux and adapting to a quickly changing environment Trends of globalization especially the globalization of plant markets have greatly influenced how plant resources are managed nowadays While ethnobotanical studies are now available from many regions of the world no comprehensive encyclopedic series focusing on the worlds mountain regions is available in the market Scholars in plant sciences worldwide will be interested in this website and its dynamic content The field and thus the market of ethnobotany and ethnopharmacology has grown considerably in recent years Student interest is on the rise attendance at professional conferences has grown steadily and the number of professionals calling themselves ethnobotanists has increased significantly the various societies like the Society for Economic Botany the International Society of Ethnopharmacology the Society of Ethnobiology and the International Society for Ethnobiology currently have thousands of members Growth has been most robust in BRIC countries This new MRW on Ethnobotany of the Himalayas takes advantage of the increasing international interest and scholarship in the field of mountain research It includes the best and latest research on a full range of descriptive methodological theoretical and applied research on the most important plants in the Himalayas Each contribution is scientifically rigorous and contributes to the overall field of study **Nepal Himalaya** S. C. Joshi, Martin J. Haigh, 1986

Farming Systems and Sustainable Agriculture in the Himalaya Vishwambhar Prasad Sati, 2024-08-01 The farming system in the Central Himalayan Region is distinctive and unique mainly focusing on the cultivation of traditional subsistence cereal crops The agrobiodiversity in this region is rich with the Central Himalaya growing numerous cultivars and crop races The practice of cultivating many crops or cultivars in a single field is known as the Barahnaja System Another peculiar system is the Sar Sari system where different crops grow in the two Sars during the same seasons with one Sar left fallow for six months while the other grows crops This century old farming method involves plowing fields with oxen and using organic manure to enhance crop production and productivity However recent changes have been observed in the farming systems The area under traditionally growing millets is declining In river valleys and middle altitudes there is a recent trend towards cultivating paddy and wheat Unfortunately the cultivation of temperate fruits apple and citrus has seen a decline in terms of area production and productivity Various factors are influencing farming systems in the Central Himalaya such as high climate variability and change decreasing crop production and productivity evolving food habits and out migration The book contains 12 chapters illustrating introduction land use and land cover change cropping patterns crop diversity and agro ecological zones farming systems and sustainable agriculture climate change and its impact on agriculture infrastructural facilities for sustainable agriculture declining agriculture a case study crop productivity and suitability analyzes agribusiness policies and planning for sustainable agriculture and conclusions It serves as a valuable resource for students academicians researchers policymakers and farmers **Climate Change Impact on Himalayan Biodiversity** Dhani Arya, Naveen Chandra, Ravindra Kumar, Manju Lata Upadhyay, Arun Pratap Mishra, 2025-02-17 This book is an informative and profound

book that explores the impact of climate change on the unique and delicate environment of the Himalayan region The book meticulously examines the different plants and animals that live there and how they are affected by changing temperatures and weather patterns The book showcases how species are changing their habits and distribution patterns and what this means for the future of the Himalayan environment The book also provides practical suggestions for how local communities and policymakers can work together to protect the region s biodiversity for the future Overall this book is an excellent resource for researchers and academics who are interested in learning more about the environmental impacts of climate change on the Himalayan region The book is written in a clear and accessible manner making it easy for anyone to understand the profound implications of climate change on this unique and sensitive environment

Livelihoods and Well-Being in the Era of Climate Change Nasrin Banu,Shahab Fazal,2025-03-11 This volume addresses livelihood vulnerabilities due to climate change induced socio environmental stresses among different communities in various geographical locations in India and discusses how the people and communities can become resilient to these stresses Through multiple case studies and regional analyses the authors provide a holistic understanding of the impacts of climate change on livelihoods and well beings in India where other works on the subject are often fragmentary and do not encompass a comprehensive presentation of these topics This dedicated volume offers this comprehensive coverage exploring how climate change impacts vulnerable communities and how different actors such as vulnerable people communities governments and NGOs are adopting strategies for resilience and sustainable livelihoods As the impacts of climate change vary over geographical regions the book targets a systematic coverage of the issue for different geographical regions in South Asia India including the Himalayan region Hilly Area Indo Gangetic Plain Sundarbans Mangroves Coastal lands Deccan Plateau and Western Semi arid and arid areas The book is intended for social and environmental scientists geographers anthropologists sociologists regional planners public administrators and policymakers

Climate Change and Human Adaptation in India Kaushal Kumar Sharma,Sanjeev Sharma,Vijendra Kumar Pandey,Rupendra Singh,2024-05-30 This contributed volume presents an attempt to understand climatic variability and induced risk to livelihood of communities and to offer insights on how catastrophic conditions and crises can be mitigated through public policy interventions The case studies herein offer insights into different spheres and domains affected by climate change and present models of adaptation possibilities The book is divided into three thematic sections The first contains chapters that deal with assessing the effects of climate change The second section offers perspectives on adaptation and governance vulnerability in the context of sustainable livelihoods The third and last section looks at Policy and Governance with respect to climatic change adaptation and mitigations The lessons contained in this volume are useful to a wide audience including research scholars students policymakers and planners

Advances in Remote Sensing Technology and the Three Poles Manish Pandey,Prem C. Pandey,Yogesh Ray,Aman Arora,Shridhar D. Jawak,Uma K. Shukla,2022-12-09 ADVANCES IN REMOTE SENSING

TECHNOLOGY AND THE THREE POLES Covers recent advances in remote sensing technology applied to the Three Poles a concept encompassing the Arctic Antarctica and the Himalayas Advances in Remote Sensing Technology and the Three Poles is a multidisciplinary approach studying the lithosphere hydrosphere encompassing both limnosphere and oceanosphere atmosphere biosphere and anthroposphere of the Arctic the Antarctic and the Himalayas The drastic effects of climate change on polar environments bring to the fore the often subtle links between climate change and processes in the hydrosphere biosphere and lithosphere while unanswered questions of the polar regions will help plan and formulate future research projects Sample topics covered in the work include Terrestrial net primary production of the Arctic and modeling of Arctic landform evolution Glaciers and glacial environments including a geological geophysical and geospatial survey of Himalayan glaciers Sea ice dynamics in the Antarctic region under a changing climate the Quaternary geology and geomorphology of Antarctica Continuous satellite missions data availability and the nature of future satellite missions including scientific data sharing policies in different countries Software tools models and remote sensing technology for investigating polar and other environments For postgraduates and researchers working in remote sensing photogrammetry and landscape evolution modeling Advances in Remote Sensing Technology and the Three Poles is a crucial resource for understanding current technological capabilities in the field along with the latest scientific research that has been conducted in polar areas

The Ganges River Basin Luna Bharati, Bharat R. Sharma, Vladimir Smakhtin, 2016-08-25 The Ganges is one of the most complex yet fascinating river systems in the world The basin is characterized by a high degree of heterogeneity from climatic hydrological geomorphological cultural environmental and socio economic perspectives More than 500 million people are directly or indirectly dependent upon the Ganges River Basin which spans China Nepal India and Bangladesh While there are many books covering one aspect of the Ganges ranging from hydrology to cultural significance this book is unique in presenting a comprehensive inter disciplinary overview of the key issues and challenges facing the region Contributors from the three main riparian nations assess the status and trends of water resources including the Himalayas groundwater pollution floods drought and climate change They describe livelihood systems in the basin and the social economic geopolitical and institutional constraints including transboundary disputes to achieving productive sustainable and equitable water access Management of the main water use sectors and their inter linkages are reviewed as well as the sustainability and trade offs in conservation of natural systems and resource development such as for hydropower or agriculture

Sustainable Management and Conservation of Environmental Resources in India Sumit Chakravarty, Vineeta I, Jahangeer A. Bhat, Munesh Kumar, Gopal Shukla, 2024-11-22 The concept of natural resource sustainability has taken on new importance in today's world and community participation in the conservation of forest resources is essential for generating innovative sustainability solutions This new book looks at some of the important issues in sustainability and natural resource conservation including pollution agroforestry forest fire detection and monitoring

sericulture based agroforestry soil quality preservation and restoration and remote sensing and machine learning for improved agriculture Climate Change Impacts on High-Altitude Ecosystems Münir Öztürk, Khalid Rehman Hakeem, I. Faridah-Hanum, Recep Efe, 2015-05-05 This book covers studies on the systematics of plant taxa and will include general vegetational aspects and ecological characteristics of plant life at altitudes above 1000 m from different parts of the world This volume also addresses how upcoming climate change scenarios will impact high altitude plant life It presents case studies from the most important mountainous areas like the Himalayas Caucasus and South America covering the countries like Malaysia Sri Lanka India Nepal Pakistan Kirghizia Georgia Russia Turkey Indonesia Malaysia and the Americas The book will serve as an invaluable resource source undergraduates graduate students and researchers **Food and Livelihood Securities in Changing Climate of the Himalaya** Suresh Chand Rai, 2023-02-08 This book provides viewpoints on a cross sectoral multiscale assessment of food and livelihood security in changing climate the main global threats of the 21st century Climate change directly and indirectly influences several aspects of food security primarily in the farming and livestock sectors The farming sector is the main source of income and employment for about 70% of the Himalayan populace However there has been no such study that has comprehensively covered these aspects Additionally the book offers critical mitigation measures to adapt to climate change and other uncertainties The agricultural diversities and livelihood security in the Himalayan region will be sustainable only if farmers applied suggested mitigation measures correctly This title is appropriate for postgraduates and research scholars of social sciences environmental sciences and agricultural sciences Regional planners government officers NGOs and many other people who are interested in the Himalayan region as well as local communities will be also beneficial Climate Change, Disaster and Adaptations Azizur Rahman Siddiqui, Avijit Sahay, 2022-02-26 This volume examines how local communities respond and adapt to ecological changes and disasters resulting from climate change The main aim of the book is to understand the range of human responses to ecological change and to contextualise the reasons for adopting any particular adaptive strategy by a community Through the help of specific case studies presented as individual chapters the book aims to find out whether adaptation due to environmental stress is an individual decision and therefore is an isolated phenomenon or if resilience and adaptation are part of the same action paradigm of society as a whole in response to environmental change Of particular interest are the case studies of climate change or disasters that have rendered the site unsuitable for the return of its community at present and thus necessitated the relocation of such communities to new locations The case studies in the book focus on regions in India but cover different parts of the world as well and address concepts of resilience vulnerability risk adaptation and mitigation The book will be useful for students and researchers in the fields of geography disaster management environmental science and anthropology
