Sam Bass Warner

Pattersons Elementary Education 1998 Vol 10:

The Schooling of Girls in Britain and Ireland, 1800- 1900 Jane McDermid, 2013-03-07 This book compares the formal education of the majority of girls in Britain and Ireland in the nineteenth century Previous books about Britain invariably focus on England and such British studies tend not to include Ireland despite its incorporation into the Union in 1801 The Schooling of Girls in Britain and Ireland 1800 1900 presents a comparative synthesis of the schooling of working and middle class girls in the Victorian period with the emphasis on the interaction of gender social class religion and nationality across the UK It reveals similarities as well as differences between both the social classes and the constituent parts of the Union including strikingly similar concerns about whether working class girls could fulfill their domestic responsibilities What they had in common with middle class girls was that they were to be educated for the good of others This study shows how middle class women used educational reform to carve a public role for themselves on the basis of a domesticated life for their lower class sisters confirming that Victorian feminism was both empowering and constraining by reinforcing conventional gender stereotypes

The right to learn Nicaise, Ides, 2000-11-08 Evidence has shown that individuals leaving school without qualifications are four times more likely to be unemployed than those with qualifications Preventing and combating unemployment therefore requires active measures both in the labour market and in

the institutions responsible for preparing the future workforce educational institutions Attempts to remedy this problem have so far largely neglected children from socially excluded families one of the most vulnerable groups in education The right to learn explores a wide range of strategies both at the policy level and in the field to improve educational success among such disadvantaged children taking stock of good practice in a selection of EU member states chosen to reflect the diversity in systems and policies that currently exist The book suggests that a number of strategies are effective and feasible The authors recommend that a sufficiently powerful opinion movement is needed to promote the transfer of experience and action on different levels They conclude with several suggestions for good practice not just equal opportunity and equal treatment but also equal outcomes strategies The right to learn is important reading for teachers school administrators educational researchers policy makers NGOs parents associations those engaged in youth services and teacher training and in formulating policies to secure the social integration of the young generation
