Simulation and Control of the Dyeing Process R. Shamey,X. Zhao,2014-08-14 With increased environmental awareness
and rising costs manufacturers are investing in real time monitoring and control of dyeing to increase its efficiency and
quality This book reviews ways of automating the dyeing process as well as ways of understanding key processes in dyeing
including dye transport in fluid systems This understanding is then used to create models to simulate the dyeing process
which can then be used to develop appropriate measurement and control systems Control of variables such as temperature
pH conductivity and dye concentration can then be used to ensure a more consistent and cost effective dyeing process
Reviews the dyeing process and dye house automation and the factors that affect dyeing quality and common difficulties in
the process Explains the principles underlying the dyeing process and provides a thorough understanding of the
mathematical models that can be used to approximate it Discusses techniques for monitoring dyebaths and controlling the
