A sparkling addition to the multiple New York Times best-selling Ring of Fire alternate history series created by Eric Flint. An alchemist of the 17th century confronts modern science with often amusing results. Phillip Theophrastus Gribbleflotz, the world's greatest alchemist and a great grandson of Paracelsus and a Bombast on his mother's side, was a man history had forgotten. But when the town of Grantville was transported by a cosmic accident from modern West Virginia to central Germany in the early seventeenth century, he got a second chance at fame and fortune. The world's greatest alchemist does not make household goods. But with suitable enticements, Gribbleflotz is persuaded to make baking soda and then baking powder so that the time-displaced Americans can continue to enjoy such culinary classics as biscuits and gravy. Applying his superb grasp of the principles of alchemy to the muddled and confused notions the Americans have concerning what they call chemistry, Gribbleflotz leaves obscurity behind. In his relentless search for a way to invigorate the quintessential of the human humors, Gribbleflotz plays a central role in jump-starting the seventeenth century's new chemical and marital aids industries and pioneering such critical fields of human knowledge as pyramidology and aura imaging. These are his chronicles. At the publisher's request, this title is sold without DRM (Digital Rights Management). About Eric Flint's Ring of Fire series: This alternate history series is a landmark. Booklist: Eric Flint's 1632 universe seems to be inspiring a whole new crop of gifted alternate historians. Booklist reads like a technothriller set in the age of the Medicis. Twins - From Fetus to Child Alessandra Piontelli, 2012-09-10 Though much has been written about twins very little research has been done into their everyday lives both postnatal and prenatal In this fascinating new study Alessandra Piontelli follows the development and behaviour of thirty pairs of twins from their early life in the womb through to their third year of childhood Drawing on detailed ultrasound observations and work with mothers and families in clinical and natural settings the text traces the subtle ways in which various types of twins live behave and interact with their unequally shared and unique pre and postnatal environments Piontelli shows how from early on distinctive and personal traits can be seen in the behaviour of each member of a twin couple and how these traits continue and strengthen well beyond birth The book describes not only the behaviour of the twins but the impact they have on the lives of their family and carers what family members say how they react and how the family changes Scientifically based but warmly human in content this unique longitudinal study offers new insight for professionals working with mothers and families of twins and for researchers in human development across a range of disciplines **The Stay-At-Home Dad Handbook** Peter Baylies, Jessica Toonkel, 2004-10 A comprehensive handbook designed for and by a stay at home dad that addresses many of the issues that fathers face when they become primary caregivers **Parents Raising Children** United States.
