Reinventing the Wheel Bronwen Percival, Francis Percival, 2017-11-30 Wine and Spirits Book of the Year 2017 A fascinating look into the world of cheese and its creators In little more than a century the drive towards industrial and intensive farming has altered every aspect of the cheesemaking process from the bodies of the animals that provide the milk

to the science behind the microbial strains that ferment it Reinventing the Wheel explores what has been lost as expressive artisanal cheeses that convey a sense of place have given way to the juggernaut of homogeneous factory production While Bronwen and Francis Percival lament the decline of farmhouse cheese and reject the consequences of industrialisation this book's message is one of optimism Scientists have only recently begun to reveal the significance of the healthy microbial communities that contribute to the flavour and safety of cheese while local producers are returning to the cheese making methods of their parents and grandparents This smart engaging book sheds light on the surprising truths and science behind the dairy industry Discover how one experiment at a time these dynamic communities of researchers and cheesemakers are reinventing the wheel Personal Milkers Garland-Stewart Publishing,2006-04 Nigerian dwarf goats are rising in popularity as private milk suppliers pets and livestock The author uses her twenty five plus years as an agricultural educator and more than ten years as a goat breeder to demystify these little creatures Based upon years of beginner's questions and the answers she's provided Personal Milkers contains great resources for materials and further information on the breed
