## **Raising The Young Blind Child:**

Raising the Young Blind Child Shulamith Kastein, Isabelle Spaulding, Battia Scharf, 1980-01-01 Outlines the developmental stages of blind children and advises parents on how they can provide the special care that is needed      **Parenting Preschoolers** Kay Alicyn Ferrell, 1984 Provides answers to the most frequent questions of parents who have just learned their child has vision problems Topics include what to expect if a child is blind or visually handicapped and how to choose an early childhood program      Assessment of Young Developmentally Disabled Children Theodore D. Wachs, Robert Sheehan, 2013-06-29 Our knowledge of the cognitive and social emotional functioning of developmentally disabled infants and preschoolers derives in large part from our assessment of such children This book has been developed to familiarize readers with the characteristics of developmentally disabled children and to introduce to readers aspects of measurement that are of relevance to the assessment of atypical infants and preschoolers The book has been developed with clinicians and prospective clinicians in mind These are individuals who are committed to the care and education of developmentally disabled infants and preschoolers and the families of those children The book has thus been written to provide support for the use of assessment data in planning early intervention programs Of special note in the development of this edited book is that it is divided into four major parts with interrelated chapters in each part The authors of chapters in Parts II and III had access to the chapters in Part I before writing their chapters The summary chapters found in Part IV were similarly written by authors having access to all chapters in Parts I-III This approach to the development of an edited book was chosen as a way of ensuring an integration of major concepts throughout the book This process is also a reflection of our belief that assessment is an interdisciplinary process involving the synthesis of a number of diverse interests      Teaching Visually Impaired Children Virginia E. Bishop, 2004 A glossary of terms completes the book BOOK JACKET      *Everything Depends on How We Raise Them: Educating Young Children by the Suzuki Method* Shigeki Tanaka, Kyoko Selden, In this new edition to the About Suzuki series Shigeki Tanaka shares his experiences with using the Suzuki Method to teach young children He founded a kindergarten that has seen more than 1 000 graduates using this system His belief is that every baby has the potential to develop higher ability which is fostered by the baby's environment Therefore parents and teachers must be conscious of a child's environment from an early age He concludes that what is at the core of human ability is heart not knowledge This book is a great addition to the study of early childhood education      *An Orientation and Mobility Primer for Families and Young Children* Bonnie Dobson-Burk, Bonnie Dodson-Burk, Everett Hill, 1989 This book describes the skills children with visual impairments need to get around safely and efficiently and helps parents start their youngsters on the way to being independent Chapters cover sensory training concept development motor development and orientation skills and offers suggestions on how to encourage a child to move to identify the sources of sounds to keep track of objects and to play successfully with others      How to Thrive, Not Just Survive Rose-Marie Swallow, Kathleen Mary Huebner, 1987 A

Geraldine T. Scholl,1986 This comprehensive overview of educational theory and practice designed for special education students and teachers also constitutes a basic reference tool for administrators supervisors of support services school psychologists and health care professionals Twenty two chapters each written by a specialist in the field present material related to historical background information about visually impaired children and youths the components of educational systems and the special concerns of school curriculum Includes bibliography student questions and index *Using Literature to Help Troubled Teenagers Cope with Health Issues* Cynthia Ann Bowman,2000-03-30 Today traditional illnesses and high risk behaviors of adolescents have become interrelated through the multitude of physical social and emotional changes young people experience Good literature which gives adolescents the truth has incredible power to heal and to renew This reference resource provides a link for teachers media specialists parents and other adults to those novels that can help adolescents struggling with health issues Educators and therapists explore novels where common health issues are addressed in ways to captivate teens Using fictional characters these experts provide guidance on encouraging adolescents to cope while improving their reading and writing skills With the advancement in medicine traditional types of health issues such as birth defects cancer and sensory impairment have shifted to more behavior related problems such as depression

alcoholism and eating disorders All of these issues and others are examined from both a literary and psychological perspective in thirteen chapters that explore health issues through fiction Each chapter confronts a different health issue and is written by a literature specialist who has teamed up with a therapist In each novel these experts define the central character's struggle in coming to terms with an issue and growing in response to their difficulties Annotated bibliographies of other works both fiction and nonfiction explore these same issues give readers insight into helping teenagers with similar problems and provide the tools with which to get teenagers reading and addressing these problems American Rehabilitation ,1980 **Rehabilitation for Independent Living** Lois Schwab,1982 *Perkins Activity and Resource Guide - Chapter 4: Functional Academics* Mary Jane Clark,2013-09-26 This chapter is designed to address the needs of individuals with visual and multiple disabilities who may not be able to follow all parts of a traditional academic curriculum As educators our primary goal should be to provide students with skills that will be of use throughout their lives Skill acquisition often takes longer for students with multiple disabilities and they are not always able to generalize them into other settings For this reason it is important to identify skills that will help prepare students to lead the most independent lives possible and to provide many opportunities to practice them *Perkins Activity and Resource Guide* Charlotte Cushman,Kathy Heydt,Monica Allon,2021-04-30 We are pleased to release a 3rd edition of this incredible resource It contains hundreds of pages of practical suggestions for instructional activities for young children who are visually impaired with multiple disabilities Each section has been authored by specialists in the subject area Organized into sections for each instructional domain and in loose leaf format for easy pullout of sections the guide is very user friendly **Canada's Mental Health** ,1983 *Understanding Blindness* Mark Hollins,2022-02-16 Originally published in 1989 much was known about blindness but the field was divided into specialties Experts in the different areas were widely dispersed among university departments rehabilitation agencies and school systems with the result that people in one specialty area often knew little about developments in other areas It was hoped that this work would be useful in reducing that isolation by presenting within a single volume basic information derived from different approaches to the subject of blindness Individuals already familiar with material in some of the chapters could gain added perspective on the field as a whole by reading about other aspects of blindness outside their specialty area *Literary Art* Harriet Noble,1897
