Rambles Of A Botanist Among The Plants Climates Of California:

Rambles of a Botanist Among the Plants and Climates of California John Muir, 1974 **Rambles of a Botanist** John Muir, 1974 Valley of Heart's Delight Anne Marie Todd, 2022-10-25 This agricultural history explores the transformation of the Santa Clara Valley over the past one hundred years from America's largest fruit producing region into the technology capital of the world. In the latter half of the twentieth century the region's focus shifted from fruits such as apricots and prunes to computers. Both personal and public rhetoric reveals how a sense of place emerges and changes in an evolving agricultural community like the Santa Clara Valley. Through extensive archival research and interviews Anne Marie Todd explores the concepts of place and placelessness arguing that place is more than a physical location and that exploring a community's sense of place can help us to map how individuals experience their natural surroundings and their sense of responsibility towards the local environment. Todd extends the concept of sense of place to describe Silicon Valley as a non place where weakened or disrupted attachment to place threatens the environment and community. The story of the Santa Clara Valley is an American story of the development of agricultural lands and the transformation of rural regions. **Power and the Pursuit of Peace: Theory and Practice in the History of Relations Between States** F. H. Hinsley, Francis Harry Hinsley, 1967-10 In the last years of the nineteenth century peace proposals were first stimulated by fear of the danger of war rather than in consequence of its outbreak. In this study of the nature and history of international relations Mr Hinsley presents his conclusions about the causes of war and the development of men's efforts to avoid it. In the first part he examines international theories from the end of the middle ages to the establishment of the League of Nations in their historical setting. This enables him to show how far modern peace proposals are merely copies or elaborations of earlier schemes. He believes there has been a marked reluctance to test these theories not only against the formidable criticisms of men like Rousseau, Kant and Bentham but also against what we have learned about the nature of international relations and the history of the practice of states. This leads him to the second part of his study, an analysis of the origins of the modern states system and of its evolution between the eighteenth century and the First World War. *The Wilder Muir* Bonnie J. Gisel, 2017-03-20 Whether he is cheering for untamed mountain sheep or braving a high country storm that would sweep away lesser mortals John Muir, outdoorsman, scientist, author, is forever passionate, often droll and always inspirational. This collection of his little known pieces have been culled from private letters, magazine articles and personal journals from deep in the archives. In Bonnie Gisel's able hands Muir takes the reader on thrilling adventures and remarkable discoveries. His first summit of Half Dome, his great epiphany about the living glaciers of the Sierra and his jolly ode to the giant sequoia are all presented here with awe and affection. A nearly penniless young Muir sleeps under the stars in a Florida graveyard. Muir the father prods his wife in the back with a stick helping her up Yosemite's Four Mile Trail. And an older yet still adventurous Muir summits Mount Rainier and survives the perilously icy descent. Certain to delight fans of The Wild Muir, these audacious

exploits reveal John Muir's boundless curiosity and love of all things wild *John Muir, in His Own Words* John Muir, 1988
