Water Stephen C. Sturgeon, 2022-12-06 As the Democratic congressman from Colorado's Fourth District from 1949 to 1973 Wayne Aspinall was an advocate of natural resource development in general and reclamation projects in particular A political loner considered crusty and abrasive he carved a national reputation by helping secure the passage of key water legislation in the process clashing with colleagues and environmentalists alike Fiercely protective of western Colorado's water supply Aspinall sought to secure prosperity for his district by protecting its share of Colorado River water through federal reclamation projects and he made this goal the centerpiece of his congressional career He became chair of the House Interior Committee in 1959 and ruled it with an iron fist for more than a dozen years a role that placed him in a key position to shape the nation's natural resource legislation at a time when the growing environmental movement was calling for a sharp change in policy This full length study of Aspinall's importance to reclamation in the West clarifies his role in influencing western water policy By focusing on Aspinall's congressional career Stephen Sturgeon provides a detailed account of the political machinations and personal foibles that shaped Aspinall's efforts to implement water reclamation legislation in support of Colorado's Western Slope along the way shedding new light on familiar water controversies Sturgeon meticulously traces the influences on Aspinall's thinking and the arc of his career examining the congressman's involvement in the Colorado River Storage Project bill and his clash with conservationists over the proposed Echo Park Dam recounting the fight over the Frying Pan Arkansas Project and his decision to support diverting water out of his own district and exploring the battles over the Central Arizona Project in which Aspinall fought not only environmentalists but also other members of Congress Finally he assesses the Aspinall legacy including the still disputed Animas-La-Plata Project and shows how his vision of progress shaped the history of western water development The Politics of Western Water portrays Aspinall in human terms not as a pork barrel politician but as a representative who believed he was protecting his constituents interests It is an insightful account of the political financial and personal variables that affect the course by which water resource legislation is conceived supported and implemented a book that is essential to understanding the history and future of water in the West *Dictionary Catalog of the Department Library* United States. Library, 1969 Cartographies of Travel and Navigation James R. Akerman, 2010-11-15 Finding one's way with a map is a relatively recent phenomenon In premodern times maps were used if at all mainly for planning journeys in advance not for guiding travelers on the road With the exception of navigational sea charts the use of maps by travelers only became common in the modern era indeed in the last two hundred years maps have become the most ubiquitous and familiar genre of modern cartography Examining the historical relationship between travelers navigation and maps *Cartographies of Travel and Navigation* considers the cartographic response to the new modalities of modern travel brought about by technological and institutional developments in the twentieth century Highlighting the ways in which the travelers operators and planners of modern transportation systems value maps as both navigation tools and as representatives of a radical new mobility this

collection brings the cartography of travel by road sea rail and air to the forefront placing maps at the center of the history of travel and movement Richly and colorfully illustrated Cartographies of Travel and Navigation ably fills the void in historical literature on transportation mapping *Beacham's Guide to Environmental Issues & Sources* Walton Beacham,1993
