Vehicle-Track Coupled Dynamics Wanming Zhai,2019-08-31 This book systematically presents the theory numerical implementation field experiments and practical engineering applications of the Vehicle Track Coupled Dynamics Representing a radical departure from classic vehicle system dynamics and track dynamics the vehicle track coupled dynamics theory considers the vehicle and track as one interactive and integrated system coupled through wheel rail interaction This new theory enables a more comprehensive and accurate solution to the train track dynamic interaction problem which is a fundamental and important research topic in railway transportation system especially for the rapidly developed high speed and heavy haul railways It has been widely applied in practical railway engineering Dr Wanming Zhai is a Chair Professor of Railway Engineering at Southwest Jiaotong University where he is also chairman of the Academic Committee and Director of the Train and Track Research Institute He is a member of the Chinese Academy of Sciences and one of the leading scientists in railway system dynamics Professor Zhai is Editor in Chief of both the International Journal of Rail Transportation published by Taylor Francis Group and the Journal of Modern Transportation published by Springer In addition he is a trustee of the International Association for Vehicle System Dynamics Vice President of the Chinese Society of Theoretical and Applied Mechanics and Vice President of the Chinese Society for Vibration Engineering div **High Speed**

Railway Track Dynamics Xiaoyan Lei,2021-12-15 The second edition of this book systematically summarizes the latest research findings on high speed railway track dynamics made by the author and his research team over the past decade It explores cutting edge issues concerning the basic theory of high speed railways covering the dynamic theories models algorithms and engineering applications of the high speed train and track coupling system Presenting original concepts systematic theories and advanced algorithms the book places great emphasis on the precision and completeness of its content The chapters are interrelated yet largely self contained allowing readers to either read through the book as a whole or focus on specific topics It also combines theories with practice to effectively introduce readers to the latest research findings and developments in high speed railway track dynamics It offers a valuable resource for researchers postgraduates and engineers in the fields of civil engineering transportation highway and railway engineering Solid State Nuclear Track

Extended Objects in Noisy Point Clouds with Application in Telepresence Systems Faion, Florian, 2016-09-13 We discuss theory and application of extended object tracking This task is challenging as sensor noise prevents a correct association of the measurements to their sources on the object the shape itself might be unknown a priori and due to occlusion effects only parts of the object are visible at a given time We propose an approach to track the parameters of arbitrary objects which provides new solutions to the above challenges and marks a significant advance to the state of the art **Crime Fiction,**

Track Data-Oriented Maintenance Intervention Limit Determination for Ballasted Light Rail Tracks through Multibody Simulations David Camacho Alcocer, 2021-07-13 Light rail trains LRT are an important part of public transport but due to perceived high life cycle costs are not always considered suitable Life cycle cost reduction might be achieved through a knowledge based maintenance management rather than just on experience This work develops limits of maintenance and renewal of LRT systems based on vehicle reactions to the current track quality through measured data multibody simulations and track geometry indices An approach based on knowledge would lead to a track condition which allows a safe comfortable and under an appropriate maintenance strategy economically profitable operation
