The Kansas Beef Industry Charles L. Wood,Joshua

Specht,2021-10-08 This book relates the modern development of the Kansas beef cattle industry combining both the history of production including specific business problems and the significant work in upbreeding and an examination of the marketing aspects of the industry that became so important during the twentieth century Sharpest focus is on the period 1890 to 1940 after the Western beef industry had passed through the transition from using the expansive open range method of beef production to the more rational and organized methods of today Wood presents a detailed discussion of the history of upbreeding He points out the little known fact that the fine blooded animals especially Herefords that moved out from the Midwest were probably more important in stocking the ranges of the Plains and the Southwest than the many thousands of Longhorns driven from Texas He emphasizes the interregional aspect of beef production and the unique role played by Kansas On the threshold of the Great Plains Kansas received cattle from both the Midwest and the Southwest for many years upbred cattle moving South and stocker cattle moving from the South or Southwest into Kansas for additional maturing before being shipped to the Midwest for fattening or for slaughter Wood also looks closely at the relationship of cattlemen to government and to big business railroads stockyards and packers He sees the cattlemen as agricultural producers and business managers rather than as romantic self reliant giants of the earth Taking issue with the popular myth that cattlemen were and are ruggedly individualistic and disdainful of outside help Wood discusses the cattlemen s repeated demands for aid especially during the 1930s Included in the book is the history of the Kansas Livestock Association which the author credits as being one of the most significant stock associations in the West during this century Wood sets the KLA s growth within the context of the larger organizational revolution in the nation s business world A concluding chapter surveys major developments after World War II including the development of feedlots and irrigation the new cross breeding decentralization of packers and the advent of trucking to replace railroads There has been scant information on these topics in the general literature of the Great Plains

The Range Cattle Industry Edward Everett Dale,1960 **The Bar U & Canadian Ranching History** S. M. Evans,2004 For much of its 130 year history the Bar U Ranch can claim to have been one of the most famous ranches in Canada Its reputation is firmly based on the historical role that the ranch has played its size and longevity and its association with some of the remarkable people who have helped develop the cattle business and build the Canadian West The long history of the ranch allows the evolution of the cattle business to be traced and can be seen in three distinct historical periods based on the eras of the individuals who owned and managed the ranch These colourful figures beginning with Fred Stimson then George Lane and finally Pat Burns have left an indelible mark on the Bar U as well as Canadian ranching history The Bar U and Canadian Ranching History is a fascinating story that integrates the

history of ranching in Alberta with larger issues of ranch historiography in the American and Canadian West and contributes greatly to the overall understanding of ranching history The Great Plains Walter Prescott Webb,1959-01-01 A study of the changes initiated into the systems and culture of the plain dwellers **The Atlas of U.S. and Canadian Environmental History** Char Miller,2003-08-08 This visually dynamic historical atlas chronologically covers American environmental history through the use of four color maps photos and diagrams and in written entries from well known scholars Organized into seven categories each chapter covers agriculture wildlife and forestry land use and management technology and industry pollution *Report on Land Planning ...* United States.
