EASTER ISLAND JoAnne Van Tilburg, 1994 Since Easter Island Rapa Nui was first contacted by the Dutchman Jacob Roggeveen nearly three centuries ago the people culture and most of all the monolithic statues of this remarkable island have been seen by Westerners as an incredible puzzle a riddle with no solution At the heart of the so called mystery of Easter Island stand the gigantic moai the supreme sculptural achievement of the Rapa Nui people and indeed of all Polynesia Re erected upon their rectangular stone platforms lying along ancient transport roads hidden deep in seaside caves or standing upon the slopes of Rano Raraku where they were hewn from the living rock the statues are palpable evidence of the genius and obsession of a people How were they moved What do they mean Nearly 1 000 statues have been meticulously measured drawn mapped and photographed by archaeologist Jo Anne Van Tilburg and her Chilean and Rapa Nui colleagues over more than twelve years of dedicated research Drawing on the insights that have been gained into sculptural techniques design attributes and formal variation the author examines Rapa Nui prehistory in the context of new understandings of ecology and culture Detailed drawings of statues by one of Rapa Nui's most talented artists many published for the first time reveal the fluidity of line and complexity of meaning encoded within these stone figures Historical photographs from museum collections illustrate the vital role played by many Rapa Nui people in the documentation and preservation of their own culture The latest methods of statistical analysis computer imaging and robotics programs are brought to bear upon the perplexing question of statue transport and the author offers an exciting yet compellingly logical model of how a near fourteen ton statue could have been moved almost the entire length of the island Written by the foremost authority on the subject this fascinating book is another important step toward unravelling the mystery of Easter Island

Nui Sonia Haoa Cardinali, Kathleen B. Ingersoll, Daniel W. Ingersoll Jr., Christopher M. Stevenson, 2017-08-09 Rapa Nui one of the world's most isolated island societies and home to the notable moai has been at the centre of a tense debate for the past decade Some see it as the site of a dramatic cultural collapse occurring before Western contact where a self inflicted ecocide was brought on by the exhaustion of resources Others argue that the introduction of Western pathogens and the slave raids of 1862 were to blame for the near extinction of the otherwise resilient Rapa Nui people Cultural and Environmental Change on Rapa Nui brings together the latest studies by prominent Rapa Nui researchers from all over the world to explore the island's past and present from its discovery by Polynesians through the first documented contact with Western culture in 1722 to the 20th century The exiting new volume looks beyond the moai to examine such questions as was there was a cultural collapse how did the Rapa Nui react to Westerners and what responses did the Rapa Nui develop to adjust to naturally or humanly induced environmental change This volume will appeal to scholars and professionals in the fields of history archaeology and ecology as well as anyone with an interest in the challenges of sustainable resource management and the contentious history of Rapa Nui itself Rock Art of Easter Island Georgia Lee, 1992 *Rapanui Easter Island* Denis O'Leary, 2019-05-22 This book is published by Floricanto Press www.FloricantoPress.com www.LatinoBooks.Net www.LatinoBooks.com This a photographic historical and contemporary description of the island Rapa Nui also known as Easter Island and Isla de Pascua has long been said by natives to be at the navel of the Earth The people of Easter Island knew of no others for hundreds of years and built their society and belief system until contacted by the outside world in 1722 It is still unknown if the social collapse that followed was from a natural disaster forced by the human contact or more than likely as a result of a combination of the two In the center of the South Pacific Ocean Rapa Nui is located 2 191 miles west of the coast of Chile South America in the center of the Pacific Ocean Some 2 704 miles northeast of Tahiti the island remains even today the most isolated inhabited land on the planet Today 7 750 people live on Easter Island A territory of Chile many who live on the Island consider themselves Rapanui before Chilean Spanish is the language spoken by most but the almost lost language of the island is taught in schools and families to bring the pride of the native islanders to the front Note that the island and native language is Rapa Nui and the people of the island are Rapanui Denis O Leary has been an educator for nearly three decades and long served in civil rights organizations as well as been an elected school Trustee for sixteen of those years Denis O Leary has authored fascinating books that reflect respect for diverse Latin American cultures such as *Alba Walking in the Shadows* *Esteban's Caravan* children's books about Cesar Chavez and *Grandpa's Short Handled Hoe* It is no wonder that when Mr O Leary traveled to the most remote location on Earth Easter Island with his wife and son he wanted to relate what he saw and learned to students and community Through Denis O Leary's photography interactions with Rapanui and research we are shown a whole story of the mysteries and culture that developed over the centuries at the navel of our planet the island of Rapa Nui or Easter Island **Rapa Nui - Easter Island** Ian Conrich, 2016 **A Grammar of Rapa Nui**

Paulus Kieviet, This book is a comprehensive description of the grammar of Rapa Nui the Polynesian language spoken on Easter Island After an introductory chapter the grammar deals with phonology word classes the noun phrase possession the verb phrase verbal and nonverbal clauses mood and negation and clause combinations The phonology of Rapa Nui reveals certain issues of typological interest such as the existence of strict conditions on the phonological shape of words word final devoicing and reduplication patterns motivated by metrical constraints For Polynesian languages the distinction between nouns and verbs in the lexicon has often been denied in this grammar it is argued that this distinction is needed for Rapa Nui Rapa Nui has sometimes been characterised as an ergative language this grammar shows that it is unambiguously accusative Subject and object marking depend on an interplay of syntactic semantic and pragmatic factors Other distinctive features of the language include the existence of a neutral aspect marker a serial verb construction the emergence of copula verbs a possessive relative construction and a tendency to maximise the use of the nominal domain Rapa Nui s relationship to the other Polynesian languages is a recurring theme in this grammar the relationship to Tahitian which has profoundly influenced Rapa Nui especially deserves attention The grammar is supplemented with a number of interlinear texts two maps and a subject index

Diamond and Clive Ponting is based on the documented overexploitation of natural resources particularly woodlands on which Easter Island culture depended Deforestation is said to have led to erosion followed by hunger conflict and economic and cultural collapse Drawing on scientific data and historical sources including the shipping journals of the Dutch merchant who was the first European to visit the island in 1722 Boersema shows that deforestation did not in fact jeopardize food production and lead to starvation and violence On the basis of historical and scientific evidence Boersema demonstrates how Easter Island society responded to cultural and environmental change as it evolved and managed to survive *Easter Island* Orin Brightfield, AI, 2025-02-19 Easter Island or Rapa Nui presents a captivating enigma in world history How did a remote Pacific island support a civilization capable of creating and transporting the colossal Moai statues This book Easter Island explores the interconnected themes of Moai construction Rapa Nui society and the island's fragile environment to unravel this mystery The book emphasizes the importance of resource management social structures and ambitious construction projects in understanding the island's history For example pollen analysis reveals dramatic deforestation suggesting a link between environmental degradation and societal change The book's approach is a logical progression starting with an examination of the Moai themselves including their diverse styles and quarry locations It then delves into Rapa Nui society exploring traditions beliefs and social organization Finally it addresses the environmental history of the island tracing deforestation soil erosion and ecological changes Through archaeological evidence and historical accounts the book connects to broader fields such as anthropology environmental science and Polynesian history making it valuable for anyone interested in archaeology and earth sciences geography
