States under International Law? Maria Eriksson,2011-10-28 The crime of rape has been prevalent in all contexts whether committed during armed conflict or in peacetime and has largely been characterised by a culture of impunity International law through its branches of international human rights law international humanitarian law and international criminal law has increasingly condemned such violence and is progressively obliging states to prevent rape whether committed by a state agent or a private actor Whereas the prohibition of rape has been consistently recognised in these areas of law the definition of the offence has been a later concern to international law Attempts to define the crime have however been made by the ad hoc tribunals International Criminal Tribunal for Rwanda and the International Criminal Tribunal for the former Yugoslavia regional human rights courts and UN treaty bodies Increasing duties are thus placed on states not only to prevent rape through the enactment of criminal laws but to adopt specific elements of the crime in domestic legislation This study

Haight, Edward H. Taylor, Ruth Soffer-Elnekave, 2020 The primary goal of this text is to support social work students in HBSE 1 courses to develop a conceptual framework for understanding and meeting the challenges they will likely encounter in 21st century practice Through contemporary scholarship in human development ecology and systems theory we build on social work's classic bio psycho social spiritual framework Our interdisciplinary developmental ecological systems framework addresses the ways in which human beings shape and are shaped within complex and dynamic national and international contexts across the lifespan We attempt to establish a bridge between undergraduate courses in the social behavioral and biological sciences and social work practice courses We begin by establishing a framework for understanding human behavior in the

social environment through chapters providing an historical overview of the interdisciplinary roots of the developmental ecological systems framework the brain and development and the role of empirical evidence on social work practice Then we examine social work issues at various points in human development using specific programs and policies to illustrate developmentally and culturally sensitive social work practice These chapters include excerpts from interviews with practicing social workers Part 3 focuses on social work issues affecting individuals across the lifespan and around the globe through chapters on disability and stigmatization race racism and resistance women and gender and terrorism Sexual Violence

Bill Holcomb, 2010-01-01 This book presents both a compact summary of the voluminous research on sexual violence and a practical evidence based how to treatment guide for mental health practitioners working in clinics and institutions that treat men who are sexually coercive and violent toward others Those needing intervention may be college students individuals seeking outpatient help family batterers or those who sexually abuse women and children They may have been arrested for sex crimes or be incarcerated or on probation in sex offender treatment program though most will never have been arrested This clearly written and well structured resource will help clinicians deal with all The book first reviews research on the prevalence of sexually abusive behavior along with diagnostic issues assessment strategies and risk assessment approaches and then presents current integrated theories on the causes of sexually violent behavior The primary focus however is the specific emotional and behavioral targets of treatment and the therapist skills and strategies that are effective in reducing sexual victimization Cultural factors that influence treatment are identified and effective prevention programs for sexual violence are also described and evaluated
