Art Collecting and Middle Class Culture from London to Brighton, 1840-1914 David Adelman, 2024-06-28 This study explores the interplay between money status politics and art collecting in the public and private lives of members of the wealthy trading classes in Brighton during the period 1840-1914. Chapters focus on the collecting practices of five rich and upwardly mobile Victorians: William Coningham (1815-84), Henry Hill (1813-82), Henry Willett (1823-1905), and Harriet Trist (1816-96) and her husband John Hamilton Trist (1812-91). The book examines the relationship between the wealth of these would-be members of the Brighton bourgeoisie and the social and political meanings of their art collections paid for out of fortunes made from sugar, tailoring, beer, and wine. It explores their luxury lifestyles and civic activities including the making of Brighton Museum and Art Gallery, which reflected a paradoxical mix of patrician and liberal views of aristocratic aspiration and radical rhetoric. It also highlights the centrality of the London art world to their collecting facilitated by the opening of the London to Brighton railway line in 1841. The book will be of interest to scholars working in art history, museum studies, and British history.

Art, Education, and African-American Culture Mary Ann Meyers, 2017-09-08 A physician who applied his knowledge of chemistry to the manufacture of a widely used antiseptic, Albert Barnes is best remembered as one of the great American art collectors. The Barnes Foundation, which houses his treasures, is a fabled repository of Impressionist, post-Impressionist, and early modern paintings. Less well known is the fact that Barnes attributed his passion for collecting art to his youthful experience of African American culture, especially music. **Art, Education, and African-American Culture** is both a biography of an iconoclastic and innovative figure and a study of the often conflicted efforts of an emergent liberalism to seek out and showcase African American contributions to the American aesthetic tradition. Mary Ann Meyers examines Barnes's background and career and the development and evolution of his enthusiasm for collecting pictures and sculpture. She shows how Barnes's commitment to breaking down invidious distinctions and his use of the uniquely arranged works in his collection as textbooks for his school created a milieu where masterpieces of European and American late nineteenth and early twentieth-century painting, along with rare and beautiful African art objects, became a backdrop for endless feuding. A gallery requiring renovation, a trust prohibiting the loan or sale of a single picture, and the efforts of Lincoln University, known as the Black Princeton, to balance conflicting needs and obligations all conspired to create a legacy of legal entanglement and disputes that remain in contention. This volume is neither an idealized account of a quixotic do-gooder nor is it a critique of a crank. While fully documenting Barnes's notorious eccentricities along with the clashing interests of the main personalities associated with his Foundation, Meyers eschews moral posturing in favor of a rich mosaic of peoples and institutions that illustrate many of the larger themes of American culture in general and African American culture in particular.

In Praise of Commercial Culture Tyler Cowen, 2009-06-30 Does a market economy encourage or discourage music literature and the visual arts Do economic forces of supply and demand help or harm the pursuit of creativity This book seeks to redress the current intellectual and popular balance and to encourage a more favorable attitude toward the commercialization of culture that we associate with modernity Economist Tyler Cowen argues that the capitalist market economy is a vital but underappreciated institutional framework for supporting a plurality of coexisting artistic visions providing a steady stream of new and

satisfying creations supporting both high and low culture helping consumers and artists refine their tastes and paying homage to the past by capturing reproducing and disseminating it Contemporary culture Cowen argues is flourishing in its various manifestations including the visual arts literature music architecture and the cinema Successful high culture usually comes out of a healthy and prosperous popular culture Shakespeare and Mozart were highly popular in their own time Beethoven's later less accessible music was made possible in part by his early popularity Today consumer demand ensures that archival blues recordings a wide array of past and current symphonies and this week's Top 40 hit sit side by side in the music megastore High and low culture indeed complement each other Cowen's philosophy of cultural optimism stands in opposition to the many varieties of cultural pessimism found among conservatives neoconservatives the Frankfurt School and some versions of the political correctness and multiculturalist movements as well as historical figures including Rousseau and Plato He shows that even when contemporary culture is thriving it appears degenerate as evidenced by the widespread acceptance of pessimism He ends by considering the reasons why cultural pessimism has such a powerful hold on intellectuals and opinion makers
