*Improving text classification with Boolean retrieval for rare categories* Robert F. Chew, Anna C. Yaros,, Ashley Lowe, Adam Bryant Miller, Shirley Liu, Autumn Barnes, Brianna D'Arcangelo, Caroline W. Oppenheimer, Peter Baumgartner, Kirsty J. Weitzel, 2023-04-10 Advancements in machine learning and natural language processing have made text classification increasingly attractive for information retrieval However developing text classifiers is challenging when no prior labeled data are available for a rare category of interest Finding instances of the rare class using a uniform random sample can be inefficient and costly due to the rare category's low base rate This work presents an approach that combines the strengths of text classification and Boolean retrieval to help learn rare concepts of interest As a motivating example we use the task of finding conversations that reference firearm injury or violence in the Crisis Text Line database Identifying rare categories like firearm injury or violence can improve crisis lines abilities to support people with firearm related crises or provide appropriate resources Our approach outperforms a set of iteratively refined Boolean queries and results in a recall of 0.91 on a test set generated from a process independent of our study Our results suggest that text classification with Boolean retrieval initialization can be effective for finding rare categories of interest and improve on the precision of using Boolean retrieval alone

**The Importance of Suffering** James Davies, 2012-03-12 In this book James Davies considers emotional suffering as part and parcel of what it means to live and develop as a human being rather than as a mental health problem requiring only psychiatric antidepressant or cognitive treatment This book therefore offers a new perspective on emotional discontent and discusses how we can engage with it clinically personally and socially to uncover its productive value The Importance of Suffering explores a relational theory of understanding emotional suffering suggesting that suffering does not spring from one dimension of our lives but is often the outcome of how we relate to the world internally in terms of our personal biology habits and values and externally in terms of our society culture and the world around us Davies suggests that suffering is a healthy call to change and shouldn't be chemically anesthetised or avoided The book challenges conventional thinking by arguing that if we understand and manage suffering more holistically it can facilitate individual and social transformation in powerful and surprising ways The Importance of Suffering offers new ways to think about and therefore understand suffering It will appeal to anyone who works with suffering in a professional context including professionals trainees and academics in the fields of counselling psychotherapy psychoanalysis psychiatry and clinical psychology
