**in Second Language Research** Zoltán Dörnyei, 2014-04-08 One of the most common methods of data collection in second language research is using questionnaires of various kinds In spite of the wide application of questionnaires in the second language field there does not seem to be sufficient awareness in the profession about the theory of questionnaire design and processing The usual and in most cases false perception is that anybody with a bit of common sense can design good questionnaires and the practice of questionnaire design and use has remained largely uninformed by theory As a consequence it is all too common to see that studies which start out with exciting research questions are spoiled by the application of badly designed questionnaires and or a lack of reliable and valid results due to faulty processing One reason for the lack of sufficient awareness of questionnaire theory among language researchers is the absence of relevant summaries and training materials in the second language literature The purpose of the current book is to fill this gap The book is motivated by very practical purposes namely to help researchers to increase the efficiency of their questionnaires and to avoid possible pitfalls Accordingly special care has been taken to avoid unnecessary jargon to make the text accessible and to relate everything to real life situations Illustrated by concrete examples the book offers a thorough but accessible overview of the theory of questionnaire design and administration and processing with a special view on second language research applications The conclusion summarizes the main points of questionnaire theory in a straightforward checklist that offers an

easy to use tool for researchers Researchers and students in TESOL and second language programs and applied linguistics with secondary markets in other language research e g child language will find this book useful Treatment Strategies for Substance Abuse and Process Addictions Robert L. Smith, 2015-03-05 This distinctive and timely text examines the most prevalent substance and process addictions and focuses on current research and evidence based treatment strategies Major substance addictions discussed include alcohol tobacco marijuana methamphetamines and prescription drugs Complete chapters are also devoted to the most frequently cited process addictions making this text unique Behavioral addictions covered in this text include pathological gambling sex disorders disordered eating work exercise shopping and Internet gaming Each chapter contains a listing of student learning outcomes a case study with reflective questions techniques for assessment and diagnosis inpatient and outpatient treatment approaches and resources for further study With its emphasis on treatment strategies this text can be used by practitioners as well as by professors in the classroom in introductory courses in addictions or in subsequent courses that focus on treatment strategies Requests for digital versions from the ACA can be found on wiley com To request print copies please visit the ACA website here Reproduction requests for material from books published by ACA should be directed to publications counseling org
