Ratings Rating Agencies And The Global Financial System:

Ratings, Rating Agencies and the Global Financial System Giovanni Majnoni, Richard M. Levich, Carmen Reinhart, 2002-08-31 The business of credit ratings began in the United States in the early 1900s Over time credit ratings have gradually taken on an expanding role both in the United States and abroad and in official financial market regulation as well as in private capital market decisions However in 1999 the Bank for International Settlements through its Committee on Banking Supervision proposed rule changes that would provide an explicit role for credit ratings in determining a bank's required regulatory risk capital Once implemented this BIS proposal often referred to as Basel 2 would vastly elevate the importance of credit ratings by linking the required measure of bank capital to the credit rating of the bank's obligors With these regulatory changes under active discussion research into the role for ratings and rating agencies in the global financial system is particularly apropos Ratings Rating Agencies and the Global Financial System brings together the research of economists at New York University and the University of Maryland along with those from the private sector government bodies and other universities The first section of the volume focuses on the historical origins of the credit rating business and its present day industrial organization structure The second section presents several empirical studies crafted largely around individual firm level or bank level data These studies examine a the relationship between ratings and the default and recovery experience of corporate borrowers b the comparability of credit ratings made by domestic and foreign rating agencies and c the usefulness of financial market indicators for rating banks among other topics In the third section the record of sovereign credit ratings in predicting financial crises and the reaction of financial markets to changes in credit ratings is examined The final section of the volume emphasizes policy issues now facing regulators and credit rating agencies

paper is to illuminate the work and role of credit rating agencies in the global financial system and to explain and understand the general criticism directed at them In addition their special part in the subprime crisis of 2008 will be analysed and an estimation will be made of how much responsibility they bear in the crisis

The Rating Agencies and Their Credit Ratings Herwig Langohr, Patricia Langohr, 2010-04-01 Credit rating agencies play a critical role in capital markets guiding the asset allocation of institutional investors as private capital moves freely around the world in search of the best trade off between risk and return However they have also been strongly criticised for failing to spot the Asian crisis in the early 1990s the Enron WorldCom and Parmalat collapses in the early 2000s and finally for their ratings of subprime related structured finance instruments and their role in the current financial crisis This book is a guide to ratings the ratings industry and the mechanics and economics of obtaining a rating It sheds light on the role that the agencies play in the international financial markets It avoids the sensationalist approach often associated with studies of rating scandals and the financial crisis and instead provides an objective and critical analysis of the business of ratings The book will be of practical use to any individual who has to deal with ratings and the ratings industry in their day to day job Reviews Rating agencies fulfil an important role in the capital markets but given their power they are frequently the object of criticism Some of it is justified but most of it portrays a lack of understanding of their business In their book *The Rating Agencies and their Credit Ratings* Herwig and Patricia Langohr provide an excellent economic background to the role of rating agencies and also a thorough understanding of their business and the problems they face I recommend this book to all those who have an interest in this somewhat arcane but extremely important area Robin Monro Davies Former CEO Fitch Ratings At a time of unprecedented public and political scrutiny of the effectiveness and indeed the basic business model of the Credit Rating industry and heightened concerns regarding the transparency and accountability of the leading agencies this book provides a commendably comprehensive overview and should provide invaluable assistance in the ongoing debate Rupert Atkinson Managing Director Head of Credit Advisory Group Morgan Stanley and member of the SIFMA Rating Agency Task Force The Langohrs have provided useful information in a field where one frequently finds only opinions or misconceptions They supply a firm base from which to understand changes now underway A well read copy of this monograph should be close to the desk of every investor issuer and financial regulator legislator or commentator John Grout Policy and Technical Director The Association of Corporate Treasurers

Rating Politics Zsófia Barta, Alison Johnston, 2023-04-03 How do countries political and policy choices affect the credit ratings they receive Sovereign ratings influence countries cost of funding and observers have long worried that rating agencies these unelected unappointed unaccountable for profit organizations can interfere with democratic sovereignty if they assign lower ratings to

certain political and policy choices The questions of whether how and why ratings react to policy and politics however remain unexplored Rating Politics opens the black box of sovereign ratings to uncover the logic that drives rating responses to political and policy factors Relying on statistical analysis of rating scores interviews with sovereign rating analysts and a close reading of the official communications of rating agencies about their decisions Zs fia Barta and Alison Johnston show that ratings penalize center left governments and many though not all policies associated with the center left agenda The motivation for such penalties is not rooted in assumptions about how those political and policy features affect growth and debt servicing capacity Instead ratings are lower in the presence of those features because they are expected to make a country more vulnerable to market panics whenever the economy is hit by unforeseen shocks as they signal insufficient willingness and or ability to engage in determined austerity for the sake of reassuring markets Since market panics and the resulting sudden stops of funding lead to humiliating collapses of ratings rating agencies attempt to insure themselves against rating failures by pre emptively assigning lower ratings to countries with the wrong political and policy mix

Credit Ratings and Sovereign Debt B. Paudyn,2014-06-19 Bartholomew Paudyn investigates how governments across the globe struggle to constitute the authoritative knowledge underpinning the political economy of creditworthiness and what the neoliberal fiscal normality means for democratic governance

Legitimacy and Effectiveness in Global Economic Governance Biagio Bossone,Susanna Cafaro,Maria Chiara Malaguti,2014-07-03 Coping

with the challenges of global economic governance is a topical issue of the current international agenda and the object of a vivid debate among scholars and policy makers. The international financial and economic crisis that erupted in 2007 reveals the fallibility of the neoliberal paradigm that has dominated the world economic landscape for the last quarter of a century. Regulatory and supervisory institutions have disclosed their weaknesses and markets have shown their limits in dealing with the rational allocation of risks and their lack of resilience to shocks. This book offers a comprehensive view of this matter, examining the dialectic and fluid relations between State sovereignty, supranational rules and the role of markets. The opportunity to deal with economic and regulatory challenges through the lens of legitimacy and effectiveness is the *fil rouge* of the co-authors' original contributions and the inner sense of the book. This critical perspective results particularly in investigating gaps and ambiguities of the institutional framework currently underpinning the major international economic organisations: IMF, WTO, G20, EMU. In re-discussing the State's regulatory role in coping with the challenges of the global economy and in studying the contradictory interactions between financial paradigms and sustainability with regards to economic development policies.
