**Rational Choice and Security Studies** Michael E. Brown, Owen R. Cote, Jr., Sean M. Lynn-Jones, Steven E. Miller, 2000-07-18 Opposing views on the merits of formal rational choice approaches as they have been applied to international security studies Formal theories and rational choice methods have become increasingly prominent in most social sciences in the past few decades Proponents of formal theoretical approaches argue that these methods are more scientific and sophisticated than other approaches and that formal methods have already generated significant theoretical progress As more and more social scientists adopt formal theoretical approaches critics have argued that these methods are flawed and that they should not become dominant in most social science disciplines **Rational Choice and Security Studies** presents opposing views on the merits of formal rational choice approaches as they have been applied in the subfield of international security studies This volume includes Stephen Walt's article *Rigor or Rigor Mortis* **Rational Choice and Security Studies** critical replies from prominent political scientists and Walt's rejoinder to his critics Walt argues that formal approaches have not led to creative new theoretical explanations that they lack empirical support and that they have contributed little to the analysis of important contemporary security problems In their replies proponents of rational choice approaches emphasize that formal methods are essential for achieving theoretical consistency and precision

**Primacy and Its Discontents** Michael E. Brown, Owen R. Cote, Sean M. Lynn-Jones, Steven E. Miller, 2009-01-30 Experts consider whether American primacy will endure or if the future holds a multipolar world of several great powers The unprecedented military economic and political power of the United States has led some observers to declare that we live in a unipolar world in which America enjoys primacy or even hegemony At the same time public opinion polls abroad reveal high levels of anti Americanism and many foreign governments criticize U S policies Primacy and Its Discontents explores the sources of American primacy including the uses of U S military power and the likely duration of unipolarity It offers theoretical arguments for why the rest of the world will or will not align against the United States Several chapters argue that the United States is not immune to the long standing tendency of states to balance against power while others contend that wise U S policies the growing role of international institutions and the spread of liberal democracy can limit anti American balancing The final chapters debate whether countries are already engaging in soft balancing against the United States The contributors offer alternative prescriptions for U S foreign policy ranging from vigorous efforts to maintain American primacy to acceptance of a multipolar world of several great powers Contributors Gerard Alexander Stephen Brooks John G Ikenberry Christopher Layne Keir Lieber John Owen IV Robert Pape T V Paul Barry Posen Kenneth Waltz William Wohlforth

**Complexity Science and World Affairs** Walter C. Clemens Jr., 2013-11-18 Why did some countries transition peacefully from communist rule to political freedom and market economies while others did not Why did the

United States enjoy a brief moment as the sole remaining superpower and then lose power and influence across the board What are the prospects for China the main challenger to American hegemony In Complexity Science and World Affairs Walter C Clemens Jr demonstrates how the basic concepts of complexity science can broaden and deepen the insights gained by other approaches to the study of world affairs He argues that societal fitness the ability of a social system to cope with complex challenges and opportunities hinges heavily on the values and way of life of each society and serves to explain why some societies gain and others lose Applying theory to several rich case studies including political developments across post Soviet Eurasia and the United States Clemens shows that complexity science offers a powerful set of tools for advancing the study of international relations comparative government and more broadly the social sciences **Nationalism and Ethnic**

Brown, 2000 Analysts debate the international implications of a newly powerful China China's relentless economic growth in the 1980s and 1990s heralded its emergence as a great power in world politics As its economy expanded China seemed poised to become the second largest economy in the world At the same time it modernized its military and adopted a more assertive diplomatic posture Many observers have begun to debate the international implications of China's rise Some analysts argue that China will inevitably pose a threat to peace and security in East Asia A few even predict a new cold war between Beijing and Washington Others claim that a powerful China can remain benign None believes that China can be ignored The essays in this volume assess China's emerging capabilities and intentions debate the impact that China will have on security in the Asia Pacific region and propose policies for the United States to adopt in its relations with China

**Contending with Terrorism** Michael E. Brown, Owen R. Cote, Jr., Sean M. Lynn-Jones, Steven E. Miller, 2010-07-09 Experts explore the sources of contemporary terrorism what terrorists want and how the United States and other countries should respond Since the attacks of September 11 2001 scholars and policy analysts in national security have turned their attention to terrorism considering not only how to prevent future attacks but also the roots of the problem This book offers some of the latest research in terrorism studies The contributors examine the sources of contemporary terrorism discussing the impact of globalization the influence of religious beliefs and the increasing dissatisfaction felt by the world's powerless They consider the strategies and motivations of terrorists offering contending perspectives on whether or not terrorists can

be said to achieve their goals explore different responses to the threat of terrorism discussing such topics as how the United States can work more effectively with its allies and contemplate the future of al Qaida asking if its networked structure is an asset or a liability The essays in *Contending with Terrorism* address some of the central topics in the analysis of contemporary terrorism They promise to guide future policy and inspire further research into one of most important security issues of the twenty first century Contributors Max Abrahms Daniel Byman Erica Chenoweth Audrey Kurth Cronin Ren e de Nevers Mette Eilstrup Sangiovanni Hillel Frisch Calvert Jones Andrew Kydd Sean M Lynn Jones Elizabeth McClellan Nicholas Miller Assaf Moghadam Michael Mousseau Rysia Murphy William Rose Paul Staniland Robert Trager Barbara Walter Dessislava Zagorcheva *Power, Realism and Constructivism* Stefano Guzzini, 2013-03-20 Framed by a new and substantial introductory chapter this book collects Stefano Guzzini s reference articles and some less well known publications on power realism and constructivism By analysing theories and their assumptions but also theorists following their intellectual paths his analysis explores the diversity of different schools and moves beyond simple definitions to explore their intrinsic tensions and fallacies Guzzini s approach to the analysis of power within and outside International Relations provides the common theme of the book through which the theoretical state of the art in IR is reassessed A novel analysis of power and the potential limits of realism and constructivism in International Relations *Power Realism and Constructivism* will be of interest to students and scholars of international relations international political economy social and political theory and the study of power *Deterrence Now* Patrick M. Morgan, 2003-04-17 Patrick Morgan s authoritative study revisits the place of deterrence after the Cold War *A Theory of Security Strategy for Our Time* S. Tang, 2010-03-15 This book advances a coherent statement of defensive realism as a theory of strategy for our time and adds to our understanding of defensive realism as a grand theory of IR in particular and our understanding of IR in general and contributes to the ongoing debates among major paradigms of international relations *US Foreign Policy Decision-Making from Truman to Kennedy* A. Hybel, 2014-03-12 The book has three objectives to expose students to the ways different US presidents handled major foreign policy making problems to test the explanatory value of alternative decision making models And to reintroduce students to a wide range of critical US foreign policy issues **Reconceptualizing Deterrence** Elli Lieberman, 2013 This book offers a reconceptualisation of conventional deterrence theory and applies it to enduring rivalries in the Middle East The work argues that many of the problems encountered in the development of deterrence theory lay in the fact that it was developed during the Cold War when the immediate problem it had to address was how to prevent catastrophic nuclear wars The logic of nuclear deterrence compelled a preoccupation with the problem of stability over credibility however because the logic of conventional deterrence is different the solution of the tension between credibility and stability is achieved by deference to credibility due to the requirements of reputation and costly signaling This book aims to narrow the gap between theory and evidence It explores how a reconceptualization of the theory as a process that culminates in the internalization of

deterrence within enduring rivalries is better suited to account for its final success a finding that has eluded deterrence theorists for long This interdisciplinary book will be of much interest to students of deterrence theory strategic studies international security Middle Eastern studies and IR in general Deterring Terrorism Elli Lieberman, 2018-07-04 This book examines the question of how to deter a non state terrorist actor Can terrorism be deterred This book argues that current research is unable to find strong cases of deterrence success because it uses a flawed research design which does not capture the longitudinal dynamics of the process So far the focus of inquiry has been on the tactical elements of a state s counterterrorism strategy instead of the non state actor s grand strategies By studying the campaigns of Hezbollah the Palestinians the Irish Republican Army Chechens the Kurdistan Workers Party and Al Qaeda Taliban and ISIS over time we can see that deterrence strategies that target the cost benefit calculus of terrorist organizations lead to wars of attrition which is the non state organization s strategy for victory To escape the attrition trap the state must undermine the attrition strategy of terrorist organizations by using offensive campaigns that become critical educational moments The case studies presented here uncover an evolutionary process of learning leading to strategic deterrence successes Some terrorist organizations abandoned the use of force altogether while others abandoned their aspirational goals or resorted to lower levels of violence These findings should enable policymakers to transition from the failed policy that sought to defeat the Taliban and al Qaeda in the unending war in Afghanistan to a policy that successfully applies deterrence This book will be of much interest to students of deterrence theory terrorism studies war and conflict studies and security studies **US Foreign Policy Decision-Making from Kennedy to Obama** A. Hybel, 2014-03-13 This book analyzes the foreign policy decision making processes of Presidents John F Kennedy Lyndon B Johnson Richard Nixon George H W Bush George W Bush and Barack Obama during military intervention by way of contemporary foreign policy decision making models FPDMS
