Stevenson, 2000-12-06 In Canada Latin America and the New Internationalism Brian Stevenson argues that Canada's foreign policy toward Latin America has been profoundly affected by these three factors and has evolved in response to both changing domestic demands and shifting international circumstances By analysing a pivotal period in Canada Latin American relations he shows us how successive Canadian governments made important initiatives toward closer relationships with Latin America and were also pressured by non governmental organizations to play a bigger role in the region Canada's increased role can be seen in official foreign policy commitments such as the decision to join the Organization of American States and in policy decisions on political refugees He explains that while the United States has played a key role in sometimes constraining Canadian foreign policy in the region it is important to realize that Canadian foreign policy has been steadied by a long standing tradition of internationalism Canada Latin America and the New Internationalism demonstrates that the tradition of internationalism in Canadian foreign policy as viewed from the perspective of foreign policy analysis provides the framework within which to understand and accommodate changes in its policy toward Latin America The period which the book explores is critical in order to understand the contemporary nature and future direction of Canada Latin America relations *Bureaucratic Representation* H.
