Unions in Crisis? Michael Schiavone, 2007-12-30 Unionism in the United States was quite successful during and after World War II especially during the golden years of American capitalism 1947-73 as workers wages increased quite dramatically in a number of industries For example average hourly earnings for workers in meatpacking rose 114% between 1950 and 1965 those in steel 102% in rubber tires by 96% and in manufacturing 81% At the same time as union members wages were increasing union membership was declining Yet the American Federation of Labor Congress of Industrial Organizations AFL CIO argued that organizing new members was not a priority By concentrating on the existing membership and bread and butter issues and not organizing new members unionism could not deal with the attack on the social contract by employers and the government beginning in the United States in the late 1970s However while many people are claiming that organized labor is a dinosaur Schiavone argues that a strong union movement is needed now more than ever Unionism in the United States was quite successful during and after World War II especially during the golden years of American capitalism 1947-73 as workers wages increased quite dramatically in a number of industries For example average hourly earnings for workers in meatpacking rose 114% between 1950 and 1965 those in steel 102% in rubber tires by 96% and in manufacturing 81% At the same time as union members wages were increasing union membership was declining Yet the American Federation of Labor Congress of Industrial Organizations AFL CIO argued that organizing new members was not a priority By concentrating on the existing membership and bread and butter issues and not organizing new members unionism could not deal with the attack on the social contract by employers and the government beginning in the United States in the late 1970s Following that attack there was a significant decline in U S workers wages and conditions in real terms and there was a corresponding decline in union membership However while many people are claiming that organized labor is a dinosaur Schiavone argues that a strong union movement is now needed more than ever If unions make major changes as outlined in this book the U S labor movement may regain some of its strength By fighting for workplace such as higher wages and non workplace issues such as the fight for adequate childcare or against racism unions in America and Canada that embraced what Schiavone calls social justice unionism have improved society for all On purely bread and butter issues these unions have achieved better collective bargaining agreements than their rival mainstream unions as well as organizing more new workers per capita How

much strength organized labor will regain by embracing social justice unionism is uncertain but it is a beginning
